House Building and Painting.

THE subscribers hereby give notice to the inhabitants of Kingston, Ernestown, Adolphstown, and other adjoining places, that they intend to employ the next season in this vicinity, in PAINTING HOUSES, outside and inside, Patent Painting of Rooms, &c. and the business of HOUSE CARPENTERS and JOINERS. Their work will be executed with neatness and dispatch. Application may be made at the dwelling-house of Mr. STOUGHTON, innkeeper, in Kingston, Mr. JOHN BELL, in Ernestown, or Mrs. DOUGLAS, innkeeper, in Adolphstown. NATHAN WHEELER, ANDREW PICKENS. Nov. 20, 1810.

THE Public are hereby cautioned against purchasing a NOTE OF HAND executed by the subscriber to Edward Walker, in July last, for £. 20, with an endorsement of 10s. as it will be paid to no person but the said Walker, nor to him unless produced in one month from the date hereof. JOHN SIZI. Kingston, November 21, 1810. c82

B. WHITNEY, has just received and is now offering for sale, a very extensive assortment of

FALL & WINTER GOODS.

Hardware, West India Goods and Groceries.

All of which he will dispose of (wholesale and retail) at as low a rate as can be purchased in Montreal or Quebec. He most cordially invites those who are in the habit of purchasing by wholesale, to call and examine for themselves.

Kingston, 1st December, 1810. 1—tf

New 'Cheap Goods.

S. BARTLET, INFORMS his Friends and the Public, that he has this day received, and now opening for sale, a LARGE SUPPLY of

GOODS;

CONSISTING OF Dry Goods, Liquors and Hard Ware, Groceries, Crockery and Saddles, Glass Ware, &c. &c.

Which, in addition to his former stock, will make his assortment very complete: the whole of which will be sold at the Montreal prices, for cash or any kind of produce.

As he is now closing his business in this place, no credit will be given, and goods will be sold lower than can be purchased in the Province; and as he is determined to sell all off, earnestly solicits his friends and customers to call and examine his Goods.

CASH and the highest price paid for PRODUCE.

All those indebted, either by Note or Book Account, are requested to make immediate payment. Kingston, October 1, 1810. 2—tf

SADDLING BUSINESS.

THE subscribers having removed to the building occupied by Messrs. ABBOT & BASCOM, respectfully inform the Inhabitants of Kingston and its vicinity, that they are now carrying on the SADDLE, HARNESS & TRUNK-MAKING business, in their several branches.

They have now on hand a quantity of warranted work; and their stock comprising almost every article usually kept in a Saddler's shop, they flatter themselves that they shall be able to answer all orders for work in their line—and that on as reasonable terms, for ready pay, as can be purchased in the Province.

Constant attention to business, and the quality of their work, will be their only claim upon the public patronage.

REPAIRING done on the shortest notice. C. WILLISTON & Co. Kingston, Nov. 6, 1810. 7—tf

FRANCIS PEMBER,

INFORMS his old Customers, and the Public in general, that he has removed from his former stand to the shop nearly opposite Messrs. Abbot & Bascom's store, where the BOOT & SHOE-MAKING business will be continued, in their various branches. Orders in his line promptly attended to, and favors duly acknowledged. Kingston, Nov. 20, 1810. 9—tf

ABIA B. SAYRE,

CABINET-MAKER,

RETURNS his sincere thanks to the Ladies and Gentlemen of Kingston, for past favors, and informs them that he still continues to carry on the Cabinet Making in its various branches, at his shop opposite Capt. EARLE'S, where customers may be supplied with Clock-Cases, Sideboards, Desks, Book-Cases, Bureaus, Dining Tables, Bed-leads, &c. &c. at the shortest notice. Kingston, Oct. 16, 1810. 4—tf

TO BE LET,

A SMALL room, tight and well lighted, in a central part of the town. Apply at the Gazette Office. Oct. 6.

AGRICULTURAL.

Letter from JOSEPH COOPER, Esq. of New-Jersey, to a gentleman in Philadelphia. Cooper's-Point, 17th April, 1799.

RESPECTED FRIEND,

KIND Providence having placed me in a station of life which obliged me to procure a living by industry, and that principally in the agricultural line, it has caused me to be a strict observer of the works of nature, with respect to such parts of the vegetable creation as have come under my particular notice, and have been greatly embarrassed at the opinion very generally entertained by farmers and gardeners, that changing seeds, roots and plants to distant places, or different soils or climates, is beneficial to agriculture, not agreeing with my observations or practice. This induced me to make many experiments on that head, all of which in more than forty years practice have operated to prove to my satisfaction, that the above opinion is not well founded, and if so, must be extremely prejudicial to agriculture, as it turns the attention of the husbandman from what appears to me one great object, viz. that of selecting seeds and roots for planting or sowing, from such vegetables as come to the greatest perfection in the soil which he cultivates.

What induced me to make experiments on that head, was, observing that all kinds of vegetables were continually varying in their growth, quality, production and time of maturity. This led me to believe that the great Author of nature, has so constructed that wonderful machine, if I may be allowed the expression, as to incline every kind of soil and climate to naturalize all kinds of vegetables, that it will produce at any rate, the better to suit them, if the agriculturists will do their part in selecting the most proper feed. In support of which I will take the liberty of subjoining a few facts and experiments, out of an inconceivable number which have all combined to prove the above to my satisfaction.

In, or about the year 1746, my father procured the seeds of the long warty (squash), which have been kept on the farm ever since, without changing, and are now far preferable to what they were at first. Our early peas were procured from London the spring before Braddock's defeat, and have been planted successively every season since on the place. They have not been changed, and are now preferable to what they were when first obtained. The seed of our asparagus was procured from New-York, in the year 1752, since which time I have not planted a seed but what grew on my beds, and by selecting the feed, from the largest stalks, I have improved it greatly.

A complaint is very general, that potatoes of every kind degenerate, at which I am not surpris'd, when the most proper means to produce that effect is constantly practis'd; to wit, using or selling the best, and planting the refuse; by which means almost the whole of those planted are the produce of plants the most degenerated. The consideration of which induced me to try an opposite method. Having often observed that some plants or vines produced potatoes larger, better shaped, and in greater abundance than others, without any apparent reason except the operations of nature, it induced me to save a quantity from such only for planting the ensuing season, and I was highly gratified in finding their production exceed that of others of the same kind, planted at the same time, and with every equal advantage, beyond my expectation, in size, shape, and quantity; this induced me to continue the practice, and I am satisfied that I have been fully compensated for all the additional trouble.

A circumstance happened respecting potatoes, which may be worth relating; a woman whom I met in market requested me to bring half a bushel of sweet potatoes for feed the next market day, which I promised to do, but going through the market on that day, previous to her son's coming for the potatoes, I observed the woman selling such as I had brought for her; when the boy came, I asked him the reason they wanted potatoes for feed, while they were selling their own; his answer was that his father said, if they did not get feed from me once in three or four years, their potatoes would be good for nothing.—QUERY, if he had used the same means in selecting his potatoes for planting as I did, whether he would
