THE Modocs. - Despatches from the Company's wharf. Lava Beds appear to indicate that the United States troops are continuing their game of blundering. The despatches from different quarters of the Western Pacific coast would seem to indicate that a general Indian war was im. minent. The Government having revoted \$6,000 for the improvement of the harbour, we presume the dredge will again be sent here very shortly. Now we think arrangements might be the channel as was the case last year. The suggestion we desire to make is this, that the mud should be employed to fill up the break. water extending from Murney's Tower to the Grove Inn. If that were done, and it planted with trees, we should in a few years have one of the very finest and most beautiful walks about the city. We do not see any difficulty in the matter, if the Aldermen of the Ward will only take the trouble to exert themselves. There may probably be some little expense to the city, but what would that be in comparison with the immense benefit which would be attained by such a substantial and permanent improvement.
