It appears that there are in the State 107,181 women above, and 64,-180 under twenty-one years of age; and it is thought that of these fifty thousand wear silks, faces, and woollens, and that the excess of cost for these foreign fabrics, over the charges for calicoes and muslins which are to be used instead, will when paid into HE Subscribers beg to inform their best remedy ever yet discovered for Worms; and Jaundiced Skin, &c. the treasury, preserve the State from all dan- |.

If his family doctor gives him any hope of a cure, it is at the end of a long at the expense of drawing from the arm his life's est styles and descriptions of British Manu blood until, if cured, which is by such means next to impossible, he has not enough of "life left to be worth living far." How important then, that a remedy to check, control, and eradinate fitneumatism and Cour, to strengthen and extend shrivelled and rive from London, Liverpool and the Clyde, knotty coeds and muscles, till nature and health again has away and control. JAYNE'S LIFE PRESERVATIVE. A N ALTERATIVE and DEPURATIVE

The proprietor of the Life Preservative would most respectfully soure the public that he has not offered this prearation to their notice, without due reflection and close and rigid study, for until after twefe years' experience had manifested its great speriority over every other article of the kind, and he now recommends it with confidence fully believing that the above combination of wedicine, will effectually evaduate from the ystem a class of distance. tually eradicate from the ystem a class of diseases, some of which bayeheretofore been considered incurable.

The success he has met with in curing Bronchocele and Cancerous affictions has convinced him, that those dangerous and horrible diseases may be removed with a much certainty as Fever and Ague. He does not wish to be un-derstood as saying that they can be cured as soon as Fever and Ague, hat with as much cer-tainty, and further that he has good reason for believing that this preparation will not only cure those diseases when formed, but that it destroys the virus or poisorous principle lurk-ing in the system from which that peculiar class of diseases as well alo as that of Scrofula
