THE PENITENTIARY.—We believe that the investigation into the charges preferred against the Warden of the Kitchen has been brought to a close, but that no decision has been arrived at as yet. Now the Inspectors. So much time has elapsed, we think, in this matter, that it may not now be improper to state that these charges embrace peculation, or action that those Penitentiary supplies—cruelty to some of the convicts. The second charge includes particularly the wanton shooting at one of the male prisoners with a bow and arrow, and the destruction of one of his eyes. Strange to say, contrary to usage and all propriety, the party accused has been permitted to remain in the discharge of the duties of his office during the investigation and up to the present moment, notwithstanding the gravity of the charges. We have been furnished with facts of rather a startling character as to the condition of the Penitentiary, the course pursued by the Inspectors in this inquiry, &c., which we shall fully lay before our readers so soon as a decision shall have been formed upon the matter now before the Inspectors.—*Chron. & News.*

ED. WHIG'S NOTE.—We intend to re-publish in the *British Whig* all that may appear in the other provincial papers respecting the mismanagement of this Institution—but, *Cui Bono?* The Government will never grant any public enquiry, while it needs the active assistance of the Member for Frontenac to carry on the war in the House of Assembly.

JOHN BAILLIE.
Secretary.

THE GORE BANK.

Among the recent failures in England is that of the house of Reid, Irving & Co., the London agents of the Gore Bank. Since the news of this failure reached Canada, we learn that, in some parts of the Province, efforts have been made to prejudice the public against the notes of the Gore Bank, and that the holders of some of these notes, from alarm that have been excited, have been induced to part with them at less than their value. We wish to put the public on their guard against being made the dupes of designing persons who are spreading evil reports respecting the Gore Bank for the sole purpose of speculating on its notes, by purchasing them at a discount, at the expense of the present innocent holders, many of whom are too ready to listen to the false rumors that are put in circulation.

Whatever loss the stockholders of the Gore Bank may sustain, by the failure of Reid, Irving & Co., the public will assuredly lose nothing. The notes of the Gore Bank are taken in payment, as usual, *by all the other Banks of the Province*, and they are redeemable in specie at Hamilton, as before. The Bills drawn by the Gore Bank upon Reid, Irving & Co., and which had not matured at the date of their failure, have been provided for, those that were since returned will be paid at the Gore Bank in Hamilton, and those that are still in England will be paid, through Mr. Steven, the Cashier, who has taken his departure for London, with money for their payment.

It is probable that the Gore Bank will lose considerably by the failure of Reid, Irving & Co; but the reserved fund of the Bank will likely be sufficient to meet that loss; and, even in the event of that fund falling short, the worst that can happen will be, a temporary stoppage of dividends to the stockholders, all of whom are liable to the public for double the amount of their shares, so that the holders of the notes of the Bank can in no way be losers by any unfortunate circumstance that has given the present alarm.

We therefore warn all our country friends, who may have notes of the Gore Bank in their possession, to regard them as being, in every respect, as good as ever; and not to listen to the insinuations of those designing persons, who are endeavoring to excite unnecessary alarm, with the sole view of leading to their own profit, by purchasing the notes at a discount, and afterwards realising their full value for them from the Bank.—*Toronto Colonist.*

Facts and Scraps, original and select.

☞ MOURNING THE COCKADE.—It is a matter of great moment in England, the allowing of servants in livery to mount the cockade on their hats. This is a privilege exclusively appropriated to the servants of gentlemen in the Navy and Army, and signifies that their masters have "served." So rigidly is this privilege guarded at Home, that Officers have been known repeatedly to tear the cockade out of the hats of those not entitled to wear it, sending their cards to their masters; and servants have been known repeatedly to fight with those who assumed it improperly. But in Kingston this sort of thing is entirely disregarded. Who knows anything about the wearing of cockades here? For instance the servants of a gentleman in this city, mount the cockade; and they are as much entitled to wear it, as the man in the moon. But in the Colonies things are done which would never be even attempted at Home. The proudest Peer of Great Britain, with a revenue of half a million, provided he had not "served," would never presume to allow his servants to mount the cockade; while the non-commissioned officer, or the private foot soldier, who in after life acquired wealth, or even competence, would not be accused of impropriety, were he to allow his servants to do it. This distinguishing mark, in former times, was worn by military and and naval men themselves; but in these Mufti days, it has fallen to their livery servants. It is a great piece of impudence for any person, not privileged, to mount the cockade on the liveries of their retainers.

☞ ALTHAM, A TALE.—When Barker's Canadian Magazine was in existence, the more generally interesting of its papers was the tale of "Altham," by Capt. Cumming, of Amherst Island. It would not be too much to assert, that when the Magazine was discontinued, all the Subscribers regretted the non-completion of this really exquisite tale. We have the pleasure now of informing such of the late Subscribers, who peruse the *British Whig*, that the accomplished writer, influenced by the opinion of his friends, has sent the M S S. to London, where under the supervision of a near relative, the work is about to be published immediately. It is more than possible, that the London price (£1 1s.) may prevent any great sale in Canada; but doubtless on its appearance, the New York press will pirate it, and the Western Continent be deluged with copies at twenty-five cents each.

☞ A NEW STEAMER.—A new freight steamer, of a model similar to that of the *England* and *Scotland*, has just been launched for Messrs. Macpherson & Crane, and is intended for the lake and river trade. The new steamer is named the *Commerce*. The *Commerce* will be freighted with flour and towed below for the reception of her Engine, which will be of 75 horse power. This vessel was built at Portsmouth, two miles from this city, during this summer, and is capable of carrying about 3,500 barrels.
Chronicle & News.

A Bill for the division of the Montreal District is in course of preparation, and will be brought forward at the next Session, by the Attorney General East. A new District will be formed which will include we, understand, all the townships on the Lower Canada side situated above the Seigniory of Argenteuil, Aylmer will probably be the Capital of the New District. This is a concession on the part of the Government which will benefit the Ottawa materially. The people of the upper Townships have for a lengthened period agitated this measure, and it is doubtless gratifying to them to be aware that they have at last succeeded in obtaining their desire.
Bytown Packet.

AWFUL CATASTROPHE.—*Six men drowned.*—It becomes our duty to record a most melancholy accident, by which six men have been suddenly launched into eternity. It appears that they had been working in Ogdensburgh during the week, and on returning home to Williamsburgh, on this side of the river, on Saturday evening last, they had loaded their skiff heavily with some stoves, a barrel of liquor, and some other articles, (possibly intending to avoid the payment of duties,) when in the Galloos Rapids by some mishap the boat became filled with water, and immediately sunk beneath them; and although they were seen from the Red Mills, no resistance could be rendered. The names of the unfortunate persons, as far as we could learn, were—Robert Johnson, contractor for levelling a street in Ogdensburgh; Robert Riley, a hired man of Mr. Daniel Carman, of Matilda; Mr. Lanagan; a son of Mr. Darling, of Matilda; Arthur McNaria; another person whose name we could not learn.—*Prescott Telegraph.*

☞ HOME DISTRICT ASSIZES.—The Assizes for this District are drawing their slow length along without affording anything of material interest for the public journals. The two important cases on the criminal calendar have been decided. That of the *Queen versus Robert Mullen*, for the murder of William Somerset, wherein the prisoner was acquited; and the *Queen* versus *Thomas Burchell*, for murder at Lloydtown. The prisoner was acquitted of the capital offence, but convicted of manslaughter.—*Colonist.*

☞ THE ARMY.—Lieut. Col. Mountain, mentioned in the following paragraph, is a native of Canada, and a brother of the Bishop of Montreal:—

Lieut Col. Armine Mountain, C. B., of the 24th Cameronians, has been selected to accompany the Earl of Dalhousie to India as Military Secretary to the Governor General. The appointment will be extremely popular in India, where Lieut. Col. Mountain is well known and much esteemed. The Lieutenant Colonel was in China during the late war, and filled a high Staff situation under Lord (then Sir Hugh) Gough; his gallantry at Canton obtained for him the decoration of C. B. His local knowledge and experience will be of great utility to Lord Dalhousie. Lieut. the Hon'ble Francis W. Fane, 74th Highlanders, accompanies the Earl of Dalhousie as Aid-de-Camp.
Quebec Mercury.

SAD ACCIDENT.—With regret we learn that a serious accident happened to Mr. Julyan, of the Commissariat Staff, on Thursday last. This gentleman has been stationed at Grosse Isle during the summer, and on the day in question was shooting on Isle Marguerite (adjoining' when, unfortunately, his fowling piece exploded and shattered his left hand most fearfully. Before conveyed to his quarters, where he was at once attended by Dr. Gen. Douglas, the Medical Superintendent, he lost a considerable quantity of blood. One finger had to be removed at the third joint, as also a portion of the thumb; but Dr. Douglas expresses a hope of being able to save the remaining portion of the hand.—*Quebec Mercury.*

The Quarantine Station at Grosse Isle may be said to be closed for the season. All the healthy and others have been forwarded up, and but two patients now linger there; both of them connected with the establishment, and both very ill of fever:—William Lindsay and Hum.

All remaining supernumeraries will be discharged on Tuesday next. The first named individual has been peculiarly unfortunate. He has already suffered from two marked attacks of typhus.

It is singular enough that several of the nurses lately returned from Grosse Isle have been attacked with fever and died within a very brief period; and others are now laboring under the disease.—They all left in full health, or at all events apparently so.—*Ib.*

We are sorry to hear that Dr. Painchaud, junr the House Surgeon of the Marine Hospital, is now ill of typhus fever.—*Ib.*

☞ THE HEALTH OF THE CITY.—We are happy to learn, upon all hands, that the health of Toronto is now restored to its wonted condition; and that all the apprehensions of our good people, as to the coming winter, are likely to be agreeably disappointed. There is no disease, unless where it is created by dirt, and intemperance: and we fear it will be some time before these two morbific agents are thoroughly repudiated, by the city fathers, and their promising children. *March Street* still rejoices in all its luxuriance of filth, and odoriferous elegance. On Monday, Mr. Gatlie made a sweep amongst the pigs; and captured a dozen or two of these free-trade scavengers. We rejoice to learn that none of the City Fathers were on foot; otherwise the result might have been very unhappy: particularly during Lord Elgin's visit. We have not yet received a return of the killed and missing.—*Toronto Mirror.*

☞ WHAT BECOMES OF THE SOVEREIGNS?—Alderman Tully, of Montreal, has published a letter in the *Pilot* of the 16th inst., relating to the money found on, or taken from, the persons of sick emigrants, by the *Medical Staff*, at the Sheds. This is an interesting subject; and one to which the Government should give some attention. We could furnish some hints, on this matter, which would go to substantiate Mr. Tully's apprehensions. It is wrong to burn the clothing of the dead, without examination. We have heard of an emigrant, who, many years ago, died in a Provincial Hospital, leaving eight Sovereigns in the hands of the Apothecary; but as the latter individual soon after "died also," we were never able to learn what became of the eight Sovereigns; excepting this,—that the poor man's aged mother, in Ireland, did not receive them. This is a new field of investigation; but one of much importance.—*Toronto Mirror.*

☞ The Bathurst Courier says, that Messrs A. Shaw, J. K. Ward, W. Simpson, and R. Harper, intend petitioning Parliament at its next Session, for a charter to construct a plank or macadamized road from Smiths Falls to Bytown.

☞ Capt. Granby Calcraft, Her Majesty's Post Office Packet Agent in the United States, recently appointed as successor to the late Mr. Moore, is now in New York, and is to enter upon the duties of his office immediately.

☞ Lord and Lady Alexander Russell, who accompanied their Excellencies the Earl and Countess of Elgin, on their recent visit to Upper Canada, have, we understand, returned to town, and intend proceeding to England by the next packet from Boston.—*Montreal Herald.*

☞ The keeper of the New York Tombs found himself not a little troubled while the seven junk Celestials were under his charge. Their comrades from the junk would visit them in numbers, and there is so much sameness in their countenance, that it was impossible for him to tell which was the prisoners. He took the safe course, however, of locking the cell door when all had come out but seven. But for his life could not tell whether the seven kept in were the offenders.

☞ A new glass factory has recently been put in operation at Vaudreuil, by Messrs. Desbarats & Derbishire. This is the second establishment of the kind in Lower Canada, —the other being at St. Johns.

DIED.

At Gleaburnie, on the 22th inst., RICHARD DRAPER, Senr., an old and respected inhabitant, aged 66 years.

Friends are respectfully requested to attend the funeral from his late place of residence, on Sunday, at 10 o'clock, A M.

On the morning of Thursday week, after a protracted and painful illness, at the advanced age of 86 years, John Ryan, Esq., one of the Printers in this Colony to Her Majesty the Queen. Mr. Ryan was a native of Rhode Island, in the United States of America, and was one of the loyalists who at the close of the war of Independence left their homes and that country, proceeded to the British North American Provinces, and settled down on wilderness lands—choosing rather to endure the hardships incident to a residence in those then new and partially settled countries, than to renounce their allegiance to the British Crown.—Mr. Ryan settled on the site of the present flourishing city of St. John, New Brunswick—at that time but partially cleared from the forest. Some years afterwards, the colony having rapidly increased in population and importance, Mr. Ryan was appointed to the office of King's Printer in New Brunswick—which office he continued to hold until the removal of the seat of Government from St. John to Fredericton—whither he declined to proceed. In 1807, being on a visit to Newfoundland, he was induced, by offers of support from the Government and Commercial Body, to establish a Press in this Town, and the *Royal Gazette by authority* was published by him in that year—being the first periodical ever issued in the Colony. From that time to the present (being a period of 39 years) he has held first by himself, and afterwards jointly with Mr. Withers, the office of Printer to the Crown. Mr. Ryan has been a Newspaper Proprietor between 60 and 70 years—and was the father of the Press in British North America. In New Brunswick, Mr. Ryan held a Captain's Commission in the Militia, and in this Country commanded one of the Companies or Volunteers enrolled at St John's in 1817—Throughout an unusually protracted term of existence, his character has been irreproachable.—His public conduct has ever been marked by the strictest integrity and uprightness—whilst in private life his many virtues will be long remembered by those who knew him most intimately.

BARKER
LAXATIVE PILLS,
FOR BILIOUS COMPLAINTS, IN THE HEAD.
Giddiness, Sickness, Jaune, Obstructions, Confinement the Bowels, &c. &c.
The great demand for these Pills is the best guarantee for their usefulness in above complaints. Numerous testimonials could be given if necessary, from persons of the highest respectability, who have used *No Family should be without them in case of sudden Sickness.*
OF the numerous diseases to which human frame is liable, there is scarcely one the symptoms of which are not seriously aggravated a confined state of the Bowels, and to those study to keep their action and uniformity preserving the alimentary Canal free from obstruction is a point of such primary importance, every degree of neglect is followed by more or less inconvenience or suffering. When habitual weakness prevails the cheerful vigor of health is impaired, sometimes by slow degrees, an other times more rapidly, diseases make their attack on the constitution; and in numberless cases, particularly where the habits are sedentary or where free living is indulged, permanent ill health is the painful result. It must be obvious to the most superficial observer, that when the action of nature now alluded to are not performed with due regularity, assistance must be obtained from art. Aperient Medicines then become invariably necessary, and must be had recourse to until the necessity for such aid ceases.
But it is a question of considerable importance, what Laxative shall be employed? The list of Aperient Medicines is numerous, but effects on the system vary considerably; some of their influence chiefly on the exhalent vessels on some part of the bowels only, whilst those of others extends more or less to the whole alimentary canal. The latter class of agents is evidently the best adapted to obviate the habitual confinement of the Bowels, as they appear additional excitement, which nature therefore to assist her in the performance of her natural functions.
It is precisely on this latter principle that the Pills now offered to the public are formed as their activity can be increased or lessened merely by taking a larger or smaller quantity beyond only furnish an Aperient Medicine proper for general use in a Family, but are also well calculated to answer most of the purposes for which purgative remedies are necessary.
The Pills are not, however, recommended as a SPECIFIC for the cure of ALL diseases; such preposterous statements are worse than fallacious, and are only put forth for deception but we will prove a Valuable Remedy for the most of much suffering, for those occasional ...ctions to which all are liable, and for all the disorders which arise from an overloaded state of the stomach and alimentary canal. Consequently decided benefit will be derived from their use in dizziness and Pains in the Head, accompanied Nausea, or Sickness; in all Head-Aches whatsoever prevails; in Flatuencies, Bilious Attacks, the commencement of Cholic, the early stage of Jaundice, and in promoting the expulsion Worms—They require no confinement or chain the diet—moderate exercise will assist the operation—and experience has proved that, as Aperient, they are safe and efficacious, may be taken by adults and children, and also in every stage of pregnancy. To children of five year of age and upwards, they may be readily given up of sple orange, or jelly, and thus disguised are much more easy of exhibition than Pers or other disagreeable medicines.

HORSE STRAYED.
STRAYED from the pasture near Kingston, on Sunday last, a SMALL WHITE MARE, Canadian breed, aged. When last heard of, she was seen going along the Front Road, Pittsburgh. Whoever will take charge of her, and let the subscriber know, or give any information of her whereabouts, will be duly rewarded.
WILLIAM MASSIE.
Kingston, Oct. 14, 1847.

STOVES! STOVES! STOVES!
THE Subscriber respectfully solicits the public attention to his Winter Stock of Stoves, comprising every variety, including Fancy Stoves, Parlor Stoves, Box Stoves, Single and Double Cooking Stoves, of various patterns and sizes; Hot Air Stoves, Dumb Stoves and Tin Stoves, of the best Canadian and United States manufacture.
These Stoves, for the convenience of inspection, are placed in the Warehouse immediately adjoining the Subscriber's Hardware Establishment; an inspection of which is solicited before purchasing elsewhere.
J. POWELL.
Princess Steeet, Oct., 1847. 83-3m

Lamps! Lamps!! Lamps!!!
THE Subscribers have just received a large supply of Cornelius's
PATENT SOLAR LAMPS,
of various sizes, comprising Stand, Hanging, and Side Lamps, to which they would particularly invite the attention of the public. They have on hand a supply of
SUPERIOR BEER PUMPS,
which they will fit up to order; also, in addition to their usual stock of Tinware and Stoves, a quantity of How's Patent Summer and Winter
"AIR TIGHT COOKING STOVES."
E. & A. CHOWN.
Kingston, Oct., 1847. 83-tf.

COMMISSION BUSINESS.
THE Subscriber having commenced business as a Commission Merchant, in the Stone Buildings at the foot of Princess Street, in this City, is now prepared to receive consignments, and transact business generally in the
COMMISSION LINE.
His extensive Stores and Cellars are suitable for the Storage of any description of Goods, and are considered quite safe from external risk of fire.
From his long experience in the trade of this City, the Subscriber flatters himself that with assiduous attention to the interests of those who may employ him, he will be able to give satisfaction.

STOVES! STOVES!!
CHEAPER THAN THE CHEAPEST.
THE SUBSCRIBER returns his grateful acknowledgments for the liberal patronage heretofore extended to him, and begs leave to inform the public that he is now manufacturing
STOVES,
on an extensive scale, which enables him to sell much below the usual prices. From experience in the business, and personal selection of
IRON AND MATERIALS,
also, having a number of first-rate Workmen, the undersigned hesitates not to say, that he can turn out an article equal to any manufactured in the United States. If you don't believe it, *call and see.* The Subscriber is manufacturing the
Buck Hot Air Cooking Stoves,
which, in the estimation of all who have used them, are found *right* as a Cooking Apparatus. No Stoves have been made yet which gave such uniform and perfect satisfaction, wherever they have been well put up and fairly used. There is so perfect a combination of points essential to a good Cooking Stove, that he wishes particularly to call attention thereto. The capacity of this Stove is so great, that he has no hesitation in asserting that no other Stove which has yet been constructed is capable of doing an equal amount of work so perfectly with an expenditure of so little labor and trouble.
The undersigned having used those Stoves for nine months, believe them to be superior to any Stoves they have ever seen or used, and recommend them as an article that cannot fail to give perfect satisfaction.
DAVID SHIBLEY, *Bath.*
JAMES SHAW, *Napanee.*
ROBERT HOPE, *Newburgh.*
N. B.—All orders thankfully received and punctually attended to.
