CORONER'S INCLESES.

the Uniday last an Inquest was held on the body of John Ellmont, what was found lying that in the and by some man going to their work. The decrease of left the house of theorem. Martin, Taxon Keeper and left the house of theorem Martin, Taxon Keeper and left the main building, thinking, that when discovered left the main building thinking the main building thinking the main building the main building the main building the main beautiful that will be made the main building the main build in Barrifield, the night before between 9 and 10 o'clock, for the purpose of going to his locarding home situated in the quarry I the night being very dark, there is no doubt but that he missed his way of fell over the north of that the missed his way. and fell over the bank into the quarry, a height of about 9 feet, the decraved in his fall received a secrecut on the back of the bend .-- Verdict " Accidental Drath."

The deceased was by trade a stone cutter and has a wife and family residing in or near Greenock, Scotland.

On Monday last on Inquest was held on the body of Isabella Henderson alias Vere, one of those unfortunate females, of Turonto Corporation Expor-tation, who died the evening before in the stable of Notwithstanding the noble exertion of the inhabits Francis McKinney. Carter in this Town. The deceased had been lying in an open shed at the end finally conquered—the building was destroyed. of the stable for several days. On Sunday evening The sheds and outhouses in the rear, were saved by McKinney found her lying there much exhausted from exposure to the inclemency of the weather, being at the time almost in a state of audity, and had her removed into his stable for shelter among some store in the prisoners' cell. straw, on going out between 9 and 10 o'clock to see how she was, found her dying.

How long is our town to be under the imputation of allowing the unfortunate of our fellow creatures to perish in its very streets.-We say how long shall this stigms remain? This is the sirth case of the Lind during the short period of twelve months.

The Weather since our last publication has been singularly mild for the season. Yesterday was warm and rainy, and this morning it is more like April weather than what we usually have in the middle of December. Though the navigation of the Lake may be said to be closed for the season, still an occasional schooner may be seen moving on the face of the

DEAR SIR,-Having been present at the Town Hall this day, when a resolution was proposed that instead of illuminations, feastings, balls, dinners, Sec. Sec., a renn should be raised by subscription MORROW, BY AUCTION, at the Subscription in this town, for the relief and support of the poor and destitute inhabitants—to be appropriately called chasers.

"THE PRINCE OF WALLS' FUND." And altho" the inhabitants seemed determined to resort to the more usual mode of demonstrating their feelings upon such occasions---yet the final success of the runtion in behalf of the poor and destitute gave me the preatest pleasure. The alocity and readings with which gentlemen subscribed their manes, for large sums, for that laudable purpose, considertly proces that the spirit of classity and philanthropy, as well as love and attachment to their Queen, reign in the breasts of the inhabitants of Kingston.

On making coquiry I find that there are no legal

provisions for the poor in any part of this Province, at which I am much surprised, as I do not think afficzed that there is not much use for such, in a land where the accessaries of life are so easily obtained. Nevertheless we find in our daily walk, many who are really in the atmost distress, and from circumstances altogether beyond their con

From the very respectable commencement to the subscription list, there is little doubt that a large fund will be raised, but in order to bring the matter more fully before the public, I would suggest that the reveral Clorgemen of the Town do raise in their respective churches, a collection in behalf of "The inst., in commemoration of the ausp PHINCE OF WALES' FUND", and I hope as many event of the Birth of the PRINCE OF as may see this, will enquire into the merits of WALES. the scheme, and art weardingly.

Your obliged and ob't Serv't,

Kingston, 13th December, 1841.

For the Chronicle & Gazette. MR. EDITOR,—From the first part of the reply of your correspondent "A lover of Science" to "Common Sense," I expected that he would have shown as much ability in expounding his query, as be would fain have us to believe be displayed in overmatching the Scutchman, but I am at a loss to eosecies what he has advanced to show that the quantity of water falling over the Falls of Niagara would be increased, even though the height of the Cataract was 250 instead of 150 feet. Your cor-distance" has on their rapidity more than distance itself. If water is to be considered a heavy body, it must fall with an increasing velocity, as other heavy bodies do, which is 16 1-12 feet the first second of time of descent; and the descent or distance passed through in any number of seconds may be found by multiplying the square of the time in seconds by 16 1-12. Now let your correspondent "A lover of Science," raise the Lake 100 feet, or if be pleases, he may deepen the Ningara river; he will then, in either case, have a fall of 250 feet, Would this alteration in the height of the fall after the law of falling bodies? Would not the water fall with the same rapidity for the first 150 feet of descent as it formerly did, even according to his own " well-known principle; " and so fall with a great-er rapidity after it had descended 150 feet,-but in the same ratio would the columns of water dimi-nish, so that the same quantity of water would full to the Niagara River as is precipitated from the Lake in the same instance of time. Suppose in a stream of water there were two mill sites at any That he has commenced business as a MER. distance from each other, and that one of the mills had a fall of water of 8 feet, and the other 16, and suppose also that the water, after propelling the first wheel, was convexed in the same channel to the wheel that had 16 feet of a fall, which of the wheels in this case would have most water? According to my opinion, the wheel that had 16 feet of a fail, would have as much more water than the other as the difference betwixt 6 and half a duzen, and as "Common Sense " said, I believe, that the differonce between the "weight of us A-alive and the same A-dead would be equal to the differ-ence of the quantity of water falling over the Falls

of Niagara, whether they remain as they are or be raised 100 feet. ANOTHER SCOTSMAN.

From the New Brunswicker of Dec. 2d. DARING AND UNPARALLELED ATTEMPT TO DESTROY THE CITY OF ST. JOHN

BY FIRE. We have just escaped one of the deepest laid and most extended conspiracies for the destruction of a whole city, that was ever conceived by the midnight incendiary. Between 7 and 8 o'clock on Yuerday evening, an alarm of fire was sounded which was found to proceed from the Lower Core; in this direction a number of persons directed their steps, but the fire was got under before doing any material damage. It originated in an out-house in the rear of Mr. Frith's dwelling. From the facts gathered on the spot it appears that no fire was kept building, and that it was almost suppossible for any person to gain admittance without being perceived. While we were resulving this circumstance, a report was circulated that Trinity Church had been set on fire, which proved too true, for on approaching th sport, we learned that the torch of the sicendiary had been applied to this sacred edifier, which the halfburnt curtain, and the searched wood-work, plainly indicated. Singular as it may appear, one of the windows near the end of the building had been forced, and some combustible materials placed in-side. But the timely discovery of the fire frustrated the designs of the miscreants who applied the torch

Scarcely had the fire been extenguished in the Church, before another aluma was given, and the citizens not knowing when or nhere these fiendish at tempts were to terminate, hurried with the greatest proviperators to the series of new alarms; -the third place which had been varied by the wretcher, proved to be the Mechanic's Institute, and when we approached the building, a column of smoke was issuing from different posts of it, and serious fears were extertained for the rafety of the stately edition. A fen of out most active entirete, who were car-ly on the spot, acted with the greatest promptitude and precision; a line was formed to a nell near by, which gave a supply of mater sufficient to keep the the from spreading, and the Engines were brought ante operation, which with a supply of water from

the Plug of the Company's Works at King-stree being done to the building. In order to make the work of destruction sure, the incendiaries entered

COURT HOUSE AND GAGE DESTROYED BY FIRE.

On Wednesday morning last, about 10 o'clock, the town was alarmed by the cry of Fire! this public building having been discovered to be in flames. The inhabitants with the Fire Engine were in a few minutes on the spot. Every exertion was made to save the building, which at one time gave hopes of its being accomplished, by the operations of the Engine; but the flames reged imperceptibly between the lathing and plaster of the building, and it was not untill the roof burst into flames, that it was believed they had made such rapid progress.

How the fire originated, we have not correctly ascer-tained; nor do we believe is it well known by any one. We have heard it said, that it took from

Every thing of consequence had been removed from the offices of the Treasurer of the District, the Clerk of the Peace and Crown, which were held in one end of the building, before the fire communicates from extreme want and exposure to the inclemency with that part of it.

We understand the Court House and Gaol, cost

> this calamity is the fact, that a public meeting had been called, and was to have been held in the Court House, at 12 o'clock of same day on which it was burst, for the purpose of forming a Fire Company, and making other arrangements to protect the town and vicinity from the ravages of fire.—[Perth Cour.

Kingston, Nov. 13, 1841.

nished at 6s. per dozen.

CALEDONIA WATER. THE Subscriber has made arrangements, by which the Public may be furnished with the above, at a reduced price. Its valuable properties have been very extensively tested by the numerous visitors at the Springs, many of whom have testified in the most grateful manner, their sense of benefit derived from a use of the Water. The analysis by Dr. Chilton places he vond a doubt, its value in various Chronic Discuses. A very frequent cause of failure, is discontinuing the use of a remedy; this, so far as regards the Calculonia Spring Water, will it is hoped, be abated by the reduction in price. Ballots.

Grand Capitals, SD,000, S10,000, S5,000, of one dozen, 8s. 9d.; without the Box 8s
