ELECTRIC SAW

You remember the old method where the butcher stands at his block and saws and saws. Haven't you often wondered if there was not an easier and more sanitary method of cutting meat.

Our ELECTRIC SAW fulfills the bill. The meat is simply placed on a plate and shoved through the Band Saw in much the same way as you would cut wood.

The result is that instead of the old method of sawing and cutting, the operation is all done by the saw in one movement.

More Sanitary—More Economical

Besides your Roasts are all neatly jointed and not hacked by a cleaver.
