SEE LAST PAGE.

A CUBAN PRIVATEER AFLOAT. The New York Sun asserts that the Hornet is a Cuban cruiser and gives a history of the vessel's career in New York, Halifax and subsequently. It says the Hornet was sent to Halifax for coal, where she arrived on the 2d inst., and on the following day was seized on complaint of the Spanish Consul. Meantime she continued to take in coal until on the 5th one of her crew made affidavit that she was a Cuban privateer and had arms on board. The Spanish Consul then gave \$30,000 bonds for damages in case his charges were untrue, and she was unloaded. No arms were found on her. She was released, and again charged. taking in a full supply of coal and thirty more men she hurriedly steamed out of time bound for an appointed place on the coast of Massachusetts, where her armament had been sent.

For certain good reasons we do not give the point from which the Hornet received her guns and supplies, but on the morning of the 21st all were on board, and with a crew of seventy men, Cuba's first man-ofwar, with the word Hornet erased, and Cuba, her new name, inscribed on her stern and pennant, weighed anchor for a point off Gardiner's Island. Before leaving Halifax her captain had received his commis-

Capt. Floy Comacho is her commander. It will be remembered that he surprised the crew of the Spanish steamer Comanditario off the Cuban coast last April, and had to abandon her on account of want of coal and close pursuit by the Spanish manof-war. He is a bold, dashing, middle aged Cuban gentleman of wealth and edu-

The Hornet was a blockade runner, and was captured by the United States war steamship Supply early in 1865, with a cargo valued at \$270,000. She has been confused with the Lillian, also a blockade runner. The latter was converted into a 1869. man-of-war while the Hornet was sent to League Island, where she had remained until last June. She is 820 tons burden. and pierced for eight guns. She is a side wheel and ranked third class. She is Clyde built, and can, under heavy pressure, make fifteen knots an hour. She has seven guns, three on each side, and a pivot bow gun, a 100-pounder Parrott of long range. The side guns are two 32-pounders, two 68-pounders, two grape and canister pieces, also 68-pounders. Her crew, the last of whom went on board of her night before last, numbe s 158 men-sixty of whom are Americans, who saw service Home Insurance Company of New habitual use increases the appetite and produring our war. She has twenty-two experienced gunners, and all the munitions, boarding hooks, and complete parapherna lia of a corsair. She is no privateer, but a regularly commissioned man-of-war, commanded by a Cuban, with a commission from Cespedes. Her mission is to capture Spanish merchantmen and take them into Mexican ports for adjudication; she is also to capture and destroy Spanish transports, and all passengers steamers engaged on the Cuban coast, and, when prudent, attack Spanish armed steamships or sailing vessels. She will not be used as a transport as reported. Whenever it is unsafe for her to carry her prizes into Mexican ports, she Losses paid in 50 years, .. . \$24,000,000 will save what she can of their cargoes, and then set fire to them and sink them at ' sea. What the Alabama was to our commerce, the Cuba will be to Spanish com-She will escort all expeditions into safe the deposit with the Government of Stocks to bays, and guard them until landed, and the amount of alterward escort the vessel carrying them out to sea.

An altercation, terminating in an assault, occurred in London during the Prince's visit, between Capt. W. B. Meredith and Lt.-Col. R. Lewis, of the 7th Light Infantry, the result of a dispute as to the command of the guard over the residence of Prince & Arthur. Capt. Meredith struck the Colonel in the mouth with his band.

Wild beasts are counterfeited in India in order to get the bounty paid by the government for the head; secondly, the real skull is brought forward; and sometimes, as a third resource, the real tiger or bear is dispensed with and the skall of a hog or jackal is tendered, provided with false teeth and covered with pigskin moulded on a real tiger's head. Some of the monsters were beasts of straw. The skulls are now ordered to be smashed and the skins to !

AND MERCHANT ADMIT THE IMPORTANCE OF

R. Freeman, Pharmaceutist, is allowed to be one of the greatest discoveries of the present century. It is largely employed by the most eminent Physicians and Surgeons in hospital an private practice in all parts of the world. It has effects peculiar to itself, and which are essentialdifferent to those produced by the various compounds bearing the name of Chlorodyne, but have no pretence to possessing its virtues. rapidly relieves pain, from whatever cause, allays the irritation of fever, soothes the system nder exhausting diseases, and gives sleep without producing any one of the unpleasant feelings so commonly arising from the use of opiates. 1 continues to hold its unshaken position in the estimation of the Profession as the best, most reliable, and cheapest preparation. Eminent and

scientific Physicians made affidavits that they have tested its effects in careful comparison with those of "DR. COLLIS BROWNE'S CHLORO-DYNE," and deposed to the facts that they found it a more certain and reliable preparation, Earl Russell communicated to the Royal College of Physicians and to Mr Freeman, that in Manilla the only remedy of any use in Cholera was Chlorodine. The Medical Times and Gazette, January 13th, 1866, states, "It has an immense sale amongst

the public, and is prescribed by scores of Orthodox Medical Practitioners, and, of course, it would not be thus singularly popular did it not supply a want and fill a place." Manufactured by the Inventor, Richard Freeman, 70, Kennington Park Road, London, S. The genuine has engraved on the Governme Stamp (outside each Bottle), "FREEMAN'S ORIGINAL CHLORODYNE."

(10NDY'S PATENT FLUID or hatural disinfectant purifies, deodorises, and disinfects, by the agency of nascent or ozonic oxygen,-its active principle. Being entirely innoxious, this truly scientific preparation is peculiarly adapted i the following useful purposes, for which other disinfectants, on account of their poisono or other objectionable qualities, are unavailab

and useless :-Detecting organic impurities in air and water. Purifying drinking and other water from organic matter, lead, &c. Freshening the air of close places, and remov-Freeing meat, fish, butter, or other provisions

Counteracting the effects of organic poisons taken into the stomach. Curing Musty provender. Freeing wheat and other seed from smut. Maintaining the health of plants in pots and conservatories.

Preserving and restoring the freshness of cut flowers kept in water. Destroying the blight of the potatoe, vine, OF BUSINESS | hop, mulberry tree, &c. Washing dogs and other domestic animals. Cleansing bottles, beer barrels, pickling tubs, dairy utensils. Washing the hair and darkening its colour
