The bride was attended by Miss Bertha Wood, and Mr. Fred Wood acted as best man. The pretty bride was becomingly attired in white. **AN AGED MAN KNOCKED DOWN BY AUTOMOBILE**

**Mr. Anthony Smith, Sydenham Street, Sustained Injuries on Monday Afternoon.**  
 Mr. Anthony Smith, an aged gentleman, residing on Sydenham street, suffered a severe injury to his head, on Monday afternoon, when he was struck by an automobile driven by Mr. Richard O'Neil, Pittsburg township, at the corner of Sydenham and Queen streets about three o'clock, Monday afternoon. He was removed to the Kingston General Hospital for treatment.  
 One of the occupants of the car, when speaking to the Whig about the accident, stated that they were proceeding up Queen street when they struck Mr. Smith and that they had no chance to stop and avoid the accident. It is alleged that Mr. Smith stepped in front of the car at the intersection. He was knocked to the road. In a short time he was removed to hospital, where Doctors Bennett and MacCallum rendered medical attention.  
 Dr. Bennett stated that the condition of Mr. Smith was not serious but on account of his age it could not be determined what would develop. The matter was reported to the police soon after the accident by the driver of the car, and he was allowed to leave for his home after giving the particulars.  
 A SUMMER COURSE.  
 In the Art of the Theatre at Toronto University.  
 In every town and city in Ontario and in most of the villages there is an amateur theatrical society which is doing an important piece of work for the community. In order to supply instruction and training to those interested in this type of work the Department of University Extension of the University of Toronto is offering a summer course in the Art of the Theatre from July 5th to August 14th. In this way it is hoped to show how better plays may be selected and how they may be produced to the best advantage. The work will be carried on in Hart House Theatre, the best equipped little theatre in North America. This is the fourth summer that this course has been carried on and it has always been highly successful.  
 Some theatrical societies are choosing a representative and paying his or her expenses from the receipts from performances. The University Extension Office reports a fine list of applications to date and there seems to be every prospect that this year's course will have a much greater enrolment than any previous one. It is an excellent opportunity for those interested in amateur theatricals.

**GAS IN THE STOMACH IS DANGEROUS**  
 Recommends Daily Use of Magnesia to Overcome Trouble Caused by Fermenting Food and Acid Indigestion.  
 Gas and wind in the stomach accompanied by that full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."  
 Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the distressing gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.  
 It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get from any druggist a few ounces of Bismarck Magnesia and take a teaspoonful in a quarter glass of water right after eating. This will drive the gas, wind and bloated right out of the body, sweeten the stomach, neutralize the excess acid and prevent its formation and there is no sourness or pain. Bismarck Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and the best form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.
