Not be in a rage ! "I tell ther that for one " bright presidental star Which they, vile catiff! hast depired me of, I'll he at daggers-drawn with thee for ever. Picton.

I am, NOT " DOCUTFUL."

13- The mortal remains of the Hon. John Neilson were vestorday interied at Valeartier, in compliance with the wish of the deceased, who was one of the earliest founders of that settlement. The hearse was followed to St. Andrew's Church by about eight hundred persons, including some of our leading townspeople, and many of the country people from Valcartier. The Rev. Dr. Cook delivered a most eloquent and appropriate funeral oration. A large number of carrioles accom-Partied the hearse to the place of interment .willage flag was raised of half-mast, and minute chas were fired. The farmers of Valeartier were to do the same in their parish. In town, we are harpy to observe that the shops generally were closed until after the procession dad reached the church. Quebec Mercury.

THE NORMAL SCHOOL FOR UPTER CA-NADA .- It is gratifying to be able to state, that there are upwards of farty students in this important institution—nearly all of them persons who have already been employed as Teachers of Common Schools, and who have improved the very first opportunity of attending the Normal School, in order to qualify themselves better for the daties of their profewion. The attendance of students, during the first session, is larger than had been anti- Sngars, Teas, Tobaccos, ripated. It is pleasing to semack, that some of the young men have been sent by District Rouncils. The great Nornal School at Albany, for the State of New York, -now containing 300 papil teachers-opened with freenty-mine; and it was two or three years before the attendance at the famous Normal School in Dublin amouted to thirly at any one time. But our expectations have not been less exceeded by the attendance of popil teachers, than by the ability and skill of the Masters employed to give instruction. On this subject, however. we purpose to remark in the next number of this journal, when we hope to be able to an- terms. Among the Stock will be foundnonnce the opening of the Model School in connection with the Normal School. Journal of Education.

Our readers will recollect that one of the Barracks at Chambly was bornt down fast summer. On information given by an individual named W. Boyd, a man named Lapointe, reuiding at Chambly, was arrested on suspicion, and has been in Jail since that period. He would have been brought to trial during the present criminal term, but his innocence is in the line. a little too late, for he has already undergonan imprisonment of four or five months. A man named Renaud, who was in Boyd's service has come forward and accused him of heing himself the incendiary. If Renaud is to be believed, Boyd himself set the harracks on fire in Remain's previous. It is stated that Burd, who kept the canteen, was an old pregnant, that lie had often been heard to com; fain that there were no troops quartered at Chambly, and that he had an idea if the by ricks were burnt, the troops would be sent back again; that he had effered Remard eight de las to set them on fire, but that he had sef.med. Soon after this he saw flumes issuing from the harrack, and that he would have prevented Boyd from doing the act, but that the latter told him it was no buisness of his - Boyd. who was in lown to give evidence against Lapointe, was arrested on Wednesday, by Sub-Chief Jetemie, and committed to prison

We have pretty good authority for sta-Carleton, will role with the Reform party at the coming session of Parliament; and more, that the greater part of his most influential supporters, knowing this, seem perfectly satisfed that he should do so. And if one thing more than another short of his deing so, could convince as that such is his intention, it is the fact of the Ottowa Advocate (his reputed organ,) placing his name in its list of returns amongst those whose politics are doubtful, while a few weeks before it pronounced Mr. Malloch a Conservative to the " back bone; and then even went so far as to authorise the Montreol Gazette to change Mr. Malloch's name from a similar position to that in which it has now placed him to one more suited to his feelings .- Bytown Packet.

MR. RODGERS AT TORONTO.-The lecture given by Prof. Rodgers, on Saturday evening last, was attended, we should say, with the most fluttering and gratifying results, not only as regards the number and the respectability of the audience, but the eninent success of the experiments exhibited. We confers that before Mr. Rodgers' appearance, we entertained but little faith in the truth or efficacy of the science of Mesmerism; our scepticism, however, was materially shaken by witnessing the striking effects produced spon persons while under the magnetic influence imparted by the operator. The lecture was in all its features an interesting one; and as it is Mr. Rodgers' intention, as will be seen by the advertisement in another column, to give another lecture this evening, we would recommend our friends, and all those whose euriosity has been excited by the reputed wender-workings of this science, to be present at the lecture .- Toronto Herald.

British ship India, recently arrived at New York from Liverpool, with passengers, lost her Captain and 39 of the emigrants on the soyage oat.

MONTREAL MARKETS, Monday Monaiso, 7th February, 1848. Ashes-Arc in demand at 23s per cwt. for Pot. and 25s for Pearls, but there is no supply. The navigation closed leaving a small stock, and since then the state of the winter roads has not

admitted any being brought to market. Now Flour-Hasa moderate demand for consumpdien, but there is no disposition to effect purchases for Spring delivery. There are seliers for de-
