had run out the lines of Scriba's patent. The had run out the lines of Scriba's patent. The prosecution of the survey for the Oswego re-

ports surrendered by the treaty of '96. Scriba's patent, the most of which lies between Oneida lake and Lake Ontario, and through which two thirds of the road must piess, was subsequently surveyed by Judge Wright for the proprietors and subdivided into townships and lots. He by this means acquired an accurate knowledge of the whole face of the country. As to that part of the country thro' which the road will pass in Oneida county-

he bas surveyed and levelled every inch of it. Judge Wright, therefore, can speak on the subject with as much authority as if he had made an actual reconnoisance for the subject in view. The rate at which be estimates the cost of the road will strike strangers as exceedingly low, but it is about the same at which we have beard it estimated by competent udges, familiar with railroad constructions for several years past.

Oswego, August 8, 1836.

GENTLEMEN. I have the honor to acknowledge the receipt of your favor of the 6th inst. requesting me to give my opinion of the practicability and feasibility of the proposed railroad from Oswego to Utica-and also whether there is more than one good route, and some general references as to the elevation to be overcome,

and the probable cost of such a work. It is well known to many, and perhaps to some of you, gentlemen, that I have surveyed, first into townships, and then into lots for farms, nearly all the country on any route the road will probably take, from Oswego for near-Bome to Utica is as well known to me as per- H. Baldwin, haps any man now living. These surveys | W. Spencer, have been made within the last 43 years, and Benjamin Walton, about 18 years of age, for Rape, sentence of chiefly by myself personally. I have a perfect James R. Shaw, DEATH pronounced-to be executed on the knowledge of the formation and adaptation of B. Dougall,

the ground for such a work as a railroad. There are two and perhaps three very feasible routes for the greater part of the distance, where the ground is favorable, and the grades may be cheaply formed so as in no part to exceed thirty to thirty-five feet per mile. To speak in round numbers, the city of Utica may be said to be elevated 170 feet above Oswego. The summit to be passed over in going north of the Oneida Lake, may be set down on one route as 100 to 150 feet above Utica, and distant therefrom 40 to 50 miles; on another route the elevation would not be so much, probably 75 to 80 feet. This summit may be gained by grades as easy as I have before mentioned, and perhaps less than I have named, is very gradual, and to a traveller hardly perceptible.

On the subject of cost of construction, I can only give general impressions, and epinions from my knowledge of the country, and the facilities with which timber for the wad may be obtained along the route. I think, therefore, that a road may be graded for two tracks | THE PROPERTY OF COLONEL MITCHELL, R. A. and bridges erected, (of which there are no expensive ones on the route,) and the common wooden superstructure, with the flat bar for one track laid for an average of 8 to 9 thousand dollars per mile.

Whenever the Board of Directors shall be organized, I shall be happy to give them, or their engineer, my views of the route, or routes more in detail, no as to enable the thinginger to

seek out the favorable grounds. Wishing you gentlemen, success in this very mportant work,

I have the honor to be, Very respectfully, Your obed't serv't.
