

Cook in a cool Kitchen *this* Summer

IT'S good-bye to the hot, stuffy kitchen when a Canadian Beauty Rangette is used. Just as the Electric light routed the coal oil lamp, the Canadian Beauty Rangettes make the old-fashioned stoves a memory, so far as summer cooking is concerned.

With the Canadian Beauty Rangette, electrically generated heat is placed where you want it and nowhere else. The quantity of heat used can be regulated as well. You turn a switch; that's all—no fumes, no flames, no smoke, no ashes, no fuel to prepare or carry, no dangers. Cooking labors do not trespass on summer's leisure. You do not work over meals at blast furnace temperatures.

Canadian Beauty Rangettes have knocked the bottom out of Electric cooking costs. The expenditure for the largest Electric range, including installation. Prices for the other Rangettes and hot plates pictured here are in proportion.

Besides solving the entire summer cooking problem, the Canadian Beauty Rangettes are making friends with apartment and small home dwellers for year round cooking.

Every Rangette is strongly built, and all parts thoroughly tested. The Rangettes, though smaller than the large cabinet ranges, have cooking elements of the same style and capacity. Each element is equipped with the latest improved reciprocating switch. The top or cooking surface is of genuine, pearl-grey vitreous porcelain. Let the dealer show you the complete line.

FIVE DIE IN ROCK SLIDE

Rock excavated for what will be the tallest building in the world, sixty-five storeys, broke loose and buried five workmen in Manhattan. Rescuers are shown carrying out one of three others who were injured.

Sale of a Farm.
Salmon Point, May 1.—The farm owned by the late George Tuttle, Salmon Point, has been sold to Harry Cowles, New Brunswick. Harry Russell has leased his farm to Manley Peterson, who has already taken possession.

Mrs. Angus MacDonell, Pembroke, died on Saturday, aged fifty-seven years. The end came with shocking suddenness. Though ill for nearly six years, her condition became serious on Wednesday evening when she suffered a paralytic stroke following which she never regained consciousness.

Logansport, Ind., will spend \$215,000 on new roads.

"Let the Clark Kitchens help you!"

CLARK'S PORK and BEANS

Perfectly cooked beans with Canada Approved Pork and savory sauce, Clark's Pork and Beans are the perfect type of this truly Canadian dish. The net weight of contents is on the label.

MAY BE QUEEN

Lady May Cambridge, daughter of Princess Alice and Lord Athlone, High Commissioner to South Africa, is to wed Prince Olaf, heir to the throne of Norway, London, hears. Prince Olaf is twenty-two, and Lady May is twenty.

EVOLUTION OF THE SEWING MACHINE.

Who made the first sewing machine?

Kent, in his "Seven Wonders of the Modern World," says that a London mechanic of German origin, named Weisenthal, took out a patent on June 24th, 1750, for an embroidering machine. This machine used needles pointed at each end with an eye in the middle, and a thread carrier employed in a very clever manner. This appears to have been the first invention of a mechanism to take the place of the hand and needle or at least is the first recorded attempt.

In 1790, Thomas Saint, of England, invented a machine to stitch on leather, but it embodied many of the features of the modern sewing machine. This invention was, however, lost for more than two generations.

We next find that letters patent were granted to John Duncan on May 30th, 1804, for a much less comprehensive machine, and later to James Winter for improvements on sewing machinery.

In 1830, a Frenchman named Thimmonier invented a chain stitch machine; ten years after he had eighty machines making uniforms for soldiers, but angry journeymen tailors destroyed the machines and models, and Thimmonier barely escaped with his life. He made a second attempt, and was again successful in assembling a working model, but this was destroyed by another mob, and he died a few years later, heartbroken and penniless. To Thimmonier belongs the distinction of having produced the first machine whose sole purpose was that of sewing garments, and for the introduction of the use of the presser foot.

INDIA'S BEAUTY

Her Highness the Rani of Mandi, who is a picturesque figure at the court of St. James this season, is called one of the most beautiful members of royalty in India.

SPRING TIME.

You talk of autumn fires, but have you smelled
The smoke that rises from a ragged lawn
In early spring? And seen it float upon
A mist of new-born buds? Or, trembling, held
Among the greening twigs, swiftly dispelled
To drift about our houses? Whispering dawn
Is the best hour to see the magic.
It is gone
By glaring noon, and all the mystery quelled.
But when the sun first comes, or cooling eve,
Let only one sharp tang your nostrils fill
Add you are lost. No use of any guard
Against fire sorcery. If you would leave
Your winter conscience, gain a spring-time will,
Just set the grass to burning in your yard.

—Helen Anthony, in The Bookman.

AND NOW IT'S ODDS AND ENDS OUT THEY-GO

To be able to sell thousands of dollars' worth of Ladies' Ready-to-Wear in our Water and Smoke Sale of our stock which was recently damaged in the Harrison Building Fire, in such a short time, is quite a task, but it is done with your help and we thank you. It's to be expected that after such a huge sale we would have lots of Odds and Ends, and the balance of the goods that must be sold, to be able to re-decorate our store and again open up with a new and complete stock of Ladies' Ready-to-Wear.
