A Well-Planned, Moderate Cost Bungalow

(By Edgar Prain, Architect) The greatly increased cost of construction above that of pre-war days makes the "own your own home" problem quite a perplexing one for the family of limited means.

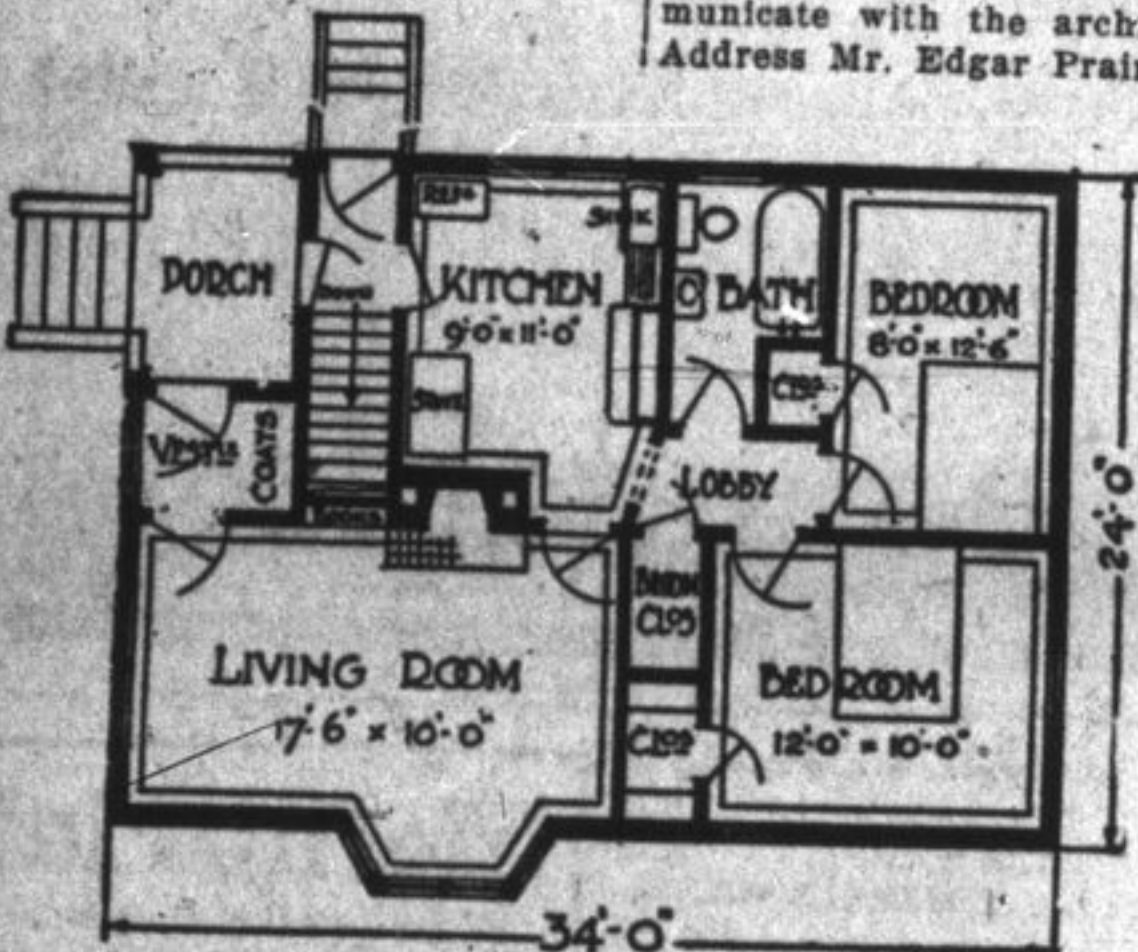

From these viewpoints the accompanying illustrations should meet the approval of the prospective builders. The initial cost is in the vicinity of four thousand dollars.

The perspective impresses one with the fact that it is all house—no expensive frills but just a good substantial home not lacking in the quality of being acceptable to the eye.

The living room is 17' 6" x 10' and has a built-in bookcase; an open fireplace with tile hearth and a large bay window.

From the porch one may go directly to either the kitchen or living room. This convenience is often appreciated when coming home but perhaps more so as a time saver in the many little trips necessary to find out "who's who" at the front door.

RED HOT JULY DAYS HARD ON THE BABY

July—the month of oppressive heat; red-hot days and sweltering nights; is extremely hard on little ones. Diarrhoeas, dysentery, colic and cholera infantum carry off thousands of precious little lives every summer.

The mother must be constantly on her guard to prevent these troubles, or if they come on suddenly to fight them. No other medicine is of such aid to mothers during the hot summer as is Baby's Own Tablets. They regulate the bowels and stomach, and an occasional dose given to the well child will prevent summer complaint, or if the trouble does come on suddenly will banish it.

Called to Kempville. Prescott, July 16.—Rev. Mr. Fowle, of the United States, has been extended a call to become pastor of the Presbyterian church at Kempville, and will be inducted into his new charge in September.
