COAL burning may be old-fashioned, but it's the most efficient, economical and safe method of heating, after all.

Coal, being time-tried, requires no experiments to make it work.

Oil distillate burning is new—but only time will tell when, and if, appliances permit oil to rank with coal for domestic use.

COAL HEATING is far more economical than oil heating—so much so that the duties of feeding coal and removing ashes are lavishly paid for in the wide difference in cost.

STICK TO COAL—for like a ninety-nine year lease, it's good for some time yet.
