ARMOUR & RAMSAY, Montreal. A. H. ARMOUR & Co., Hamilton. RAMSAY, ARMOUR & Co., Kingston. T. CARY & Co., Quebec. H. & W. ROWSELL, Toronto.

KINGSTON MINERAL WELLS. MR. JAMES MORTON, who has long been known in the vicinity of Kingston from the extensive Brewery and Distillery successfully conducted by him for many years on the shore of Lake Ontario, near Alvington House, the residence of His Excellency the Governor General, has discovered in the course of last year, in boring for water for the purposes of his distillery, a Mineral Spring, the efficacy of which, in the cure of various complaints & chronic diseases, has been tested by a large portion of the residents in Kingston, and by numerous strangers, who for several months past have been attracted to the town by the deserved reputation of this water.

On ascertaining the medicinal properties of the water, Mr. Morton erected baths and prepared other accommodations for the convenience of the public; but the haste in which they were put up rendered it impossible that they should be so extensive and perfect as the public spirited proprietor desired. Imperfect however, as they are, compared with the luxurious and costly arrangements of the long established and prosperous watering places of Europe and the United States, the baths have proved the source of immense benefit to hundreds who have resorted to them since their erection, from all parts of Canada and the United States.

With a view of rendering the discovery of this Mineral water, beneficial to a much greater number of individuals than could be provided with accommodations by any single party, and of making it conform to an eminent degree to the advantage of the Town of Kingston, Mr. Morton was solicited by several gentlemen interested in the prosperity of the District, to associate himself with them for the purpose of forming a Company to be incorporated by an Act of the Provincial Legislature, and empowered to raise a capital adequate to the erection of baths and other accommodations, which in splendor and luxury the most prosperous watering places in the United States.

An application has accordingly been made to the Legislature of the Province and a Bill is now in progress through the Provincial Parliament, for the purpose of incorporating a Company, to be incorporated by an Act of the Provincial Legislature, and empowered to raise a capital adequate to the erection of baths and other accommodations, which in splendor and luxury the most prosperous watering places in the United States.

There are two wells. The first near the edge of the Lake, and constructed last year by boring through a depth of 145 feet to the primitive rock. The other is higher up the bank and at a great distance from the road leading to the residence of the Governor General. The waters of both springs have been analyzed by Professor Williamson of Queen's College, who's high attainments as a Chemist and a Scholar, it is unnecessary here to enlarge.

Wells agreeable, it may reasonably be anticipated that a very considerable portion of the summer travellers from the United States and Europe, who have hitherto passed down the Lake, and the St. Lawrence to Montreal, without stopping at Kingston, will be tempted to make a visit to "THE KINGSTON MINERAL WELLS," a prominent object of their journey, and thus add to the revenues of the Company, and the means both of paying a handsome dividend, and carrying still further the "KINGSTON MINERAL WELLS COMPANY'S" proposed improvements.

Persons desirous of contributing to the proposed undertaking, and of taking shares in the Company, will find subscription lists in the Office of the Sheriff of the Midland District; also in the Office of CHARLES STUART, Esquire, Barrister at Law; and at the KINGSTON MINERAL WELLS SALOON AND BATHS, near the Government House.
