PROSPECTUS

OF A WORK ENTITLED **THE KEY**
COMPRISING the following systems as originally given:
I.—THE EBB AND FLOW OF THE TIDES,
Caused by contraction and expansion, thro' cold and heat, from the alternate absence and presence of the Sun.

II.—GRAVITY,
By a head pressure of the electric element, acting upon all matter as electric vacuums, which I term "Prestriction."

III.—MAGNETISM,
By electricity as its legitimate cause, through electric vacuums, including the phenomena of the Compass by the same agent.

IV.—MOTION OF THE PLANETS,
By one simple original impulse, assuming a curvilinear direction round their respective centres, by local and universal repulsion in opposition, from the electric atmospheres of their centres and universal space; thus neutralizing their orbits, relative to resistance.

V.—SEASONS,
By the alternate inclination of the poles of the Earth, to and from the Sun, thus vibrating by the expansion and contraction of their atmospheres.

VI.—SATURN'S RINGS,
As lunar reflectors for the polar regions of that planet.

VII.—CLIMATE,
Distance of the remotest planets from the sun, as regards climate, is equalized by the increase of surface of those planets, which receive a greater proportion of light and heat, and thus maintains the same temperature with nearer planets.

By Thomas Jefferson Eddy,
Copy Right secured according to Law.

The above work will be published at Waterford, Saratoga county, N. Y., as soon as sufficient number of Subscribers are obtained to warrant its publication, and contains from 225 to 250 pages duodecimo, medium size, on engravings, and wood paper, accompanied by two engravings, illustrating the power of prestriction (erroneously styled attraction), and universal motion. The former will be represented by a column of the electric element, resting upon a mass of matter (which I style an "electric vacuum") thereby causing it to gravitate towards its centre, which is one common vacuum in the electric element; also, including in the same engraving, a representation of the power and agent of the magnet.

The latter (universal motion) will be represented by a drawing of the solar system with the planets surrounded by the electric element with a division of its pressure into local and universal repulsion, by which each planet is caused, from philosophical principles, by one simple and primary impetus.

As the above systems are entirely original, the author feels himself justified in presenting them to an enlightened community, respectfully soliciting their patronage to a work that comprises all the causes for many of the natural phenomena, that have been looked upon by the reach of human ken to be fiction, and that have slumbered in the cradle of Nature's arcana, from the commencement of time.

The author flatters himself that many causes of the striking phenomena which have been deemed past finding out, will be satisfactorily explained and developed. The price of the above work, bound in sheep, will be 6s. 8d.; in calf, 7s. 6d.; Halifax currency, exclusive of the duties.

WATERFORD, Saratoga Co.,
N. Y. Feb. 28, 1835.

*NOTE.—The following definition the author has attached to his original term "prestriction"—This natural power that causes bodies to approach each other, without any searic pressure. From the nature of the real principle (prestriction) and the apparent one (traction) causing the mutual approach of bodies or substances, without any visible cause, he has established the term "prestriction." The verb prestriction seemingly carries a contradiction, (prestriction) as the real and apparent cause producing gravity involves a contradiction. Therefore, the author thinks that prestriction is the most appropriate term to represent the principle of gravity. The above work, as far as it involves electricity, will be endorsed (through edition) by the spirit of the philosophy of Franklin, relative to his electrical experiments, to establish the principles; but the applications, however, are entirely original.

Garden Island Retreat.

W. J. ELLSWORTH being retired from these premises, begs leave to inform the Ladies and Gentlemen of Kingston, that he has appropriated part of the house for

PUBLIC ACCOMMODATION.

The natural advantages of the situation for Parties out fishing, or merely enjoying the air, are proverbial; in addition to which there are now a Wharf and Harbour at which the largest vessel navigating Lake Ontario might move in safety.

Although the fare kept at this solitary situation cannot, as yet, be equal in variety to what is found in the city, the advertiser trusts that few who call there shall be disappointed, and that his improvements shall keep pace with the increase of patronage.

PROSPECTUS.
MONEY IS POWER.

UNDER this title the Subscriber proposes to publish a book on the **BANKING** proposed to the intelligent and reflecting portion of the community, which shall convey to the Canadian Public, in a condensed form, every necessary information on this deservedly engaging subject. As the Author is, and has ever been, a steadfast friend of Banking institutions, it will be with him a principal object, in as far as in him lies, to impart to his readers, just ideas of their importance to the prosperity of Commercial and Agricultural communities, that in considering controversial discussions, the enquiring mind may become prepared to separate the wheat from the chaff,—the gold from the dross.

To this end it is his intention to notice some of the most popular works deprecatory of Banking, which by their ingenuity and plausibility have injuriously prejudiced the unreflecting against a Paper Currency. Among these we reckon, prominent for mischief, Cobbett's "Paper against Gold" and Gouge on Banking.

Perhaps no section of the civilized world presents to the public powers of an abundant and sound Paper Currency a more expanded and unobstructed field for the display of their mighty energies, than these fertile appendages of the British Crown,—where Ceres and Pomona are destined to perpetuate their genial reign,—where the bowels equally with the surface of the earth team with embryo riches and where the abundant waters present numerous channels to the enterprise of commerce to convey their treasures inexhaustible to every foreign clime.

Encouraging however as are indisputably the natural advantages of these regions to the industry of man, they can serve for nothing but as a reproach to his sagacity if he seek not for the aid essential to render his labors effectively productive and practically beneficial.

That such aid is alone to be found in an abundant currency, will be made clear by practical illustrations from the highest authorities; and it will be an especial object of this work so to explain the present position of commerce in relation to the precious metals, as fully to demonstrate that the advancement of the Canadas to the state of opulence for which they seem to have been destined by Providence, can only be effected through the instrumentality of an abundant Paper Currency.

The book will be 8vo. demy, and will contain at least 500 pages of close print, in excellent clear type, on fine paper, and will be delivered in linen bindings. As it will be attended with certain and great expense, a certain sale, and pay in advance, are indispensable.

The expense of 500 copies has been carefully calculated, and seven shillings and six pence has been found to be the lowest price at which it can be sold, reckoning nothing for the Author's labour of compilation and original composition; for which if he ultimately obtain any pecuniary recompense, it can only arise from an excess of sale beyond his subscription list.

As every exertion will be used to render the work both entertaining and instructive, and most especially plain to every capacity, the Author, with a zealous mind intent upon the public good, indulges the hope that the community at large will, by their ready patronage, expedite the completion of a work upon which the solicitations of partial friends have induced him to enter.

Contemporary Editors in both provinces publishing this Prospectus four times, shall have a copy of the work.

PROSPECTUS OF A WEEKLY NEWSPAPER,
TO BE ISSUED AT MONTREAL.
The first number to appear on Saturday, the 17th October next;
AND TO BE ENTITLED **THE TRUE BRITON**
AND MONTREAL CONSTITUTIONAL ADVOCATE.

"For God, the King, and the People."

When we take into consideration the number of Newspapers published within this City, and throughout this, and the Sister Provinces, little ground, we confess, appears to be left for our present undertaking. Yet the increased emigration to our shores, and the increased and increasing population of Montreal and the country at large, seem in some degree, to warrant the present essay, and to call forth the exertions of our humble abilities to the arduous duties of the press.

Although we do not flatter ourselves that we shall be able to compete with many of our "Brethren," in exhibiting to the Merchant, the details he requires to conduct his speculations to a successful issue, or to guide him in those he may project, yet we feel confident that the General Reader, the Agriculturalist, the Mechanic, and those who may neither possess the inclination, nor afford the time, to peruse daily Newspapers, our columns will be found productive of several advantages, and will prove sources of usefulness and amusement.

In Politics, as the title we have selected sufficiently indicates, we are Constitutionalists.

Some travelling and observation have wrought in us the conviction that under the British Constitution, those inestimable ingredients in our happiness, "Civil and Religious Liberty," are now here better secured and enjoyed than in Great Britain and her Colonies; and under this conviction, we shall sedulously endeavour to maintain their permanency within this and the sister Provinces. But in making this confession of our political faith we wish to be perfectly understood; and pledge our reputation and honor that public abuses of any, and every kind, shall have our unqualified reprobation.

In Religion we are Episcopalian. Attached by principle and habit to doctrines of the Established Church of England, and to the decent propriety of its Rites, we shall zealously, yet temperately support
