J. WINER'S
COMPOUND BYRUP OF HOREHOUND AND
ELECAMPANE,
FOR the speedy of effectual cure of Caughs, Codds,
Asthma, Spitting of blood, Whooping Cough, Croup
or Hives, Consumption, Plurisy, Hosseeness, Pains and
Soreness of the breast and lungs. Bronchitis, a disease
that is sweeping hundreds to a premature grave, under
the fletitious name of consumption, can be cured by this
medicine. The usual symptoms of this disease (Bronchitis) are cough, soreness of the lungs or threat, hoarseness, difficulty of breathing, asthma, bectic fever, a
spitting up of phiegm or matter, and sometimes blood.
It is nothing more than an inflamation of the fine skin
which line the inside of the whole of the wind tubes or
air vessels which run thro' overy part of the lungs.

The peculiar virtues of this compound have for a long
time attracted the attention of the medical profession;
and a lively interest has recently been directed to the
development of their active powers and pulmonaric
qualities, which the proprietor is now able to gratify,
and presents this medicine to the public with full confidence of its beingthe most asfe and valuable remedy
ever discovered and adapted to all diseases of the lungs,
when any of the functions do not perform their natural
or healthy action.

It is no versally believed that God in his previdence

when any of the functions do not persons their material or healthy action.

It is universally believed that God in his providence has not afflicted his children with pain and disease, without at the same time giving them something in the garden of nature that will not only mitigate, but in many cases entirely relieve them. With these views strongly impressed on our minds, every one should feel a great desire to investigate to the utmost of his power, the great arens of nature, and to draw from that source that instruction which the wisdom of man has failed to

attain.

In presenting this article to the public, the proprietor was influenced by the hope that a medicine prepared with much care and strict regard to the chemical properties of its several ingredients, should take the place of thousands of irrusponsible mostrums of the day with which the country is deluged.

The use of one bottle of the Syrup will be sufficient to convince the mast accretical of its henceford of the

nivince the most sceptical of its braceloid effects.
Directions accompanying each Loute, with the signaure of the proprietor, without which none are genuine.
