I shall also be kappy, through you, to publish to all who are afflicted, as I istely was, the account of my unexpected, and even for a long while despaired of cure. Mine is a painful story, and trying and sickening as is the marrative of it, for the sake of many who may be so surely relieved, I will briefly yet accurately state it.

Nineteen years age last April a fit of sickness left me with ne Erysipelas cruption. Dropsical collections immediately took place over the entire surface of my body, causing such an enlargement that it was necessary to add a half yand to the sixe of my deases around the waste. Next followed, upon my limbs, ulcers, painful beyond description. For years, both in summer and waster. Next followed, upon my limbs, ulcers, painful beyond description. For years, both in summer and waster, the only mitigation of thy sumering was found in pouring upon these parts cold water. From my limbs the pain extended over my whole body.—There was interally for me no rest by day or night. Upon lying down these pains would about through my system, and comply me to wrise, and for hours together, wask the house, so that I was almost entirely deprived of sleep. During this time the Erysipelas continued active, and the ulcers enlarged, and so deeply have those eaten, that for two and a half years they have been subject to bleeding. During these almost twenty years I have consulted my discase—as it was attended with an obstinate cough and a steady and active pain on my side—a dropsical connumption; and though they have been skilful practitioners, they were only able to afford my case a pastial and temporary relief. I had many other difficulties too complicated to describe. I have also used many of the medicines that have been subject to afford my day had

It was the old story-the obstructions in the way of the "course of true love." Farmer Bradshaw was of the higher order of English tenantry; and held a beautiful farm belonging to the estate of Lord Broadmeadow. But times grew hard--misfortunes entered the farmer's family-and he was in arrears for a large amount of rent. He began to feel that he should have to abandon the old homestead. One day Lord Broadmeadow, fatigued with hunting, called for refreshments at his house; and Ruth was eummoned to serve him with ale and bread. His lordship seemed so much charmed with his fair attendant, that he detained her in conversation for upwards of an honr; and on his way home could think of nothing but her beautiful face and her graceful

ways. His lordship was a widower, with two or three daughters, and as many sons. He was in politics a tory, and in religion a staunch churchman. He reverenced the opinion of the world, and would not have done an indiscreet or immoral thing for a dukedom-that is, if there was any probability of its being found out. In his steward, Sewall, he had a most congenial and convenient ally; one who agreed with him lying and being in Johnsonville late in the fully in the sentiment that vice was not Ringston, in the Midlan District and Province vice so it was kept veiled from observation. of Canada, being part of dract of land purenas- or wore the vizor of decorum. By the proffered marriage it was made apparent that not only would the farmer's arrears of debt be cancelled; but that his house would be repaired, his grounds improved, and the rent of the whole farm reduced one half. Furthermore, Ruth would have a suite of handsome apartments appropriated to her use at the castle; and be in a position to render

many services to her father and his family. Bradshaw was not, perhaps, a more selfish man than his neighbors; but he could not be blind to the advantages of this arrangement.
