FARMERS' JOINT STOCK BANKING COMPANY, 100 Boxes of best Liverpool Soap.

AT TORONTO. Capital £500,000, in 50,000 Shares of £10 each.

The establishment of Joint Stock Banking Companies has been proved by their great success in various purus of the United Kingdom, to be of

Institutions of this description have existed in Scotland for upwards of 100 years, and the experience of their benefits, amply proved before a committee of the House of Commons, induced the Legislature in the year 1926, to pass un act expressly for their encouragement in England. It is now no longer doubted that Banking communics possessing an adequate empital, advanced by an influential and affluent body of proprietors are most admirably calculated to sustain public confidence in times of diffivulty, and to confer extensive advantages upon the Anunos at large. A well conducted company, whose affairs are closely investigated by Board of Directors, and the results half yearly submitted to the proprietore, can never be injured or inconvenienced, in the very worst times, to the same extent that private establishments may be; for the known fact, that they possess a well secured capital, and have ample resources, would

quiet the apprehensions of timid depositors, and prevent the necessity of a endden or ill-timed contraction of legitimate discounts To the proprietary of the proposed concern it can searcely fail to prove of equal advantage, as may be inferred from the success of other companies of a similar character; the high premiums, borne without any known exception, by their shares, afford the best criterion of the extensive utility and the profitable nature of such a joint and mutual system of banking. Many gendemen have long been of opinion, that an eligible opening presents itself for an additional bank in this province, the commerce, trade, population, and wealth of which have of late years been advancing with such a steady progress; and having attentively considered the foreroing facts, they are decidedly of opinion that it should be established upon the principles of a Joint Stock Company, as affording the best guarantee with a purchaser, by applying to the subscriber,

for permanent success. The originators of this institution wish it however to be clearly understood, that in its establishment they are not actuated by any unfriendly feeling towards either of the respectable banks existing in this city, or in this vicinity. The following outline is submitted to the consideration of the public, as the basis of such an establishment, subject to such modifications as the

proprietors may hereafter determine on. At a meeting held at the Agri-cultural Bank in the City of Toronto on the 24th day of April, 1835; Dr. C. Dancombe, M. P. P. in the Chair.

PART I. In compiling this brief sketch of the antiquity of the Gael, I have collerted my nonterials from the most esteemed antiquaries that have discussed the subject. A few prejudiced writers are the only historians who have questioned the high antiquity, learning and early civilization of the Gael, while both Greeks and Romans have left ample testimonics behind them which sufficiently support the pretensions of the Gael. The ignorance of such however, it must be remarked, was owing to their unskillfulness in the language in which the transactions of the nation were annually recorded, or their feigned incredulity must have arisen from national jeabousy against a rival nation. Whilst perambulating through a luby rinth of obscurity and antiquity. I have not referred to oral tradition nor to the uncertain relation of the Bards and Senachies, nor to witnessus interested in maintaining the pretensions of this nation. On the contrary, my witnesses are of the most unimpeachable character: while Greece and Rome, the diligent antiquary Edmund Spenser, the luminous Cam ien, the venerable Bede, and several other authentic historians stand favorable to my position.
