DISTINCT VISION.

Kingston, 21st April 1869.

THE CELEBRATED PANTESCOPIO SPECTACLES

A RE constructed in accordance with the philosophy of nature in the form of a CUN-CAVO-CONVEX ELLIPSIS.

They are admirably adapted to the organs of Oswego, Charlotte (Landing for sight, and afford the best artificial help to the human vision ever invented. A peculiar and important feature in these spectacles is witnessed where people have been obliged to resort to glasses from physical debility, having temporarily affected their vision. In such cases the eye regains its healthy power, and the glasses can be laid 1000 aside without injury; while other_kinds spectacles when once worn cannot be dispensed For Sale at the
