Another "town sheet" informs ils readers that ten of the Irish members of the present Conneil, owe their election to Scotch and Englishmen. I rejoice to hear this, as it proves to me, that that those honest men are possessed of more sterling good sense than many of their (mis) leaders. They will find that the " Irish" do not deserve the unenvisble reputation bestowed upon them by means of printed placards, in the streets of Kingston, and that on some future occasion the independence of those men, if we can believe the source from which the information proceeds, will be requited by the Irish with more than compound interest.

That man will be borne to his seat in the House on the shoulders of Irishmen, in preference to one of their own, fully competent in their opinion for the important trust he has to fulfil; but let even him insult the Irish-which of course they well know he is incapable of doing-and he too, would soon find out his mistake.

The Editor of the paper just referred to, in treating of this subject, has includged epithets which with great propriety he might have avoided.
