# The Daily News.

MONDAY EVENING. DEC. 30:41-1

Meeting of the Bar. A meeting of the gentlemen of the Kingston Bar was held on Friday afternoon at the late. offices of O'Reilly & Cameron for the purpose of adopting resolutions referring to the death of the late Judge Macarow :- Judge Burrowes, J. O'Reilly, Q.C., Jas. A. Henderson, D.C.L., Q.C., A. S. Kirkpatrick. Co. Atty., Jas. Agnew, B. M. Britten, J. M. Machar. J. P. Gildersleeve, P. O'Reilly, Deputy

Clerk of the Crown, P. Cameren, J. Mudie, On motion Dr. Henderson, Q.C., was chosen chairman, and Mr W. H. Fuller was appointed Secretary.

The fellowing resolutions were submitted and passed unanimously :-Moved by Jas. Agnew, Esq., and seconded by A. S. Kirkpatrick, Esq., that the members of the Kingston Bar desire to record the DOLLARS feelings of deep and unfeigned regret at the death of Daniel Macarow, Esquire, and their profound sympathy with his widow and family In paying this humble tribute to his worth as a man, and in recording their sense of the conscientious and zealous manner in which h

legal profession, and as a County Judge they ments everywhere expressed: his loss not only as a public but as a professional mamos will be widely mourned, and the members of the Kingston Bar with whom he had been long associated deeply lament his death. Meved by B. M. Britten, Esq., and second attired in their robes, do attend the funeral.

ed by John McIntyre, Esq., that the Secure Judge Macarow a copy of the foregoing resoutions, and that the proceedings of this meet ing he published. Correspondence: of somerster THERMOMETRICAL Issuided TO THE EDITOR OF THE DAILY NEWS Mr News, -- Mr Woods notices my letter of the 27th in your newspaper with regard to the difference of temperature as recorded by him thermometer and mine, and gives his record for the week. Generally his figures agree with it mine, allowing for difference of place lof cheenia vation, and currents of air, which wary in diff ferent lecalities de But I motice athat he places different dates from these given in the Nawall and specially I mean the -24 record on which remarked. I do not suppose Mr Woods' the memeter to be wanting in correctness. suggestion was that the reading was hast and I have known this to happen to mysel On one occasion when reading my sympleso meter I found a heavy storm brewing, and ordered all the windows to be secured, but a second look told me that in a dimmish light I had misread the temperature and made wants at take of 10 degrees in very importantedifferes

ence. Ever since that time I have been more careful. Now, had Mr Woods nefers to the case. of a thermemeter being placed close to a fluored I don't think he means me -I can well under stand that a true temperature, cannot he go except at the place of the flue, Referring b to the mention above of a differ going to town I looked at my glass and Tould +16, and visiting a gentleman with has a least " ing to meteorology, mentioned the fact. The gentleman thinking that he could beat this figure in lowness of temperature, tried hi glass, and found the record but -8. semewhat puzzled at this difference. I found the record then to be -14 ill, not being satisfied, after another half hour had elapsed, I looked again, and found i to be -9. This showed me that a warmer curl rent of air had passed from east to west. But that same night my glass dropped to -22, the lowest temperature I have yet had to rest cord for the present winter. | The reaction followed very soon. What struck mos and induced my comments, was the report in the News of the 26th of a minimum on that morne ing of -24, while mine marked but -12, and that, too, with a slight northerly exposure.

With regard to my glasses, I think Mr Woods, knows them, from a slight allusion made to my personality. If so, he knows that he he good opportunities to test them. more and I have done. While acknowl the correctness of Mr Woods' advice placing instruments in such a way as to be influenced by surrounding objects, I mark that few persons in cities of devote a sufficient space to de what perly advises. Amateurs may desire, not well accomplish. A thousand a of land is too valuable to be ner. A government or an o
