

What Women in Their "Forties" Need

BY A SPECIALIST

Many women approach the critical changing period of their lives that comes between the ages of forty and fifty, unmindful of its tremendous importance to their future health and happiness. Not understanding the functional changes taking place in their bodies, they work beyond their strength, often break down, become nervous wrecks, their bodies suffering with fatigue and their weakened nerves trembling at every step. Often in these weakened condition capillary hemorrhage becomes excessive, this added drain compelling them to take to their beds from nervous exhaustion.

What these women need is something that will instantly relieve the pressure on the overworked nerve centres and give them the vitality to stand up under the gruelling strain. Wonderfully effective results are often given in such conditions by the simple use of Ferro-Peptide, a skillful combination of six of the best nerve vitalizing elements known to modern chemistry. These little tablets contain no dangerous habit-forming drugs and are entirely harmless in their action.

Thousands of women can testify that Ferro-Peptide strengthens the faded nerves, revives the tired brain and puts the energy and courage into the body that enables her to stand up under the unusual strain of the changing period. Ferro-Peptide has to do these things or it costs nothing. Leading druggists sell it on a positive guarantee of relief or money back.

Quickly Drives Out All Rheumatic Poison

The first day you take Rheuma, the doctor's remedy that is selling so rapidly, you'll realize that when Rheuma goes in Rheumatism goes out.

It matters not whether you are tortured with pain, crippled with swollen joints or distressed with occasional twinges, Rheuma is guaranteed to end your rheumatic trouble or money back.

Rheuma is just as effective in cases of lumbago, sciatica, arthritis and chronic neuralgia.

Rheumatism is a dangerous disease. It often affects the heart and causes sudden death. If you have it in the slightest degree get a bottle of Rheuma from Jas. B. McLeod or any druggist to-day and drive it from your system at once.

ORGANIZER W. BOLAM TALKED TEMPERANCE

At Gatherings in the United and Baptist Churches at Athens.

Athens, March 17.—Stirring temperance addresses were delivered on Sabbath last by W. Bolam, Toronto, Organizer of the Ontario Prohibition Union, when he spoke in the United church in the morning, and in the Baptist church in the evening. He sounded the note of "Advancement," not being content with past achievement. That had been the undoing of the temperance cause—and had been the reason of a retrogression in other provinces. Indifference led so many to neglect to register their vote, and the franchise is a sacred trust, not to be lightly esteemed. All eyes are turned to Ontario, the province settled by the English, Scottish and Irish stock, to set the example in temperance legislation. Other provinces have greater numbers of the foreign element to militate against Anglo-Saxon ideas, so we must be true to our noblest selves, and lead the way in moral reforms. The church must ever be in the vanguard, in every movement for the uplift of the race, had her members, everywhere, regardless of any particular church affiliation, must present a united front against the encroaches of the enemy of our youth. While all fall under its blight, yet the young are marked as victims—as grist for the mill. Let not party preferences blind us to the proper course to pursue. Stand by the right, regardless of party. Some say, "Keep politics out of religion," the speaker said, "Put religion into politics," and then legislation would protect the youths and keep stumbling blocks out of people's way. Some say that prohibitive measures but create a desire for intoxicants. The ten commandments are prohibitive, yet the constitution of the British Empire and the other great nations of the world are based upon them. Consider the result of the abrogation of the law against theft, murder, etc. Would their repeal result in a diminution of crime? No, it would result in an increase. This applies to the law regarding the sale of intoxicants. To make it easier to obtain alcoholic beverages, would not lessen, but rather increase their consumption. Our duty is plain—when the opportunity presents itself, "Vote it down."

Much valuable information was given on Monday evening last, by Miss Reba L. Young, B.A., (Tren-

ton) of the local high school staff, when she addressed the Young People's Society, speaking on Formosa, "The Island Beautiful."

An Enjoyable Function. A pleasant function under the auspices of the Mission Band took place in the Baptist church here last Monday evening. The occasion was a "Birthday Thank-Offering service," the first item being a well appointed supper, served in the basement of the church, the admission being as many cents as each person was years old. An interesting programme followed consisting of choruses, duets, a drill, etc., the main feature, perhaps being a playlet "Tired of Missions," in six acts. The management is to be congratulated upon the success of the enterprise.

Taber opened her spacious home on Thursday afternoon of last week, for the thank-offering service of the Women's Missionary Society of Glen Elbe auxiliary, extending the invitation to the ladies of Athens auxiliary. Plans are in progress for the Thankoffering service of the local W.M.S. to be held on the evening of the 24th inst., when the speaker on that occasion is to be Mrs. Jolliffe, Kingston, an outstanding worker in the organization.

When Corns Talk!

The least sign of rain, or a touch of dampness in the air, and corns begin to talk! A piercing cry of agony shoots through your toe. Oh!!! The hurt of it. And soon your toe is red and inflamed and burning with pain; so tender you cannot bear to touch it. Then is the moment to plunge your foot into a soothing Radox foot-bath and get that corn out root and all, painlessly. You will feel the pain and soreness being drawn out.

How Radox Removes Corns

When you put your feet into a foot-bath containing Radox the salts soften the hard outer layers of the corn and the oxygen which Radox liberates enters the pores, opens them, and penetrates further and further, carrying the corn-softening salts right to the root of the corn, which is thus loosened so that it can be lifted out bodily. This life-giving oxygen leaves the feet clean and healthy. Because it is the oxygen which carries the corn solvent to the root of the corn, and because Radox liberates, by test, more oxygen than any other salts, it is obvious that Radox is more efficient in removing corns than any other salt.

The Radox Bath Salt does not effect the living skin. It is only the dead skin—the corn—which dissolves. If one bath does not do this a second bath next day will do it. A Radox user writes: "After a bath in Radox . . . to my intense astonishment the corn had disappeared, and all that remained was a tiny hole from which the corn had evidently come out—probably when rubbing down with the bath towel."

On your way home to-night, buy a package of Radox Bath Salts at the druggist's.
