to our "fall-ploughing." What a highly favoured country is ours. We never yet heard of any part of the universe being blessed with an Apostle of true method of agriculture, or a missionary to convert the farmer from the errors of his cabbage-growing. But Mr McKellar has inaugurated the new era, and his name will go down to posterity as the father of his country's corn. What shall we have next? Techbeen invented for swallowing up the un- and you takes your choice, may little dear, for vice, to encourage iniquity, to be a curse and happy surplus which is the bane of the look can take your choice without paying any Ontario Cabinets. What more can be done? We would suggest an asylum for superannuated and retired Cabinet Ministers and members of Parliament. We feel sure that such a proposition will meet with cordial who turn their barrel of sermons over every support from the present Legislature of Ontario, and it would serve a most useful purpose, if the regulations were of the Cathedral, St. James and St. John, and for candidate should afterwards seek to -tyle, improved by delightful singing and the intermeddle in any way with Provincial accompanying organ. The church itself posdevised to meet the case of members of the city, while the building holds a large number w chancery brigade. Joking aside, we have really too, much money to spend, and our of advanced thought, great powers of diction, rulers dont know what to do with it. We dont see what good results can be expected to flow from the establishment of a model farm. We think the past history of the country will show that the best farmers are the heart, and "doing away with forms," it is those who have by industry and energy all nonsense, as anyone may ascertain for himworked their way up from very small self by visiting those churches where prayers beginnings, without any assistance from are made up at the moment. The only differ, leave a residue. No improvement can be -such a stratum as did not touch my locality. government, and we have no doubt- ence is that you have the old groove of one the thing that "hath been is that meta's form of thou fet instead of the beautiful which shall be." Young men who and terse expressions of the liturgy. go to college to learn farming, don't generally turn out successful farmers. The little knowledge, which they acquire turns out to Derchester street. The old St. George's was be a most dangerous thing, and, what is on St. Joseph street, but as the congregation may go through society being decent, because up, I do not accuse Mr Woods of care worse, a very expensive thing, and it is moved up town, the church was obliged to be society will frown upon him if he outrages its lessness in making his records: I the rather very apt to end in mortgages and sheriff's moved also. So the old St. George's was sold cast-iron laws. But look at him who think your printers are at fault. I say nosales. There is no royal road to farmingno such thing as agriculture made easy. It is much better that a young man should take a "free grant" and buy him an axe and strike out into the forest for himself, than waste his time sitting at Mr McKellars' the best preachers in the Dominion. When knows what is kept there, and feels he must the public. If I can accomplish this, my lafeet, whilst he learnedly discourses of the | we have said that, we have said all, for the days when he went a-fall-ploughing, a long | singing is bad, and the organ is played nearly time age.

Professor Pepper.

The first of this gentleman's lectures wal visible, the other in bright blue letters; the been without its fruits. blue letters were immediately erased, but the light letters became dark blue. Now how was Rector, and this was the third lecture. As it it that the same thing produced and de was upon what is denominated (and we fear strayed colour? The Professor explained this with truth) the "curse of Canada," we do not by saying, that the blue was written with in. think we can do better than give a pretty digo, which was decomposed by the chloride | full extract : The greater part of the evening was taken up. are incidental to young men, arising out of the ment of Canada should take it up, and pass an the pewer of handling hot metal in three place we considered those temptations which act making it criminal for a man to sell liquor ways. 1st. Naturally. Some persons have very thick skin on their hands, which would, of course, protect them from the action of There are temptations in the first and in three the power of nanding not metal in three fasten upon young men in social life, and now, this evening, it shall be ours to consider those temptations which meet the young man in busy public, which he is ever engaged in.

There are temptations in the first and in three fasten upon young men in social life, and now, allowed to buy in smaller quantities than five gallons, except from a druggist, and on presentation of a contificate of a physician heat; but as all had not this natural protec. There are temptations in the first and in the sentation of a certificate of a physician. tien, he would show that it might be supplein the third; and let us for a moment look at but fear this letter is too long already. mented, first by friction, that is by rubbing the text—"My son, if sinners entice thee, the hands tegether and destroying the cuticle, consent thou not." There is no doubt about Yours, &c., which grows again tougher than before; by the temptations; the difficulty is to meet and overcome them, and one thing is certain, continuing this operation it at length becomes that if you, young man, rush into temptaso hard as to be unaffected by heat. 2nd.
