If we take a retrespective view over the past twenty years, how is the mind struck with wonder? What rapid strides has acteure made in every department of civilized his? particularly in that which relates to the knowledge of the human system in health and disease. How valuable and indispensable are the curricular means recently discovered through the agency of chemistry? How does the imagination kindle and our admiration glow at the ingenuity, the near approach to the standard of perfection, of the present time!—Through the elaborate investigations of Physiology, or the velocity of Life, and the Pathology of prevalent discesses, much valuable practical knowledge has been gained. In consequence of becoming acquainted with the organization, the elements of the various tissues and structures of the system, remotics have been sought after and discovered exactly adapted to combine with, neutralize and expeliancebile matter, the cause of discase, and substitute beatthy action in its piece. The brautiful simplicity o this mode of treatment is not only suggested by the pathology of diseases, not only grateful to the sufferer, but perfectly in consonance with the operations of Nature, and satisfactory to the views and reasons of every intelligent, reflecting mind. It is thus that Sanda's Sarraparilla, scientific combination of execution of Nature, and satisfactory to the views and reasons of every intelligent, reflecting mind, it is thus that Sanda's Sarraparilla, scientific combination of execution is habit of those who had long pithed under the most distressing chronic maladies, has given it an exalted character, furnishing as it does evidence of its own intrinsec value, and renomessabile; it of the allifected in terms the afflicted only can know,—it ha

Kineteen years ago inst April a fit of sickness left me with an Erysippelas cruption. Next followed, upon my limbs, oftens, painful beyond description. For years, both is assumed and waster, the only matigation of my suffering was found in pooring upon these parts cold water. From my limbs, the pain extraded over my whole body. There was the pain extraded over my whole body. There was literally for me no rest by day or night.
