Y.; of several years in London as C lonial Agents, of neglect is followed by more or less of inconvenience or suffering. When habitualcostiveness prevails the cheerful vigor of health is soon impared, sometimes by slow degrees, and at other times more rapidly, diseases make their nroads on the constitution; and in numberless instances, particularly where the habits are sedentary, or where free living is indulged, permanent ill health is the painful result. It must be obvious to the most superficial observer, that when the functions of nature now alluded to are not performed with due regularity, assistunce must be obtained from art. Aperient Medicines then be come indispensably necessary, (except where the use of fruits, or a change in the mode of living may suffice for removing the evil,) and must be had re-

course to until the necessity for such aid ceases. Strawberry, Raspberry, Sarsaparilla and Butit is a question of considerable importance, what Laxative shall be employed? The list of Aperient Medicines is numerous, but their effects on the system vary considerably ; some exert their influence chiefly on the exhalant vessels, or on some part of the howels only, whilst the action of others extends more or less to the whole of the intestinal canal. The latter class of ape rients is evidently the best adapted to obviate the habitual confinement of the Bowels, as they apply that additional excitement, Which nature then requires

to assist her in the performance of her accustomed functions. ICSSES. PAUSCOTT. GROTE, CAVE, AMES, & CAVE,

The Colonics have, from time to time, enjoyed the benefit of Banks, Railmad Companies, Incororated Church Societies, Emigration, Colonising, Steam Navigation, and other Associated Badies, but, as yet, have possessed in a very limited and imperfect degree, any Provident Institutions adapted Insurance for Fire and Life. It cannot be deied that the period has now arrived when their wealth, extent, and growing importance, demand that they should passess a special Metropolitan Office for their protection and benefit, devoted to the now duly appreciated objects of Assurance, having its outlying Branches in all our principal Some few of our older-settled Colonies have their Local Assumace Offices, conducted for the most part on the mutual principle; but from their being
