

### Easy to Gain With Yeast and Iron

New Combination of Yeast with Vegetable Iron Quick Way to Build Up Weight

This new combination of yeast vitamins with vegetable iron renew the action of sluggish blood cells, drives out dangerous body poisons, increases energy and endurance and supplies the system with the vitamins that build up weight.

For years yeast has been known as a rich vitamin food but not until we perfected "Ironized yeast" which comes in concentrated tablet form, was it possible to take yeast and iron in the right proportions to build up weight.

"Vegetable Iron" when combined with yeast is quite easy to digest, therefore better for the system. And "yeast" when ironized, becomes just twice as beneficial as ordinary fresh or cake yeast.

"Ironized Yeast" tablets are composed of concentrated food elements, therefore, they are pleasant to take and free from drug-like effects. If you are under weight, do not enjoy good health, lacking in energy and force "Ironized yeast" tablets will pick you right up, and if they fail, you get your money back.

Sold by James B. McLeod and all good druggists at \$1.00 for a large 60-tablet package or sent direct from laboratory on receipt of price. Ironized Yeast Co., Fort Erie, Ontario, Canada.

# CANADA—what of the Future?

**THE Bank of Toronto, closing its seventieth year of banking service to the Canadian people, finds itself compelled to express satisfaction, even amazement, over the achievements and progress of the Dominion in the first quarter of the new century.**

Canada's trade has grown in this period not by the million but by the hundreds of millions. We are doing business with the world in a measure beyond any expectation of 25 years ago. There was never a period in Dominion history when, despite the war-born burdens we have been compelled to carry, the certain greatness of this country loomed so large upon world horizons.

**What of the future?—the new quarter century?**

Canada with millions of acres of virgin soil as yet unsettled and unutilized, much of it adjacent to railway facilities is the future home of millions of selected immigrants.

Canada has scarcely touched her enormous coal resources. Canada today imports more than \$150,000,000 of manufactured metals, largely because our own base metals thus far have been developed only in a small way. Precious metal production will soon bring us into second place in world gold production, and our vast pre-cambrian mineral-bearing rock formation in the North has been prospected over a mere fraction of its surface.

Our water power resources have been described as the greatest pawn in deciding the industrial future of this continent. Our forest resources, not only as great storehouses of timber, but as producers of newspaper and pulpwood, have shown the way to Canada in the possibilities for the development of new industry.

"Onward to Canada's Greatest Half Century" may well be the watchword of a united, sanguine and determined people.
