

SHE WEDS THE SCREEN VILLAIN

Pauline Garon, movie star, becomes the bride this month of Lowell Sherman, who has played the part of a sinister villain in countless celluloid dramas.

IVY LEA TIED UP

By the Snowfalls—Crossing on Ice Impossible. Ivy Lea, March 4.—This section of the country has been completely tied up by the worst snowfall of the winter. No mail was delivered up to yesterday. The weight of the snow on the ice has made the crossing here impossible.

Miss Ann McDonald has been visiting Miss Kathleen Ivey. W. W. Shipman went to Prescott on business on Saturday.

Mrs. Thomas Fletcher and son of Gananogue are visiting her parents, Mr. and Mrs. Richard Runnings. Miss Marie Boyle visited her parents on Saturday. Charles Dapo visited at Mr. Roland Birt's, Wilstead, on Sunday.

Mr. and Mrs. Lawrence Latimer and children are spending a few days at Charles Dano's. James Robertson is ill with grippe. Hugh Runnings is taking a home course in a school of art.

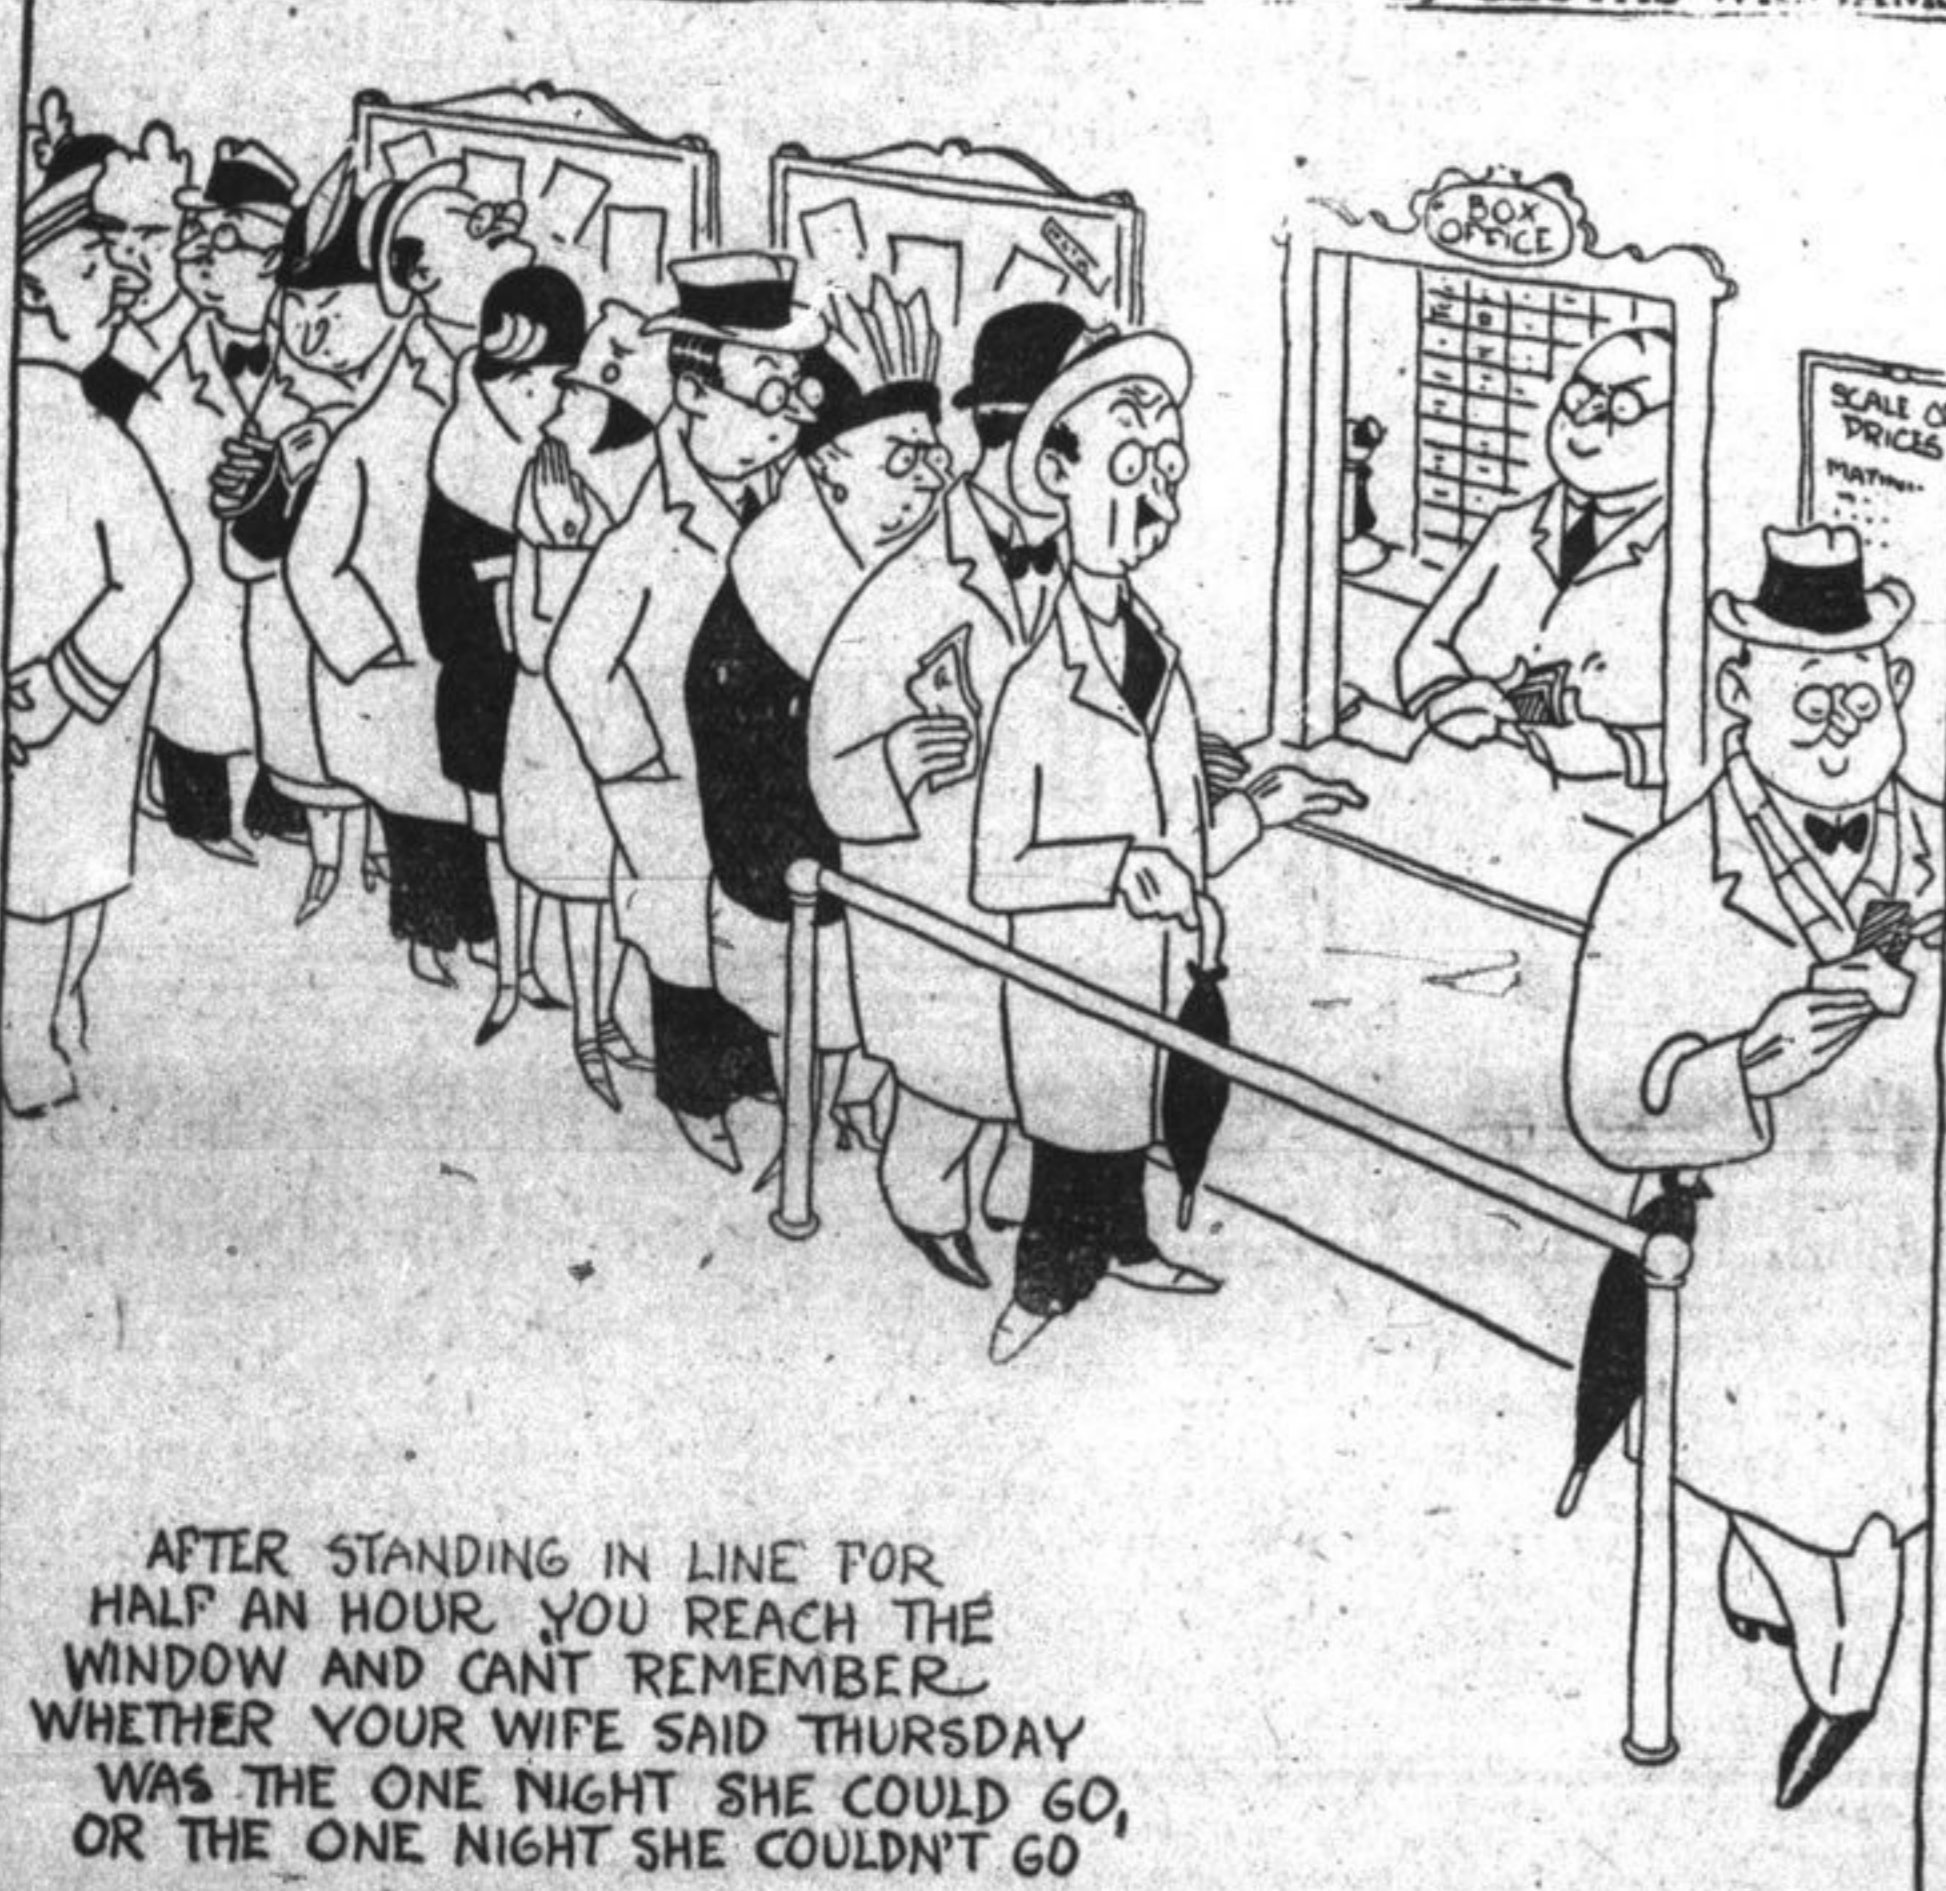

Alfred and Edward Hunt have been drawing wood to Rockport. Mrs. Sam Fair and daughter Beale of Fairfax visited at Richard Runnings on Sunday. William Trickey cut ice for Mr. Sly at the Selton cheese factory.

Inverary News.

Inverary, March 4.—A series of revivals are to be started in the Holiness Movement church next week. Mr. and Mrs. Morta Swerbrick, Rochester, N.Y., are spending some time with the latter's parents, Mr. and Mrs. A. Garrett, previous to going to residence on their farm near Sydenham. A large number from here attended M. B. Graves' sale today. Mrs. Richard Arthur and daughter, Margaret, have left to spend a week among friends in Kingston and vicinity.

THE MINUTE THAT SEEMS A YEAR

By GLUYAS WILLIAMS

AFTER STANDING IN LINE FOR HALF AN HOUR YOU REACH THE WINDOW AND CAN'T REMEMBER WHETHER YOUR WIFE SAID THURSDAY WAS THE ONE NIGHT SHE COULD GO, OR THE ONE NIGHT SHE COULDN'T GO

R. Gifford Moves to Yarker.

Chaffey's Locks, March 3.—The recent fall of snow made it impossible to do any work in the bush. William Laisley is spending a few days at Toronto. R. Gifford has moved his family to Yarker where he has procured a good situation. J. W. Simmons has returned from Detroit, Mich., where he has been visiting friends and relatives. Mrs. C. A. Burns is visiting her sister, Mrs. T. J. McGarry, Pittsburgh, Pa., R. J. Fleming who has been at the Hotel Dieu Hospital, Kingston, undergoing treatment for mastoid infection, is home for a few days.

A shoestring made of rubber composition has been invented in England. It is said to stretch so easily that a shoe can be taken off and put on without unlacing it.

Windermere Prize Spuds Are Famous

Windermere District Prize Winners of Farmers Institutes Advisory Board's Cup and the Murray Shield in 1923 at Victoria, B.C.

For over forty years the Windermere district of British Columbia has been famous for the quality of the potatoes produced there. Back in 1884 the late Francis Patrick Armstrong of Sorel, Quebec, one of the younger sons of Chief Justice James Armstrong who had wandered out into the mountains with the construction of the Canadian Pacific Railway, was busy raising potatoes on his ranch on the eastern shore of the Columbia Lake. He did this from seed which he had brought from the tobacco plains of Montana.

Near the centre of the Windermere district, Columbia Lake forms one of the main sources of the Columbia River. On his isolated ranch, Armstrong raised his famous spuds and in boats made from whipsaw lumber took them to the construction camps of the Canadian Pacific Railway one hundred and fifty miles down the Columbia river. His wholesome product became so well known that his ranch lost the name "Plains of the Nativity," given it in 1845 by the Reverend Father Pierre de Smet, and became known as the Armstrong Ranch.

Later Armstrong took up steamer navigation and others took his place as growers of the potato, among them Rufus Ashton Kington, Robert Randolph Bruce, now Lieutenant governor of the province of British Columbia, was neither of the early big producers. He sold his crops at the mine.

Interest in the growth of potatoes in the Windermere district never waned but the growers in the district did not really waken up to the possibilities of widely commercializing their fine potatoes until the first important provincial potato show held in Grand Forks, B.C. in 1922. After winning many prizes, more care was taken in the growth of the plants and the study of varieties until it was decided that the netted gems, Cambridge Russets, and Woe McGregors were the varieties best suited for the district.

The Windermere District Potato Growers Association swept the boards at each succeeding potato show with these two grades. On two of the three succeeding occasions, including the 1925 show, they won the Farmers Institutes Advisory Board's Cup, given as an annual trophy to the district within the province making the

Arthur G. Walker, Ajax Ranch, Invermere, winner of the County Life Shield in 1923, with the 15 pounds of certified seed potatoes with which he won the award.

best display of eight lots of seed potatoes of not less than thirty-two in each lot, each lot being the product of a different grower.

In 1923 and again in 1924 the Murray Shield given by Country Life, of B.C. for the best exhibit of certified seed was carried back amid rejoicing to Invermere. Prizes have also been won at different years in the International Potato Show at Spokane, Washington.

At New Westminster, B.C. in 1925 Arthur J. Walker, of Ajax Ranch, Invermere, scored 99.2 points as his contribution to the display is which the Windermere district scored 785.1 out of 800 points. In addition to winning the Farmers Institutes Advisory Board's Cup at the show the members of the Windermere association won seven-teen first prizes and twenty-three other awards.

What the World Is Doing

As Seen by Popular Mechanics Magazine

Motor-Driven Roller Skates Run on Rough Ground

Propelled by small acetylene or gasoline-burning motors, roller skates devised by a German engineer are said to develop considerable power and will run not only on pavements but on rough surfaces as well. Controls are operated through connections reached with the hands. The engine is built on principles discovered in making small motors for airplanes.

New Steel, Hard Yet Pliant, Takes Razor Edge

Many of the qualities of the celebrated Damascus steel are said to be found in a modern product which an Ohio man has developed by a secret process. He combines iron and carbon in such a way that the resulting steel will bend, keep an edge of razor sharpness, is tough and can be driven through other steels without breaking. A bar of the material, fifteen inches long, was tempered to five different degrees, one end of it being hard enough

to cut glass, a section was sharpened like a razor and would cut dry hair without honing or stropping, while other parts in the same bar would cut off a spike under blows of a hammer, would spring or could be bent backward and forward with the thumb and forefinger without breaking. Vanadium is an important element used in the preparation of the steel.

Salmon Travel Hundreds of Miles a Week

That salmon travel amazing distances in short periods is indicated by the journey of some fish which was liberated at the southern end of Nova Scotia last June and was caught less than a month later in the Meade river, Quebec. Identification was made by means of the silver tag which had been placed in one of the salmon's fins when it was first captured. Its journey was between 800 and 1,200 miles long. By means of the tags, valuable knowledge is being gained as to the habits of salmon and other fish.

Snubbers for Ford Car Made at Home

After he had broken three front springs in one summer, an autoist looked around for a cheap means of preventing further breakage. The remedy he finally devised consisted in

riveting snubbers, made from an old belt, around the front axle and the frame of the car. The belt was of four-ply canvas, 5 in. wide, and was cut in two, overlapping the splices 4 in. The illustration shows the installation clearly.

Mixing Concrete in the Wheelbarrow

A simple and easy method of mixing concrete by hand in a wheelbarrow is

shown in the illustration. Fig. 1 shows a batch of dry material consisting of four shovelfuls of gravel, two of sand and one of cement. Fig. 2 shows the first operation, working the material to the front of the barrow, with a round-pointed shovel. Fig. 3 shows the same batch after it has been worked back again in the same way, and some water has been added. The material is worked to the front again, leaving it in the position shown in Fig. 4, and then again backward. It is now thoroughly mixed and will keep itself in the position shown in Fig. 5. This method has been found entirely satisfactory.

Repairing Leaky Eaves Trough

It sometimes happens that a section of eaves trough rusts through in one place, while the rest of it is still in good condition. This can easily be repaired as follows: Cut a piece of canvas large enough to cover the hole, coat it with tar and press it down over the hole. Then coat the patch with tar on the inner side and let it dry. The trough should, of course, be well cleaned and dried before applying the patch.

(To prevent exposed black pipe from rusting, cover it with a grease made of 1 lb. lard, 1 oz. gum camphor and 1 oz. black lead.

A timepiece concealed in a Mexican San Antonio, Tex. can \$20 gold piece is on display at The number of Church of England clergymen over seventy years old is about eight per cent. of the total.
