Oct 16. Middlings Separator.

TITE have lately obtained Letters Patent for Canada on our Middlings Separator (known in the States as Jones' Middlings Separator). This machine is the most popular and perfect yet invented. Hundreds of them have been sold in the States in the past Gauntlets, two years, and are now running and giving

satisfaction to the purchasers. The patent claim is a very broad and strong one. We desire to lease the territory of Canada on a royalty fee, subdivided to suit the lessors. A Millwright who can associate with himself a machine carpenter, firm, or vice versa, would make a suitable party to take the lease, and will find it profitable beyond any ordinary business. THE ROYAL CANADIAN INSURANCE COMPANY.

Authorized Capital \$5,000,000.

THE present rates for Fire Insurance throughout the Dominion (the result of combination among the various Insurance Companies) are, it is believed, not only excessive, but unnecessary; and however severe the losses to those Companies may have been in the late mitous fires in Chicago, Boston and other cities in the United States, the losses in the bur ness of Insurance throughout the Dominion, does not warrant the great increase which has lately taken place in the rates.

Such being the case, this Company represented by the wealthiest merchants of the Domir ion obtained a charter during last session of Parliament, and are now prepared to do br at moderate rates. The promoters can with full confidence rely on the citizens of Kir giving this Company a liberal support, the directors pledge themselves that in the event o loss claims will be settled in the most liberal manner, and risks will be taken on their meri irrespective of any Company.
