FRANCE.

The session of the Chambers is to open on the 26th of this month. The Duke and Duchess de Nemours were in England, making a visit to Queen Victoria, at Windsor. They proposed remaining until the 27th of November, when they would go to Brussels on a visit to King Leopold. The London that he neglects to inform the Prussia police of the arpapers say they brought an invitation from Louis rival or departure of any lodger. Philippe to Queen Victoria, to visit the former at St. Cloud next Summer, and that, if the invitation i

diplomatic representatives, and a great concourse of nobles, dignitaries of the Church, &c. The form of the cath is thus given:-

I shall respect, and cause to be respected, the constirid on the 28th of June, 1837; and that I shall respeet, and cause to be respected, the law, without hav ing any other object than the national welfare.

'If I should do, either wholly or partly, the contrary to what I have sworn, obedience would not be due to me; on the contrary, it would be null and void of effect; so may God assist me, or may I be answera-

From the seat of war there is not much intelligence. Gerona had espitulated to General Prim, the insurgents under Ametler first evacuating the place; they proceeded, however, to Figueras, with their arms and baggage; so General Prim has all his work to do over again. Barcelona still held out, but General Sanz and was preparing for a breach of the walls, and an

nut shelter. The King, upon being informed of the disaster, had immediately despatched one of his aides-de-camp, with 30,000 dollars from his private purse, and promises further relief.

FROM THE EAST.

The overland mail had arrived in due course, bring-There is no news of special interest from China, Sciede, India, or indeed anywhere except from the Punjaub; and the intelligence from this quarter is only a fulfillment of what has been hard expected.

Union Streets. only a fulfilment of what has been long expected. It was foreseen that the death of old Runject Singh

would be the signal for dissensions and struggles among the numerous members of his family, the upshot of which would probably be such an intervention by the Anglo-Indian Government as had already reduced scores of native powers to the condition of succeeded by his san Kurruck Singh, who died sans aton, and Napanee, five Ten Dollar Bills, after, with a rong suspicions of poison. His son then supposed to be of the Commercial Bank, ascended the musnud, but he was killed, as it was M. D. Any person who may have found said, by the fall of a beam, at his father's funeral. — Nhere Singh, who called himself a sen of Runject Singh, then gained pessession of the throne; a prefit- Office, will receive a reward of Ten Dollars. gate, and much addic ed to intemperance; and his paternity, moreover, was disputed.

It now appears that Shere Singh has been assassinated, with his son and all the members of his family, and that Dhyan Singh, his principal minister, has and that Dhyan Singh, his principal minister, has usurped the throne. Of course the Anglo-Indian Government will be appealed to for assistance by the Runjeet family, and probably by Dhyan Singh also; and we can easily understand that the interests of the Anglo-Indian empire will so imperatively require tranquility in a neighboring country as to make it almost indispensable for the government to interfere. The year nature of the British deminion in the fere. The very nature of the British dominion in the East creates the necessity of extension.

From the Bombay Times. EXTENSIVE SYSTEM OF ROBBERY.

eammitted on the transfer of goods from the shipping to the shore, could only be accounted for by some deep laid and widely organized scheme of plunder; and from time to time the rumors were that such an organization did actually exist, to an extent scarcely

to be imagined. Some three years since, a foreign-er, a German we believe, when on his death-bed, confessed with deep remorse that he for some time had been a partner in such a confederacy; but his deposition was too confused and indistinct to lead to any practical beneficial result.

the partners of their guilt. Having been taken before nies, on and after the fifth day of March, Mr. Spens, C. S., their depositions were written down, 1844. during the usual hours of business, and a search warrant immediately granted to examocrtain premises where large quantities of stolen at the several Branch Banks as annot by Circular to the respective parties.

MR. JAMES MORTON, who has long been known in the vicinity of Kingston from the continuous Brewery and Distillery successfully conducted by him for many years on the shore of Lake Ontario, near A. for water for the residence of His Excellency the Governor General,—discovered in the course of last year, in boring rome discovered in the course of last year, in boring rome discovered in the course of last year, in boring rome discovered in the case of particle and the case of particle purposes of his distillery, a Mineral Spring, the efficacy of which, in the cure of various complaints and cr. has been tested by a large portion of the residents in Kingston and by numerous strangers, who for several mont. car officials the the town to the form of regulation of the sector

On excusional the medical former with the same of the same of the same of the same of prepared the restricted green and to pality to the second to the sec extensive and perfect as the public spirited proprietor desired. Imperieut, nowever, as they have been, compared with the luxurious and costly arrangements of the long established and prosperous watering places of Europe and the United States, the baths have proved the source of immense benefit to hundreds who have resorted to them since their erection, from all parts of and and the United States.

With the view of rendering the discovery of this Mineral water, beneficial to a much greater number of invalids than could be provided with accommodation by any reasonable outlay of capital by a single individual, and of making it conduce in an eminent degree to the advantage of the Town of Kingston, Mr. Morton was soficited by several gentlemen interested in the prosperity of the District, to associate himself with them for the purpose of forming a Company to be incorporated by an Act of the Provincial Legislature and empowered to raise a capital adequate to the crection of baths and other accommodations, which from their convenience, comfort, and extent, might rival the splendor and luxury of the baths of the most celebrated watering places in the United States or Europe.

An application has accordingly been made to the Legislature of the Province and a Bill is now in progress through the Provincial Parliament to incorporate a Company to be called "The Kingston Mineral Wells Company," for effecting the above objects, with a capital of £25,000 divided into 1,250 shares of £20 each, with power to raise if necessary a further

There are two wells. The first is near the edge of the Lake, and was constructed last year by boring through a depth of 145 feet to the primitive rock. The other is higher up the bank and at no great distance from the road leading to the residence of the Governor General. The waters of both springs have been analyzed by Professor Williamson of Queen's College, whose high attainments as a Chemist and a Scholar, it is unnecessary here to eulogize. The water of the first Well, the Professor pronounces after a careful and laborious analysis to be of the same class and

the same component parts as those of Cheltenham and Learnington in England. It also resembles Harrowgate in its saline nature and strength but is not impregnated so extensively with common saft. It resombles Airthrey water in Scotland in the quantity of chloride of calcium but it is distinguished from it by the absence in the latter of the sulphate of soda.

The water of the second Well was found by boring, at about 85 feet from the surface. It is much stronger than any other Mineral Water with which Professor Williamson is acquainted. Bromine, as well as Iodine, is present, as was found on passing a stream of chlorine through a large portion of the water concentrated to a small quantity and filtered.

The analysis of the water of both Wells, by Professor Williamson, is subjoined.

The medicinal properties of the water have been investigated and ascertained by numerous Medical Practitioners, what have resorted to the Wells, either as invalids, or for the purpose of making themselves acquainted with the nature of a discovery so interesting and important to their art. But it may be sufficient here to state the substance of the evidence of Dr. Dunlop, given before a Committee of the Legislative Assembly, appointed to inquire into and report upon the Petition of the applicants for the proposed Act of Incorporation, as the service of Dr. Dunlop, as an Army Surgeon, in every part of the world and in every climate and his acquaintance with the most celebrated waters of the Old World intitle him to speak with confidence of the comparative efficacy of this water, whilst the eminent position long enjoyed by him among scientific and literary men, cannot but give such weight to his testimony as to render it unnecessary to extend this Prospectus by the addition of other medical certificates which have been given of the curative properties of the water.

Dr. Dunion's evidence before the Committee was in substance as follows:

"I have examined the Kingston Mineral Waters and personally tried them, though I have not analyzed them; the result is that I consider the water of the Lower Well as more powerful than the Cheltenham waters and containing nearly

the same ingredients, though in greater proportionate quantity, "It has a specific effect on the liver and biliary secretions, and I would therefore recommend its use externally and internally to all persons labouring under chican disorganization of the viscera, from residence in a hot climate or any other

That the undertaking will yield a liberal return upon the capital embarked in it, there can be no question. During the past summer, Mr. Bone, the present lessee of the Wells, was a summerly and almost daily to refuse municipals applications from persons desirous of using the waters, but whose state building in which the baths are erected, whilst no less than seven hundres persons have daily been supplied with water,

The profits accruing from the baths and the waters thus daily dispensed in the Saiconf, would be amply sufficient to defray the expenses of the establishment, and to yield a handsome interest on the sum requisite for its improvement and extension. But the income of the Company would be greatly increased from other sources. The situation of this Well's on the shore of Lake Ontario, commanding extensive views of the surrounding scenery is such as to render it highly attractive to the stranger, and as it is part of the design of the Company to crect a spacious Hotel, and to lay out the grounds about the Wells in the most ornamental manner, and to provide every kind of amusement that is likely to render a sojourn at the Wells agreeable, it may reasonably be anticipated that a very considerable portion of the summer travellers from the United States and Europe, who have hitherto passed down the Lake, and the St. Lawrence to Montreal, without stopping at Kingston, will be tempted to make a visit to "THE KINGSTON MINERAL WELLS" a prominent object of their journey, and thus by adding to the revenues of the Company, insure the means both of paying a handsome dividend and carrying still further the "KIRGSTON

MINERAL WELLS COMPANY'S" proposed improvements. Persons desirous of contributing to the proposed undertaking, and of taking shares in the Company, will find subscription lists in the Office of the Sheriff of the Midland District; also in the Office of CHARLES STUART, Esquire, Barrister at Law; and at the Kingston Mineral Wells Saloon and Baths, near the Government House.

> Journal, during the War of the American Revolution. DARTLETT & WELFORD, Booksellers and Publishers, No. 7, Astor House, New York, propose publishing by subscription, an important Historical Memoir, entitled " A Journal of the operations of the Queen's Rangers, from the lands-ning of the year 1777 to the class of the American War, by Lieut. Colonel Sincoe,

Governor Simcoe's Military

Commander of that Corps." This work is a flarrative of the military services, during the contest of that period, of Colonel Stracos, then an active, chivalrous and daring partison offiname yet lingers in the memories of the octogenarian. On Long Island, in New Jerginis, his corps of Bangers wers stways among the most conspicuous. No there in His Majesty's service left P. more bootsble name behind him, than Col. Simere, and his memory is still held in high respect in those sections of the State of New York,

where he was longest stationed. A short memoir of the Author will accompany the work, together with ten fine military map, illustrating the various enbe printed in the best manner, on fine paper, and will compare with the best London publications in all respects. It will be furnished to Subscribers at \$2,50, (12s. 6d. Currency,) with the duty added, and will be delivered in Kingston during the

month of December, or early in January. A Subscription List will be left at the Chronicle Book Store, and at Messrs. Ramsay, Armour & Co's.
