

10 corns removed

after three Radox footbaths

The great value of Radox for removing corns bodily is not only that Radox enables the corn to be lifted out root and all, but also that the treatment is absolutely painless; no cutting, no caustics, no bulging plaster, no risk whatever of blood poisoning—just a footbath in hot antiseptic oxygenated water and the corn may be lifted out. Read this letter:

"I had five corns (not callouses) on each foot, and after using Radox Bath Salts as directed for three nights in succession, I was able to walk in perfect comfort. I managed to get the last of my corns right out after the third bath in Radox. Have still got some of the first packet. Can honestly say I had spent dollars on different 'patents,' but nothing but Radox had the desired effect."

When you put your feet into a footbath containing Radox, the salts soften the hard outer layers of the corn and the dead skin (of the corn) combines with the Radox Bath Salts to form a protein salt of the actual corn itself. This dissolves in the water and so loosens the corn that it can be lifted out bodily.

We know of no other salt that will do the work of Radox in removing corns.

If we could see ourselves as others see us, we wouldn't believe quite all that we see. Sometimes there are quite a few bad features in what is styled good society.

Acid Decay

REMNANTS of food find lodgement between the teeth and at the base of the teeth.

These food particles ferment and form-acid. The acid eats into the flint like enamel of the teeth and germs of decay find entrance.

This is acid decay—the sure destruction of the teeth.

To relieve this condition and preserve the teeth the daily use of a strong anti-septic lotion, such as, Dr. Chase's Every-Day Mouth Wash is absolutely necessary.

Use it every morning and every night because of the pleasure you will experience from having the mouth, clean, sweet and antiseptic.
