

Foreign News.

Mr. O'Connell's Speech delivered in London, at the meeting for the Repeal of the Union, Feb. 22nd, 1834.

Mr. O'Connell came forward to the front of the platform, and was greeted by this assembly of Englishmen with an enthusiasm, surpassing if possible, anything I ever witnessed in Ireland.

On Monday evening last, a pitch-barrel was lit on the top of the rock of Cashel, in token of triumph for Mr. Sheil, and immediately after, bonfires were seen blazing on every eminence for several miles round the country.

The whole country surrounding this city, within a circuit of fifty miles probably, was in a blaze on Monday night last, at an early hour.

On Monday evening last, a pitch-barrel was lit on the top of the rock of Cashel, in token of triumph for Mr. Sheil, and immediately after, bonfires were seen blazing on every eminence for several miles round the country.

morning, and were despatched to the different towns by messengers who exhibited copies in their hats, that "those who ran might read." The bonfires were lighted throughout the country at dusk, and in such numbers that five hundred were counted from a single point.

We subjoin extracts from the provincial journals. Mr. Sheil's Victory over Whig Calumny.—We need not announce our joy at the glorious result of Mr. Sheil's cause! No. It is a general jubilee in which every man participates.

Incendiaries Discovers by means of Blood-Hounds.—This old method of tracing the perpetrators of crime was, a short time since, revived in Oxfordshire. The Duke of Marlborough has, in addition to the famous Blenheim spaniel, retained unimpaired the breed of the old English blood-hound.

UPSET OF A TRAVELLING MENAGERIE.—Tiger Feeding.—On Friday evening a travelling Menagerie was proceeding from Ballymahon to Longford; in descending the canal bridge next the former town it was overturned, and rolled into a deep ditch on the road side.

TRAGEDY AT SEA.—A correspondent at Cove announces the arrival of the Martha, Capt. Drummond, laden with mahogany, from Laguna to Liverpool, under circumstances similar to those which took place a few years since on board the Mary Russell.

At an early hour on Monday morning, Mr. Seymour, surgeon at Cove, despatched an express to the mayor, informing him of the particulars, and requiring the attendance of the coroner.

SOMETHING ROMANTIC.—Some years ago, a captain of a corsair carried off the wife of a poor woodman, in the environs of Messina.

DEATH OF JOHN BIDDLES.—This individual has long been known as the rich money-lending shoemaker of Bishopgate street, London.

From the Dublin Evening Register. MR. SHEIL.—Manifestation of Popular Feeling. On Sunday last, immediately after the arrival of the assurances of Mr. Sheil's most triumphant overthrow of the false insinuations against his public character, measures were taken by his friends in Dublin to communicate the news to his constituents as rapidly as possible.

bits of this uncommon character were strongly exhibited in some of his journey by adopting every means in his power of saving a penny.

United States.

From the New York Daily Advertiser, April 19. Exchange.—Foreign.—By the last packet, Bills on London sold at 103 1/4 a 101 premium, and on France at 5,40 a 5,30, which shows a considerable improvement.

Exchange.—Domestic.—As confidence has in a measure been restored, and the Money Market in a degree relieved, Brokers and Banks operate with more freedom, and negotiations are made with greater facility.

Uncurrent Money.—Although four Banks have failed in the District of Columbia, as their paper did not circulate much in this city, it has had no effect on the rate of uncurrent money, which continues at the same discounts it has done for some time past.

Money.—There is a decided relief in the money market, the Banks discount with more freedom, and there having been no failures for some time past confidence is gradually becoming restored.

Specie.—Exchange on England is gradually creeping up, which must, if it continues, stop the importation. But up to the present period, specie is coming from all quarters. The Banks are well stocked, and it is believed the amount on hand is unusually large.

Stocks.—This has been a most lively week in the Stock Market. The result of the election seems to have had a very favourable effect on it, particularly the fancy descriptions, which rose full 6 or 8 per cent, but have again declined.

Remarks.—The result of the election appears to have had a most favorable influence on business generally, as well as on the feelings and disposition of the public.

Flour.—During the early part of the week rose about 12 1/2 cents; but yesterday was rather dull. All descriptions of Western Canal flour are at uniform prices, which is extraordinary.

Wheat.—The export has been 17,312 tierces this season—there is now no demand except for crushing.

Corn.—We are glad to record a rise in corn which has been so long depressed. Since our last we have had a very active week.

HORRIBLE CATASTROPHE.—We learn from Gloucester, that about 10 or 12 days ago, a laboring man of the name of Walker, a widower with four children living in the lower part of a neighbor's a few miles off, previous to which he put the children to bed and locked up the house.

himself in York river, near the margin of which this tragical scene occurred.—Norfolk paper.

THE WANDERING PIPER.—The Wandering Piper is again in this city. His tour to the South was cut short by a protracted and severe fit of sickness in Baltimore.

Since leaving New York, he has given to various charities, \$1065 00. We understand that the Piper intends to visit Princeton, Trenton, Doyleton, Easton, Reading, Lancaster, Harrisburgh, York, &c. After which he will take the towns on the North River, he has not yet visited—spend the summer in the Canadas, and then proceed to New Orleans by the Ohio, and return again to New York via the Southern States.

LESLIE.—This distinguished American artist, with his family, embarked yesterday on his return to Europe, where we believe, it is his purpose to remain. It is little to the credit of our country, that this gentleman should so soon have returned to re-enter upon a foreign residence, and that, too, under such circumstances.

STEAM-BOAT MICHIGAN.—This splendid boat will make her first trip to Buffalo, to-morrow. She will leave the wharf of O. Newberry, at 4 o'clock precisely.

At Maury County, State of Tennessee, died on the 10th Jan. last, Mrs. Betsy Trantam, at the uncommonly advanced age of 151 years. She was born in Germany, and emigrated to the British Colonies in America, at the time the first settlement was made in North Carolina, in the year 1710.

Provincial.

MR. CHISHOLME.—The appointment of Mr. Chisholme as Coroner of the district of Three Rivers in the room of the late Mr. Lafontaine is an ill-adviced appointment.

We were not aware of the state of forwardness that the Trent Bridge was in, until we had the opportunity of visiting the spot. On the first view of the material of which the abutments are composed by far too small—and though regularly laid—but being laid dry, without cement of any kind, it must be liable to serious injury.

are not alone however in our idea, that the spot is badly selected—but all these matters are resolvable into the interest of individuals; and what is palpably improper, is notwithstanding pursued as the climax of practical wisdom & propriety.

UNNATURAL BRUTALITY.—How of our readers can believe that in Montreal dogs are fed on human flesh raw or boiled. Yet such is the fact.—We yesterday received a letter from a gentleman in the employment of one of the principal houses in this city, detailing circumstances too horrible for belief.

Such is our informant's statement—and such is the statement that was yesterday made on oath before the magistrates. The elder Mr. Perrault we believe to be innocent; and his sons cannot be supposed guilty of any thing more heinous than a most wanton outrage of public feeling, and a most degrading disrespect for the dead bodies of their fellow creatures.

The Ottawa steamboats have commenced their regular trips, and it is but justice to the agent, Mr. Cushing, of this city, to notice the comfort and convenience he has ensured to the public in the fitting up of the respective steamboats on the line.

No BAD THING!—Colonel Davies stated in the House of Commons on the 31 March, that the pay and allowance of the Governor of Lower Canada amounts annually to £9,336 stg. Some thing about 41,500 dollars a year. No wonder His Excellency is not in a hurry to go back to Balaah.

QUARANTINE.—A Proclamation appears in the last official Gazette, ordering all vessels arriving in the port of Quebec to perform Quarantine previously at Grosse Isle. The proclamation is to be in force for the next eight months.

On Wednesday last the four members composing the Board of Police for this town met at the Exchange Coffee House for the purpose of appointing a fifth, but not agreeing, a general election of the corporation for that purpose will take place in a few days (notice of which will be given due course.)

A notice from the Surveyor General's office, Toronto, states that locations will be permitted to be made to the extent of 10,000 acres, where that quantity is vacant on each of the following townships, for persons having authority lodged in the Surveyor General's office, upon condition of placing a settler on each grant, within six months of the date of the location; and the said settler having resided on some part of the grant for two years, and having cleared and fenced eight acres for every two hundred acres; twelve acres for every five hundred acres; twenty acres for every eight hundred acres; and twenty four acres for every twelve hundred acres granted; and built a house thereon not less than eighteen feet by twenty, in the clear, will upon satisfactory proof of the same be entitled to their patents.

We were not aware of the state of forwardness that the Trent Bridge was in, until we had the opportunity of visiting the spot. On the first view of the material of which the abutments are composed by far too small—and though regularly laid—but being laid dry, without cement of any kind, it must be liable to serious injury. From accidents, such as masses of ice, or falls of timber, &c. As the plan for us to call the attention of the Commissioners, it is
