I have written these brief remarks with the view that they may elicit enquiry and investigation—which effect I trust they may have, and that we may soon have a plan of Education upon a permanent and beneficial basis.

BACKWOODSMAN.

May, 1812.

To the Editor of the Recorder.

Mr. Editor.—My attention has been called to an article that appeared in the Statesman published at Kingston on the 4th inst., in which the Editor in giving what he calls "Memoirs of the Rebels in Canada, in 1837 and '38," has thought proper to introduce my name. If I understand the article correctly the writer asserts that I with Mr. Samuel C. Frey, (who he says "has since abandoned to the United States and a reward offered for him"), "are the leaders of a Political Society" which established itself at this place, and "which was formed at this place, and which is now in existence." I have no doubt that that other Society formed in this District to which he refers was a branch of the "Alliance Society," and that there were in some manner connected with the outbreak of '37 and '38.

As I have neither time nor inclination to enter into a newspaper controversy, I merely state that I never was Joint Secretary of any Society with Mr. Samuel C. Frey, at this or any other place, and as far as my memory extends there never was a branch of the Alliance Society formed in this District.

With regard to the Political Society in the town, being in any way connected with the difficulties in 1837-'38, the circumstances of that Society never having met after June or July, 1836, I should think it would be quite conclusive; and I believe most if not all of the other Societies to which the writer of the article refers, are to be had, but it is to be observed that the name of the author is not given.

The Statesman gives at this place, as far as I can see, the character of the writer, and his connection with the political society, and I have no doubt that he is a member of it.

Had the Statesman given at this place, as far as I can see, the character of the writer, and his connection with the political society, and I have no doubt that he is a member of it.

I remain yours &c,

WM. B. RICHARDS.

Brockville, May 10th, 1812.

Yours very respectfully,

Z.

Kingston, May 14th, 1812.

For the Chronicle & Gazette.

MR. EDITOR,

We are informed on the authority of a letter, just received from Mr. Kirby, by the Engineer in charge of the new works on the Welland canal, that in consequence of advice received from England, by the steamer Caledonia, "the Government House, Kingston, of a full guarantee of abundant means from the home Government, preparations are to be made, for the immediate commencement of the enlarged stone locks, on the works—six of which, near the mountain ridge, a guard lock at the junction, and a ship lock, of 180' feet width in the chambers, at Port Maitland, (Road Creek,) will shortly be completed under contract, to be finished with all reasonable despatch."—S.

Catharine's Journal.

We are requested to state that the Belleville Races will take place on the 15th and 16th June; and have every reason to believe that the sport will be good.

We beg to draw your attention, and particularly of persons intending to build, to the advertisement of Mr. Dwyer, Architect.

I. STANT.

The Boundary Question and the Special Mission.

—The Midwinter Conference contains a letter from Mr. Webster to the Governors of Massachusetts and Maine, in relation to the Boundary Question. He says that "the subject of the abolition of the slave, shall be a legal tender to any amount, if not wanting more than two grains of the weight assigned to it; provided that in paying any sum above £50, the payer or receiver may insist on the said British or United States Gold by weight, at the rate of 9s. 1d. currency per ounce, Troy."

Gold Coin of France of forty francs, and its multiples, may be weighed in bulk, and be a legal tender at the rate of 9s. 1d. currency per ounce, Troy, when offered in sums not less than £50 currency.

Gold Coin of La Plata and Columbia, weighed as aforesaid, shall be a legal tender at the rate of 8s. 1d. currency per ounce, Troy, when offered in sums not less than £50 currency.

The Dollar of Spain, United States, Peru, Chile, Central America, and Mexico, respectively.

The Half Dollar of do.

The Quarter Dollar of do.

The Eighth of do.

The Sixteenth of do.

The French Five Franc Silver piece.

The British Crown.

The British Half Crown £0 3 0

The British Shilling 0 1 2 2 5

The British Sixpence 0 0 7 3 0

0 0 7 3 0

LAWRENCE.—Yesterday morning, between 5 and 6 o'clock, Mr. J. N. Arnold, launched from the ship yard, St. Roch, a new steam-boat, and substantial built ship of 350 tons new measurement, for G. H. Black Esquire, of this city. She was called Letitia Hegi, and glided into her native element in first rate style. "Ah!" said he, "I advertise. My neighbours have all splendid signs, but they never bring as many customers as mine. Any one in the whole country may see my sign board. It is the printer, and not the painter that has made my wealth."

To obtain different Flowers from the same tree.—Split a small twig of elder bush lengthways, and having scraped out the pithfull bush of the compartments with seeds of flowers of different sorts, but which blossom about the same time; surround them with mould; and then tying together the two halves of the twig, plant the whole in a pot filled with earth well prepared. The stems of the different sorts will only one stem blossoming out branch & covered with flowers analogous to the seed which produced them.

—

What can the matter be?—The Cincinnati Gazette says that the supreme Court in that city granted a writ of habeas corpus in a single day! "In several other cases bills will be dismissed; a number were continued, and a man number remain on the docket for hearing." In 11 of the 14 cases where relief was sought by the disengaged shears, shame on the cruel husband.

—

The money paid for advertising, should never be the least difficulty to a man who has any thing to gain. It should be to him as a mere drop from the ocean. A painter once asked a very wealthy merchant why he had not a better sign.—"Ah!" said he, "I advertise. My neighbours have all splendid signs, but they never bring as many customers as mine. Any one in the whole country may see my sign board. It is the printer, and not the painter that has made my wealth."

To obtain different Flowers from the same tree.—

Split a small twig of elder bush lengthways,

and having scraped out the pithfull bush of the compartments with seeds of flowers of different sorts, but

which blossom about the same time; surround them with mould; and then tying together the two halves of the twig, plant the whole in a pot filled with earth well prepared. The stems of the different sorts will only one stem blossoming out branch & covered with flowers analogous to the seed which produced them.

—

An impudent fellow, Saturday, at the Card, in the body of Elizabeth Hall, and appropriate woman, with two assistants, had been committed for a libel on a day school master. She was in a married state when committed. Her trial, said for the 1st Inst. at Philadelphia.

—

In the packet ship Cambridge, sailed from New York for Liverpool, Captain George Hall, late Army lady and servant, Rev. John Vaughan, lady of two children, Rev. C. Wiggin, and Samuel Griswold Muller, Esquire, to be Assistant Superintendents of Education, for Western and Eastern Canada, respectively.

—

Such as would be considered worth the time and attention of a properly qualified individual, and should be paid quarterly.

I say this, as persons in that calling are rarely men of fortune, and in most cases strangers. Yet it must be confessed that it is desirable to have a teacher constantly in one particular place, as both changes and transient schools retard the progress of the pupil. Now, as to commissioners, they are not at all required, as they are at present instituted. I should say that there shall be appointed Superintendents, whose business it shall be to inspect the Schools periodically, or frequently, as it may seem best, these Superintendents to examine the children and report upon the condition of the school and progress of the children—he also to have it in his power to award prizes for merit, in books, to be purchased by the Board. A District would be sufficient for the supervision of one of these Superintendents, and he should be a person every way qualified, as a great deal of the efficient working of the system will depend upon him; and as the people will have the privilege of making to him any charges they may have to make against the Teacher, to be laid by the Superintendent before the board, it will supersede the necessity of having Commissioners in the immediate vicinity of the school. As to School Houses, the building of these should be left entirely to the people themselves. Fifty pounds is too great a sum for the building of a school house. The surplus might be laid out to greater advantage in some other way. The localities should depend upon applications made to the superintendent by the people of a neighbourhood that requires a school. The application must be made to the superintendent, for if it were to the board, it might occasion a great deal of unnecessary delay. As the localities should be circumscribed, the superintendent cannot err.

I have written these brief remarks with the view that they may elicit enquiry and investigation—which effect I trust they may have, and that we may soon have a plan of Education upon a permanent and beneficial basis.

JOS. S. TOWNE, Secy.
