"It's not just the fly that's the pest, it's the dirt that's the pest!"

Cover on thee, little pest Filthy fly, unwelcome guest!

NO need to tolerate a single fly in your house. Flit kills flies.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly. Get a Flit can and sprayer today.

THE TRAGIC PASSING OF DR. W. L. UGLOW

His Death Will Leave Blank at University of British Columbia, Says Vancouver Province.

The Vancouver, B.C., Daily Province, of Aug. 9th, has the following regarding the death of the late Dr. W. L. Uglow, of Kingston:

"Dr. W. L. Uglow, professor of mineralogy at the University of British Columbia, died at his home, 4361 Angus avenue, this morning from the effects of an accident which occurred some months ago at Honolulu.

"Professor Uglow was returning to Vancouver from a visit to China, and had stopped off at Honolulu, where he was met by his wife and only child, Elizabeth, aged six. While bathing in the surf at Waikiki Beach he injured his spine, and although he was given the best medical attention, both here and in Honolulu, he never recovered from this serious injury.

LATE DR. W. L. UGLOW

He remained at Honolulu until last month, when he was placed aboard the liner Niagara and brought home to Vancouver.

"Mrs. Uglow has been in close attendance throughout his illness. Before her marriage she was Miss Mattie Robertson, of Peterboro. She graduated from Queen's in Arts in 1911, and in Education in 1915.

Besides his wife and child, Dr. Uglow leaves his mother and two sisters, whose home is in Kingston. His mother and sisters are at present in the city.

"Dr. Uglow was one of the foremost authorities in the province on mining subjects and had a long training in all branches of the profession, both theoretical and practical.

"He took the M.A. degree at Queen's in 1906, B.Sc. in 1911, in mining engineering, Ph.D. in 1914 in geology at the University of Wisconsin. He was five years in the Geological Survey of Canada, being a member of the first geological party in Porcupine, April, 1910, also in New Brunswick, and three years in British Columbia, particularly in the Cariboo, south Vancouver Island and the North Thompson.

"He was field geologist for the Vinegar Hill Zinc Company, Wisconsin, examining lead and zinc deposits in Canada, 1915.

"From 1916-1917 he was mining geologist at the Cerro de Pasco Co. Co. per mines, Peru. From 1917-18 he was with the Canadian Munition Resources Commission, exploring for manganese and platinum.

"He was also one year with the Wisconsin Tax Commission as geologist, previous to his appointment with the University of British Columbia.

"Last year Dr. Uglow was elected a Fellow of the Royal Society of Canada, the highest distinction which Canada has to offer her scientific and literary men. He also won the Leonard medal for the best paper in mining subjects published in 1924.

He was appointed to the University of British Columbia in 1919. He obtained leave of absence in 1925 to undertake a survey of the geology of Hongkong under the government of that colony.

"The funeral services were conducted by Rev. A. E. Kerr, of St. Andrew's United church, and Rev. P. T. Pilkey, of St. John's United church. Interment was made at Ocean View Burial Park. The services were largely attended by the University staff, by many business men of the city, and by a host of other personal friends of the deceased. The honorary pallbearers were Chancellor R. E. McKechnie, President L. S. Klinck, Dean R. W. Brock of the University and Mr. Nettie, of the Dominion Geological Survey. The active pallbearers were Dr. G. E. Selton, Dr. Lyall Hodgins, Mr. C. T. McHattie, Mr. Leslie Henderson, Mr. George MacInnes and Prof. D. Buchanan.

AN EDITORIAL COMMENT.

The Vancouver Daily Province comments editorially, as follows:

"The tragic passing of Dr. W. L. Uglow will leave a blank at the University where, in laboratory and class-room, his principal work was done, during the past six years. It is probable, however, that the prospectors and mining men of British Columbia will miss the cheery and capable geologist even more than his students and colleagues will.

"Dr. Uglow was a practical as well as a theoretical scientist. He knew the hills as well as he did his textbooks and his specimen cases, and, knowing the hills, had a lively appreciation of the difficulties of the men who strive to make their living there. He had every sympathy for

the prospector, and he fully realized the importance of the prospector to the mining industry of British Columbia. He saw that methods of prospecting were changing and he spared no pains to give the men who follow this rather uncertain calling, a better scientific training, so that they might not spend weary weeks looking for mineral where no mineral could possibly exist. Following his aim along this line, he lectured and demonstrated night after night, during several winters, to classes organized by the Mining Institute. The prospectors of British Columbia will go far before they find a better or more able friend than the one they have lost."

KEEP ROADS CLEAN, ADVICE TO DRIVERS

Untidy City Folk Become Unpopular in Country—The Reasons Given.

The campaign for the conservation of roadside beauty conducted by the Ontario Motor League has been very widely supported by the press of Ontario. In this connection the New York Outlook has the following editorial, which should be taken to heart by people in Canadian cities just as much as Americans: "No longer are spring flowers the chief adornment of our country roads. The hepatica has had to yield place to the pop bottle, the wind flower to the wind blown fragments of the Sunday supplements, the adder's tongue to the tin can. Out of our cities pours an increasing horde of people who sally forth at dawn, after the fashion of tent caterpillars, to leave destruction in their wake. Accustomed to a life, where the ever-ready 'white-wing' and the garbage collector function as regularly as the rising and setting of the sun, these city dwellers have little or no conception of the beauty and dignity of clean earth. They break down fences, strip flowering shrubs, and all too frequently lead one to wonder why the word 'urbanity' ever came to mean that it is supposed to mean, and why 'civility' should have been the distinguishing mark of those who dwell in cities.

"Our larger centres of population sometimes wonder why they are so unpopular in the rural regions. One

Over 50,000 Students Enrolled in Canada

The total registration of universities and colleges in Canada for 1925 was 59,160. Of this total, which excludes any duplicate statistics as between universities and affiliated colleges, 16,925 were in preparatory courses, 31,125 in regular, 3,327 in correspondence, 7,403 in short courses, and some in other courses.

Undergraduates in arts, etc., according to a report just issued by the Dominion Bureau of Statistics, were the most numerous, with a total of 13,552. Students taking short courses other than for teachers, ranked second, with 4,978, while those taking the correspondence course held third place, with a total of 3,325. Medical students took fourth place in the number of registered students, a total of 2,690 being shown.

Registrants in other faculties totalled as follows: Graduate courses, 2,817; engineering and applied science, 2,203; short courses for teachers, 1,929; theology, 1,690; music, 1,559; household science, 1,211; education, 1,169; agriculture, 1,081; commerce, 991; law, 846; dentistry, 721; social service, 329; nursing, 198.

William Doering, an employee of the Pembroke Lumber Company, is in hospital, the result of injuries received when he was kicked in the head by a horse.

Watch our window for prices during this month at James Reid's.

KINGSTONIANS SPEAK OF TRIP ABROAD

Ald. Edward Anderson and Dr. H. A. Boyce Made Extended Visit in Europe.

In the opinion of Ald. Edward Anderson and Dr. H. A. Boyce, who have just returned from an extended visit in Europe, Vienna, the capital city of Austria, is one of the best administered, cleanest and most beautiful cities which they have ever visited.

It is not Dr. Boyce's first visit to Vienna, as on one other occasion he spent some time there in medical study, but he as well as Alderman Anderson was greatly impressed. Dr. Boyce spent much of his time at the University of Vienna and in the hospitals of the city while Alderman Anderson gave some attention to the study of municipal government among the European cities.

Both gentlemen sensed a suppressed feeling of unrest in Europe and they believe that it is possible, that if it flamed, it will lead to serious trouble. The Austrians are a clean, hard working people, these travellers say, and the women perform many hard tasks in the fields side by side with the men.

One fact that surprised Alderman Anderson very much was the number of immigrants coming to Canada. There were 500 men with their wives and families on the Cunard liner "Albatross" on which the Kingstonians made their return trip, and they were all of a sturdy, healthy type.

Mr. Anderson and Dr. Boyce left New York on April 22nd and their voyage over was quite pleasant but they found it much colder returning, also fogs hindered the homeward trip and delayed the travellers one day. They landed at Cherbourg, France, and proceeded directly to Vienna, which they made their headquarters. From this city Alderman Anderson made a number of side trips to such famous cities as Venice and Budapest.

While delighted with Europe, both gentlemen are glad to get back home and both express themselves as having enjoyed their trip to the full.

Leaving for England, Mrs. Loucks, Kingston, Mr. and Mrs. H. Humphries and two sons, Harry and Arthur, Jack Sinclair, Ottawa, spent Sunday the guests of Mr. and Mrs. James Rutherford, Smith's Falls. Mrs. Loucks is paying farewell visits to old friends before returning to England, where Mr. and Mrs. Loucks intend to reside permanently.

Sports at Clayton. A big three-day celebration, fostered by the Clayton Chamber of Commerce, will be held August 19, 20 and 21. A programme of both land and water sports is being planned. A big feature will be a free-for-all motor boat race, bringing together the fastest boats on the river.

New Refining Mill. Information has reached Belleville that in the near future a refining mill will be located on the lake front to take care of the new feldspar mines in the northern part of the county of Hastings. It is claimed that the manufactured article would bring much more attractive prices than the raw product.
