Prof. Benn's Medicine Will Relieve Eczema and Cancer.

I would like space in your valuable paper to tell of my herb medicines. The names and the concocting and preparing of which I learned from three years' stay among the Indians. I began studying and dissecting animals over fifty-seven years ago. I also studied and learned to relieve all animal ailments, which are very similar to diseases in human beings. I am no scientist, but would like some specialist to tell me the difference between " mange in animals, horse or dog, or eczema in a person, or the difference of fistula in a horse or cancer in a person." They are all fed by the blood.

I am protected by law and have testimonials from people and clergymen all over the country. If anyone cares to come to the address below, where I live, they will find many I have relieved.

I am advertising my medicine so that the rich and poor—especially the poor—can be relieved. I ask each person to sign an application blank and I charge ten dollars (\$10) and guarantee relief. I have eased pain and put down the odour from cancer in twenty-four hours. I never ask anyone to come to me or to let me give them medicine. Anyone who knows me can tell you it is not to get rich. I do this, but for the good I can do to my fellows. I have relieved people who came from hospitals and whom the doctors said could not be helped.

I have been a subscriber and reader of The Whig for many years and always found great satisfaction and good results from advertising in The Whig.
