ROBERT BARCLAY. Kingston, 21st May, 1836.

REPORTS having been spread, that the CANADA INLAND FORWARDING AND INSURANCE COMPANY are about giving up the business, they beg leave to as-sure their Customers, and the Public general-N order to promote the public health, and to guard against infectious Diseases, the Members of the Board of Health for the Town they are determined to prosecute it with greater vigour than ever.

The Canada Inland Forwarding and Insurance Company have had no object in view, from their first establishment, but to secure to the public moderate rates of Freights between Montreal and the Upper Province. They started with a view to check, if not dissolve, a most powerful monopoly, and they have not now, nor ever had any project in view, such as compensating present losses by future extravagant charges. No, their only aim has been to save themselves from actual loss, and at the same time be the means of increasing and facilitating the intercourse between the two Provinces. Obtaining this, their highest wishes will be realized. And on these grounds alone do they call for, and rely upon the firm support of the Merchants and Traders of these Colonies, whose interests are closely identified with those of this Company.

For the Committee of Management, ADAM FERRIE,

PROSPECTUS OF A WORK ENTITLED KEY

original, viz: I .- EBB AND FLOW OF THE TIDES, Caused by contraction and expansion, thro' cold and heat, from the alternate absence and presence of the Sun.

TO THE PRINCIPLES OF NATURE.

COMPRISING the following systems a

acting upon all matter as electric vacuums, which I term Presstraction. III .- MAGNETISM, By electricity as its legitimate cause, through electric vacuums, including the phenomena of

II.-GRAVITY,

By a head pressure of the electric element,

the Compass by the same agent. IV .- MOTION OF THE PLANETS, By one simple original impulse, assuming a curvilinear direction round their respective centres, by local and universal repulsion in opposition, from the electric atmospheres of their

centres and universal space; thus neutralizing their orbits, relative to resistance. V .- SEASONS, By the alternate inclination of the poles of the Earth, to and from the Sun, thus vibrating by the expansion and contraction of their at-

mospheres. VI. - SATURN'S RINGS, As lunar reflectors for the polar regions of that planet.

VII .- CLIMATE, Distance of the remotest planets from the sun, as regards climate, is equalized by the increase of surface of those planets, which retains a greater proportion of light and heat, and thus maintains the same temperature with nearer planets.

By Thomas Jefferson Eddy. Copy Right secured according to Law.

The above work will be published at Waterford, Saratoga county, N. Y., as soon as sufficient number of Subscribers are obtained to warrant its publication, and contain from 225 to 250 pages duodecimo, medium size, on BETWEEN Kingston and Belleville, a fair type and good paper, accompanied by two Calf Skin POCKET BOOK, with four engravings, illustrating the power of pressgravitate towards the centre of the earth. which is one common vacuum in the electric 78z. element; also including in the same engraving, a representation of the power and agent-

The latter (universal motion,) will be rep-

As the above systems are entirely original, ural phenomena, that have been loc by the whole school of philosophers a week the reach of human ken to fathom. as a the 64 have slumbered in the cradle of Na cana, from the commencement of ties

The author flatters himself that ses of the striking phenomena which all deemed past finding out, will be saexplained and developed. the above work, bound in sheep, will the in calf, gilt, 7s. 6d., Halifar totten sy sive of the duties.
