Facts and Scraps, original and select.

☞ The Game Laws. It was considered necessary by several of the Kingston Sportsmen, very recently to hold up to public exposure an officer in Her Majesty's service for an infringement of the Game Laws. It will surprise our readers therefore to learn that on Saturday last, young Woodcocks and young Partridges, were publicly offered for sale in the Kingston Market, the killing of which, or the having in possession at this time of year being a misdemeanor. The law respecting Ducks is a very bad law, and shows how utterly ignorant its framers were of the habits of the birds, for young wood ducks are now thoroughly fit for the gun; but since it is the law, it ought to be obeyed; and the supineness of the town Magistrates is almost criminal.

☞ The American Line of Steamboats.—A very important addition has been made to the comfort and safety of the passengers by this line, by the substitution of the new and fast sailing steamer *Niagara* for the old and worn out *Oneida*. The *Niagara* is one of the finest vessels of her class, built upon the newest and most improved model, under the personal inspection of Capt Vandewater, now of New York, so long and so favorably known as the commander of the celebrated *United States* on the Ontario waters. We are not going to describe the *Niagara*: our readers can see her themselves, once or twice a week, by watching her advents, and a sight of her equipments is well worth the trouble. She is commanded by Capt. Childs, Ling of the *Oneida*, than whom a more obliging gentleman cannot be met with.

☞ The Double Bodied Pig.—This strange animal, a most singular Lusus Naturæ is now in Kingston, at Perkin's Hotel, where it will stay a few days, prior to proceeding to Montreal. For a description of the pig, we refer to the advertisement, the truth of which we most cheerfully endorse. It is in perfect health, and should the proprietor succeed in taking it to England, where any thing wonderful or curious, always takes with the million, he will speedily realize a competency for life. There is no humbug or deception about the critter, for it goes the whole hog—or rather two whole hogs.

☞ Agricultural Society.—The Officers of the various Township Societies can obtain blank Subscription Lists, by applying at the Atheneum Book Store.

☞ A Woman Poisoned.—On Thursday last a sensation was created by the report that a woman, living near the corner of Yonge and Wellington streets, had been poisoned by a girl in her employ named Mary O'Connor. It appears from the statement of the son of the deceased, (a lad eight years old,) that his mother took a dose administered by the girl, from a paper containing something which looked like a white powder. She said when she gave it to the woman, that "it would be the last time she would ever give her anything." The girl then lighted a match, and burned the paper that had contained the poison. The woman died in two hours after, and the girl abruptly left Toronto in the Transit, Thursday morning. An inquest was held at Powers' Inn on the corner of Yonge and Wellington streets, but adjourned until 5 P. M. yesterday. At the time of our going to press we had not learned the verdict. Some think the woman died from intoxication. To meet this, there is the boy's story, coupled with the immediate absence of the girl. The name of the deceased was Griffin.—*Toronto Canadian, July 26.*

☞ The 46th Regiment arrived here yesterday, from Quebec, on board the steamer Canada and passed over to Laprairie in the Prince Albert. We understand that, about two o'clock in the morning, when opposite Nicolet, the Canada fell foul of the St. Ours, which was carrying no lights, and was believed, at first, to be a raft. It is presumed, by those on board the Canada, that something was wrong in the steering gear of the St. Ours, but whatever was the cause, the result was a [illegible] damage, and the St. Ours went down a wreck, fortunately in shoal water. Those on board were got out without loss of life, but we understand a soldier of the 46th Regiment had his hand severely injured.—*Montreal Gazette, July 24.*

☞ The Jury assembled to hold an Inquest on the body of the infant found in the creek, near Champeau Street, on Monday evening, returned a verdict of wilful murder. Sarah Fairservice, the mother of the child was apprehended by Chief Constable Dredge, yesterday afternoon, and committed to Gaol, on the Coroner's warrant, charged with the crime of infanticide.—*Ib.*

☞ We understand that the Honorable R. E. Caron, Mayor of Quebec, has been notified by the Secretary of the Bank of British North America, in London, that a credit has been opened for him at the Branch in this City for Five Thousand Pounds, in anticipation of subscriptions for the relief of the sufferers by the fire of the 28th May. The sum subscribed at the meeting, in London, was but £3000; the thanks of the sufferers are therefore due to this Bank for their generosity in advancing £2000 in anticipation of the funds hereafter to be collected.—*Quebec Mercury.*

☞ The storm of the 21st instant destroyed sixteen houses, &c., at St. Marc, and damaged several others. Several head of cattle were killed by the falling buildings, and the crops and gardens in that neighborhood have suffered considerable damage from the hail-storm. The neighborhood of St. Charles also suffered injury from the storm. It is reported that a person named Dumouchel was struck dead by lightning at St Laurent; also a young woman at the Baie du Febvre. Two horses were killed at Sherrington, the person driving them escaped without injury.—*Mont. Herald*

☞ We learn that Sir George Simpson arrived at Lachine on the 23rd instant, from the interior of Hudson's Bay—and through that gentleman we are informed, that the United States citizens, who had emigrated to Oregon, were dissatisfied with the character of the country, and that, of 5000 who had arrived there from time to time up to the month of March last, 1000 had proceeded to California.—*Montreal Herald, July 25.*

☞ Conviction and Sentence of Green, at Troy.—Green, the wretch who poisoned his wife under circumstances that greatly aggravated the enormity of his guilt, has been sentenced to be hanged on the 10th of September next. The address of Judge Parker to the convict, is an admirable one of its kind; it breathes the spirit of inflexible justice, without any of the mawkish and false compassion for villany that we often see an indulgence in from the bench. The jury did their duty honestly; they did well and truly try the prisoner, and pronounced him guilty; and he now awaits the fate that will surely be his at the approaching time. We wish we had such judges and juries as sat on this case, in New York; there would not be so many motions for new trials, nor murderers and murdresses escaping as there are now, nor so many occasions of fanatical triumph for the anti-hangman party, whose exultations know no bound when a felon escapes the gallows.—*New York Herald.*

The Fires of 1845.—We do not remember ever to have heard of so many great fires in any one short period of time, as have happened on this continent in the first six months of 1845. We annex a list of the losses experienced, in the order in which they occurred.

Barbadoes	$2,000,000
Pittsburg	3,500,000
London, Conn	500,000
Fayetteville	500,000
Quebec	7,500,000
Matanzas	1,000,000
New York	6,000,000
Total	$21,000,000

This aggregate surpasses the loss by the great fire in this city in 1835. Then about $20,000,000 of property was destroyed.—*New York Herald.*

The following letter is the answer of the General Ship Owners Society, to a communication from an influential house in London, connected with the trade of Canada, calling the attention of that Society to the operation of the United States Drawback Bill:—

GENERAL SHIP OWNERS SOCIETY,
72, *Cornhill, June 19, 1845*

Gentlemen,—Having brought under the notice of the Committee of this Society the subject referred to in your letter of the 21st ult., relative to the Act of the Congress of the United States, allowing the transit of goods through the United States, in bond, to the Canadas, I am instructed to acquaint you that they have transmitted a letter to the Lords of the Committee of Privy Council for Trade, earnestly praying that the probable injurious effects of this Act of the American Government on the interests of British shipping, may especially engage the attention of their Lordships.

I have the honour to be,
Gentlemen,
Your obedient servant,
Nathl. W. Symonds.

☞ Caledonia Springs Visitors.—There have been between 40 and 50 arrivals at the Canada House, at the Caledonia Springs, the present week, principally from Montreal, Quebec, New York, Boston, Brockville and Bytown. The purse for the Hurdle Race to come off at the Springs on the first day, (11th next month,) is to be £25, instead of £12 10s, as advertised in "Life at the springs" of the 19th inst. This is the highest purse given for a Hurdle Race on any course in Canada.
Montreal Herald, July 25.

THE WEATHER AND CROPS.

The Weather and Crops.—Hay is about all cut and housed, and as the crop is scanty, it is so far fortunate. Wheat is ready for the sickle, and will prove a full average. Oats are also excellent; but the want of rain has been a sad injury to the Potatoes.

The fall wheat in this vicinity is now ripe for harvesting and we never had a crop looking better. The Genesee wheat brought in last fall from Rochester by the Agricultural Society of the District, in many cases and we fear in all, is filled with the *weevil* and not a grain of it should be sown for the next year's crop. Better to return to the old seed. We have examined several fields of wheat and find that those sown with the old wheat were wholly free from the weevil; while in those sown with the Genesee wheat we did not find a head without it. A good deal of hay has been got in, but it is at best a light crop. Oats, Rye, and Barley sown late will still be a good crop. Those fields sown early have suffered from the long drought. Potatoes are looking remarkably well.
Victoria Chronicle, July 24.

The Wheat Crop is not at all as promising as it was a short time ago. We hear of a good deal being struck with the rust, and we have reason to fear that much of it will be shrunk. There are, however, very many large fields now beyond the power of the rust, and if the weather holds up fine, next week, we may expect a great portion of the Crop will be cut down, if not housed.
St. Thomas Standard, July 24.

We are informed by many of our agricultural friends, that the Wheat crop in this vicinity, has turned out much better than was expected.—Although light in quantity, the quality is generally unusually good. We have just seen a sample of this year's crop, grown by a farmer in the neighborhood, which for size and soundness of kernel, we have seldom or never seen excelled, and judging from the last advices from England, we anticipate little or no falling off in price. The accounts by the next steamer, will be of the most vital importance to the Canadian Farmer, as it is the universal opinion of the best informed parties, that should there be a general deficiency of the crops in England, it will completely revolutionize the present system of Corn Laws, and protection in Britain. We shall recur to the subject in our next.

THE DOUBLE BODIED, SIX LEGGED LEICESTER PIG.

THIS wonderful Animal can be seen in Kingston for a few days only, at PERKIN'S HOTEL, MARKET SQUARE.

"This Pig is justly considered a natural curiosity, *without an equal or a parallel*, among the freaks of nature.—Its hind parts from the tail forward of the hips, present two distinct bodies of perfect formation, *having the entire functions of two perfect animals*; each furnished with a tail and two legs, which are used and employed as occasion requires. There is nothing in the appearance of the animal that is revolting or unpleasant to the nicest sensitiveness. This is one of the best specimens of Lusus Naturæ—so perfect in all the parts that present themselves to view."

WORMS! WORMS!! WORMS!!!

Of all diseases to which children are exposed, none are so fatal to them as worms. Unconsciously, children are seldom free from them, and as they assume the symptoms of almost every other complaint, they often produce alarming effects without being suspected. Worms are not only a cause of disease themselves, but by their irritation they are the cause of other diseases, wandering from one part of the body to another, and sometimes producing large boils and ulcerating the bowels, and frequently the throat, causing convulsions, and too often death. The best remedy yet yet known is

DR. JAYNE'S TONIC VERMIFUGE,

which is perfectly safe, and so pleasant that children will not refuse to take it. It effectually destroys WORMS, restores the healthy action of the stomach, increases the appetite, and acts as a general and permanent Tonic, and in short is a perfect and certain remedy for FEVER and AGUE.

It not only destroys Worms, and invigorates the whole system, but it dissolves and carries off the superabundant slime or mucus so prevalent in the stomach and bowels of children, hence is usually of those in bad health. This mucus forms the bed, or nest in which worms produce their young; and by removing it—it is impossible for Worms to remain in the body.

It is harmless into effects on the system, and the health of the patient is always improved by its use even when no worms are discovered.

DR. D. JAYNE'S SANATIVE PILLS.

For liver complaints, gout, jaundice, dyspepsia, rheumatism, fevers, nervousness, erysipelas, and diseases of the skin, impurity of the blood, inflammation, tetter, scrofula, sick headache, restlessness, pains in the head, throat, sides back and limbs, blotches, affections, female diseases, &c. &c. &c., and

JAYNE'S LIFE PRESERVATIVE.

An alterative and diaphoretic preparation, combining all the medical virtues of those articles, which long experience has proved to possess the most safe and efficient active and wholesome properties, for the cure of scrofula, humors, white swellings, ulcers, scrofulous, cutaneous and inflammatory disorders, and diseases originating from a depraved or impure state of the blood or bile of the digestive form.

The only Agent for the sale of the above Medicines in this Town, is
