Me Mary, when mounlight is steeping The earth in its heavenly hoes,

When stars from their watchports are peeping, And clouds are distilling their dews; When the zephyrs are playfully sweeping

Through Heaven's all boundless expanse And the bright Borealis are keeping Their airy fautastical dance; Then, then, belaved Mary, oh! meet, meet, me

By the streamlet that noiselessly winds through

the glen. Then, as the fleet moments are stealing Unbeeded, and silently by,

Night's glorious beauties revenling That dezzle and gladden the eye; Then, when souls are o'erflowing with feeling, With reptures-unsullied-divine-

'I will yield, by that rivulet kneeling, A heart that is solemnly thine; Then, then, beloved Mary, oh! meet, meet, meet,

By the streamlet that noiselessly winds through

the glen. THE DISCOVERIES OF 1846 -We apprehend that

there can be no doubt that the year 1846 will be memorable to the end of time, for the remarkable discoveries it produced. The following is copied from a late London paper. The third discovery will be interesting to those engaged in mining 1. Foremost among these may be placed the

use of other, inhaled for the facilitating surgical Ohio, three I rands, at \$5 124; 2,260 mixed Michi operations. Like all other appliances of this gan, affoat at same. kind, it meets with failure and even with evil results in a few cases. But for one fatal result and five failures we have five hundred instaces of vast benefit, in many of which, beyond all doubt, lives at \$1.4 St fee. been. Without describing it infallible, or in all cases pafe or to be relied on, the e can be medoubt that this d scovery has conferred vast benefits on man-

2. The substitution of a new explosive material. -the gun cotton,-in place of gunpowder, is another remarkable event. The extent of utility is not yet ascertained. Whether it will be largely adopted in warfare is still a point on which no decided epinion has been formed. But of its great utility in all blasting and mining operations, not the alightest dunbt can exist. It is both cheaper and more powerful than guopowder, and the absence of sawke gives it a decisive advantage. There can remain no question, that in all works of this description, the new agent will rapidly supersode the old.

3. The third discovery of 1846 is perhaps even of greater importance than either of the former. We allude to the lately patended process for amelting copper by means of electricity. The effect of this change will be quite predigious. It produces, in less than two days what the old process required three weeks to effect. And the saving of fuel is so vast, that in Swansca alone a chimate their annual saving in coals at no less than five hundred thousand pounds. Hence it is clear that the price of copper must be so en em sully reduced as to bring it into use for a variety of purposes, from which its cost at present

The facility and cheapness of the process, too. will enable the ore to be largely smelted on the spot. The Cornish mine-proprietors are anxiously expecting the moment when they can bring the ore which lay in the mine vesterday, into a state to be sent to market to morrow; and this at the very mouth of the mine. In Australia also, the operation of this discovery will be of the utmost importance. Ten thousand tout of copper are were sent from Australia to England last year to be smelled at Swansen; and the result was ode 1600 tone of or per. But Australia in future will much had seen copyed, by a 20 house, proceed, our my all the medical hought of the \$100 tone of refuse; and saving also the cost of the old and expensive process. In a very few years Australia will send to market more copper than to more purfuture penny-pieces are to hear any proportion to the reduced out and value of the metal, they must I be made of the size of dinner plates.

Mone Paren.-A notice appears in the official Gazette of an intended application to the Provinc al Legislature at its next session, for an Act to incorporate certain persons under the style and title of "The Merchants and 'Farmers' Bank of the City of Toomto," and signed Henry E. Nicholls and 200 others.

SINGULAR OCCURRENCE. - The Bubuque (Iowa) Republican publishes an account of the fall of grolites in that neighborhood. In one instance a stone, some six feet in diameter, and resembling a mass of sulphur, it its descent Betown : Culvin Green, G. Coon, O. Wright, went through a large tree, crushing it to atoms, and entered the earth to the depth of about twelve feet, whence it was afterwards recovered by those who witnessed its fall .-The traces of several smaller hodies of the same nature have been discovered in that vicinity within a short time, and are creating considerable alarm.

CANADIAN REJOICING FOR AMERICAN VICTURIES .- The Sandwick Stanfard contains a long article concerning the illumination of the house of a man named Devenport, in that town, in honor of the victories of Buena Vista, Monterey, and Vera Cruz. It appears that on the night in question, there was a "glorious illumination" in Detroit, and Devenport who is "the licened ferry-man of the British Government, the British Mail carrier, the contractor for supplying the troops stationed at Windsor with wood &c., the stationed at Windsor with wood &c., the the pleasure of her acquaintance, which was hair as ever a man enjoyed; and I cornestly w. licensed Canadian tavern keeper, and sworn manifested by the respectable funeral on Sunday commend that all who have not tried this most subject of Her Majesty," was determined to last. joicings, and convince them, by sending a "flood of patriotic light across the river," that there was men in Canada, who although they pretended to be Loyalists, were in heart and oul thorough-going Republicans. The inhabillants of Sandwich remonstrated with Devenport on the impropriety of his conduct, and requested him to cease his rejoicings, but he torned a deaf ear to their advice. The consequence was that in a few minutes his windows were all smashed, and his house left a complete wreck by those whose indignation thad been aroused by his disloyal conduct.

Hamilton Speciator. THE EMIGRANT BILL.-We take great pleasure in saying that the bill so long pending in the Senate, in relation to emigrant Passengers, having been so amended as, in the Judgment of the Senate, it will apply the moneys collected from emigrants as well to benefit that entire class of citizens as to relieve apply at this Office. of them as need assistance, passed to-day with the vote of every Senator in its favor.

Albany Journal, May 4.

years since the first little log house was creeted, submitted for public patronage, and during the religious society was formed in 1815. The present use, are well known to have rescued many thoupopulation of the city is about 27,000. The Gene- sands of young persons from an early grave, and see river falls in passing the city, in a distance of never failed materially to lengthen the life of every 33 inites, 226 feet—the greatest distance, at any one point, being 97 feet. AND NOBILITY OF GREAT BRITAIN. AS WELL AS THE SEVERAL SOVEREIGNS AND COURTS OF

AND UNIVERSALLY PREPARED AND 'ESTERMED ROWLANDS' MACASSAR OIL TS celebrated throughout the world for its genial and nourishing qualities for the Human Hair! It produces and restores hair ; stops it from falling off or turning grey; restores Grey Hair to

dandruff, and renders it soft, silky, curly, and glossy. For CHILDERN, it is especially recom-inended as forming the basis of a Brautirus. Head of Hair! and rendering the use of the fine-comb unnercesary. Price 3s. fid., 7s.; Family Bottles (equal to 4 small,) 10s, 6d., and double that size, 21s. per bottle. To Mesers Rowland and Son, 20, Hatton

Garden, London. GENTLEMEN, - I consider it almost an imperative

duty to state the efficacy of your excellent Macassau Oil. For the last fifteen years I have been bald, occasioned by a dreaful fever whilst in India. I have used almost every means to procore a head of hair again, but all my efforts scemed fruitless, until accidentally a friend advised the use of your valuable "Hair Restorer" (I can give no better name,) and after using a 3s. 6d. buttle, every sympton of a new head of hair began to show itself, to the surprise both of myself and family. I resolved on having another, and obtained a 7s. bottle : before the whole of which was used, I had, and have now, as hands me a head of excellent Oil, will not fail to do so.
