

Here are Germain's new purchases, photographed by Manuel, on a French mannequin. Between the two practical sport outfits to wear at Deauville is the orchid velvet evening wrap, bought with Paris in mind.

HUNTS ICEBERGS

The United States Steamer Seneca patrols the North Atlantic on a ceaseless hunt for icebergs to warn other ships against. Here she is shown between two of her prey.

ROYAL POMP BOWS TO STRIKE EMERGENCY

The traffic crush in Whitehall when the strike broke shattered an age-old tradition. The Horse Guards on duty found it impossible to relieve one another with customary ceremony, owing to the unprecedented tangle of traffic. They stuck to their posts, for there was business to do, but they were mere chips in the current.

TRAFFIC JAM CHOKES LONDON STREETS

When the railroad, subway, tramcar and bus systems in England's capital were paralyzed by the general strike, the family auto came into its own. Photo shows jam along the Embankment as workers motored and walked to their offices. Note the eight lines of left-hand traffic going and only one line coming, and not a bus in sight.

Beautifying the "Garden Railway"

Upper—Kenora Station Garden. Lower left—Looking down on artistic Port McNicoll Station Garden. Lower right—"Countess of Dufferin", first C.P.R. engine to enter Winnipeg in her summer finery.

Living up to its title as the "Garden Railway", thousands of trees, shrubs and perennials were shipped out over the whole Canadian Pacific Railway system early in May this year. These included willows, poplars, lilac, spirea, honeysuckle, syringa, weigela, carragana, hydrangea, and many others. The perennials include roses of the climber and rambling variety and of all shades of color, tiger lilies, Iceland poppies, aquilegia, dianthus, Sweet William, pyrethrum, delphinium.

Every year the floral committee of the C.P.R. has the stupendous task of supplying the seeds, trees, shrubs and plants to thousands of stations from Saint John to Victoria. Bulbs are supplied and planted in the fall, rearing their jaunty heads with the melting of the snows in the spring.

The seeds are propagated under glass by experienced gardeners with a view to being transplanted when raised. In addition the committee sends out many thousands of seed packets to station agents and also for use in section foremen's gardens, bunkhouses and around shops. Enormous quantities of dunoed large quantities of food supplies for the men overseas.

marigolds, stirrhium, phlox, kochias, sinias, verbenas and alyssum.

Railway gardening was introduced in Canada by the Canadian Pacific Railway about thirty-five years ago. The majority of the gardens are laid out and looked after by employees of the system. Locomotive firemen, signal lowermen, watchmen, bunkhouse attendants and others take a great interest in the gardens with the help of horticulturists. Every employee is alive to the importance and the pleasure of making the railway stations blossom. Each one of them is filled with a healthy sense of emulation and the desire to make his own garden the beauty spot of the railway. The men treat the whole plan as a hobby. All make the supreme yearly effort to win the general manager's cup, a worthy trophy emblematic of the best floral display along C.P.R. tracks. But the prizes are not limited to this. Every general superintendent offers a prize for his own district, each superintendent gives one for his division and every roadmaster offers one for his sub-division.

During the Great War about 2,000 gardens were converted into vegetable-raising grounds and produced large quantities of food supplies for the men overseas.
