> > H. BOLLMAN CONDY. Patentee, Battersea, London,

THE ORIGINAL CHLORODYNE, invented by R. Freeman, Pharmaceutist, is allowed to be one of the greatest discoveries of the present eminent Physicians and Surgeons in hospital and private practice in all parts of the world. It has effects peculiar to itself, and which are essentialdifferent to those produced by the various compounds bearing the name of Chlorodyne, but have no pretence to possessing its virtues. I. rapidly relieves pain, from whatever cause, allays the irritation of fever, soothes the system under exhausting diseases, and givessleep without producing any one of the unpleasant feelings so commonly arising from the use of opiates. continues to hold its unshaken position in the estimation of the Profession as the best, most reliable, and cheapest preparation. Eminent and scientific Physicians made affidavits that they have tested its effects in careful comparison with those of "DR. COLLIS BROWNE'S CHLORO-DYNE," and deposed to the facts that they found it a more certain and reliable preparation, and greatly preferred "FREEMANS." Earl Russell communicated to the Royal Col lege of Physicians and to Mr Freeman, that in Manilla the only remedy of any use in Cholera

was Chlorodine. The Medical Times and Gazette, January 13th, 1866, states, "It has an immense sale amongst the public, and is prescribed by scores of Orthodox Medical Practitioners, and, of course, it would not be thus singularly popular did it not supply a want and fill a place." Manufactured by the Inventor, Richard Free-The genuine has engraved on the Governmer
