Our vast and widely extended Colonial Possessions, daily becoming more and more densely peopled by Emigrants, are for the most part situated in the benefit of Assurance, where such a provision is essentially requisite for the safety of the Stock and the protection of families, frequently left unprotected for a strange land by the death of friends or relatives.

THE Colonies have, from time to time, enjoyed the benefit of Banks, Restless Companies, Incorporated Churches, and other Associations, Colonists, Steam Navigation, and other Associated Bodies, but, as yet, have possessed in a very limited and imperfect degree, any Provision Institutions adapted to Insurance for Fire and Life. It cannot be denied that the period has now arrived, when their wealth, extent, and increasing population, demand that they should possess a special Institution, for their protection and benefit, devoted to the now daily appreciated objects of Assurance, having its outlying Branches in all our principal Settlements in the four quarters of the world.

THE Capital of the Company is One Million, which will be continually augmenting, as business progresses, thus constituting a large permanent fund for the benefit and security of all parties interested, and affording the most unexceptionable mode of transacting business with the Company. The number and influence of the Directors and Proprietors, at home and abroad, place it on a level with the most eligible Offices in the Kingdom, with respect to the advantages afforded to the public, and afford a sufficient guarantee for its full and complete success, as well as of the character and genuineness of the new articles.

THE Undersigned having resigned the Agency of the Quebec Fire Assurance Office at this place, begs to notify the public, that the business of the Institution here, will henceforth be conducted by his successor, THOMAS BRIGGS, Junior, Esquire, to whom applications for Assurance, or other business connected with the office, will in future be addressed.
