The Editor Hears

That from many parts of Canada comes the call to buy Canadian goods. We have heard only this week that the Women's Institutes ask their sisters in the cities to buy, as far as possible, home-grown vegetables and fruits.

That the smart cape coats are very becoming to slim figures. A girl with a tweed cape coat, a short skirt and a small gay hat was an attractive figure on one of our streets on Friday afternoon.

That Mrs. Harry Burkholder, Hamilton, re-elected for her seventh term as provincial president for Ontario, said in answer to the question asked at the provincial meeting held in Hamilton this week as to whether the provincial officers received remuneration for their services: "No, not a single half-cent. But I am glad the question has been asked, for I understand rumors to that effect have been heard. "All the work is voluntary," concluded Mrs. Burkholder.

That many of us will disagree with the "Daughter" who thought busy-bodies were usually active workers. Most of us can call to mind busy-bodies who are never active about anything except spreading gossip. Women actively engaged in helping the world along seldom have time for interfering in other people's business.

That to its icy fetters sparkling in the sunshine is "a sight for sore eyes," certainly for eyes longing for spring and all that it means after a long winter. The last few days of warm weather have brought up the perennials and bulbs in the gardens the dead leaves should be raked up as soon as possible so that the shoots will not be damaged. Everyone with even a boulevard to care for should put it in order at once so that at the first warm rain the grass will long to see may appear to make a green carpet.

A loud speaker has been ordered for the Brooklyn supreme court so that the jury and stenographers can be sure of hearing all the evidence. Tea, which most people regard as one of Japan's chief products, forms only about 1 per cent. of her exports.

CONSTANT CURLING AND WAVING RUINS HAIR Girls just must curl and wave bobbed hair to appear their prettiest. But constant curling and waving burn and dry the hair, vitality and very life from the hair.

Complete muscular relaxation essential for healthful sleep. At "rising time" comes the test as to whether your night's sleep has given you the renewed vigor and vitality so necessary to the busy activities of this modern age. If certain muscles of the body remain tense for lack of resting support no amount of sleep will renew their energy. For instance—if the muscles enclosing the vital abdominal organs are allowed to sag and assume unnatural positions due to improper mattress support, they are under a strain, and cannot relax. Sleep therefore, doesn't rest this part of the body as well or healthfully as it would if proper support relieved the strain and allowed the tense muscles to relax. The Marshall Spring Mattress, built with many hundreds of highly resilient, independently working springs, fits the natural contour of the body, giving even, gentle support to every muscle. This kind of body support ensures true muscular relaxation and health-building sleep. It is this Marshall principle of new sleeping comfort that is changing the sleeping habits of generations.
