That the Kingston market was lovely with flowers on Saturday morning and from now until the frost days that will herald the coming of 1927 flower lovers will visit the market to enjoy the sight of the flowers. Now they are all from green houses but later we will have ferns and flowers from the woods, the fields and the country gardens. But before the gathering of the wild flowers begins we would like to sound a note of warning against the ruthless gathering of the flowers of our Canadian woods. In a letter received from a Kingston lady spending some time in the southern part of New York State she told her friends of the trailing arbutus that was perfuming the mountains in her neighborhood.

This beautiful flower used to grow on the rocks at Cartwright's point in the memory of its owners, but has disappeared utterly. Moccasin plant with its pink and white flowers and lady's slipper used also to be found there. But the children and sometimes the grown-ups, who have taken advantage of the hospitality of the late Sir Richard and Lady Cartwright and their daughters, to wander at will and enjoy the beauties of the springtime on their property, almost the only place within walking distance of Kingston where wild flowers can be found, have been so greedy and careless that instead of plucking a few blossoms and leaving plenty more for seeds, have pulled up the roots as well as all the blossoms they could carry, and the result is that many of the loveliest flowers will be seen no more near Kingston.
