THE THEORY OF MAGNETIC

STORMS. On September 1, 1859, shortly before and Voice Lozenges, a safe remedy for the most sudden, two intensely bright patches of The Hamilton Speciator says: "Persons do | EQUIRE PROMPT TREATMENT TO REN- | delicate person, and has caused them to be held | light appeared in front of the cluster. So in high esteem by all who have used them. brilliant were they, that the observers Sold by all medicine dealers at 25 cents per thought the darkening screens attached to their telescopes must have become fractur-.. But this was found not to be the case. The bright spot indicated some progress going on upon the sun's surface—a pro-

> Now, at Kew Observatory there are selfregistering magnetic instruments which indicate the progress of change by which the subtle influences of terrestrial magnetism wax and wane. At one time the line traced by the pointer will be marked by scarcely perceptible undulations, indicating the almost quiescentistate of the great terrestrial magnet. At another, well marked waves along the line exhibit the pulsations of the magnetic system, influenced in a sicist. And then there is a third form of disturbance—the sharp, sudden jerks of the pointer exhibiting the occurrence of those mysterious phenomena termed "magnetic storms." When the records of the Kew Observatory came to be looked over. which the brilliant spots of light had apand Cape Vincent, will be closed at 1:30 P.M., the self-registering instruments had been and Mails from these places will be due for de- subjected to the third and most significant livery at 12:30, P.M.
