Tuned and Repaired. BOTANY & HYDROPATHY.

on MR. EDITOR—SIR:—As there is no other person in this country professing the Hydrophatic and Botanic System, l beg leave through your excellent journa to inform the public in reference to it.-Many persons professing a different system appear to be sceptical of its genuineness and lead the public to believe that unless a 23 person is of the old-school treatment & able to name every part of the human system minutely, he is nothing better than a quack. There is no other science in the world more worthy of study than the philosophy of health. A human being though insignificant when contrasted with creation, is a subject which thousands have spent ages in describing, and went so far into its minutiæ as to have recourse to microscopes in order to discover what the human eye could not do; and notwithstanding all their researches, it failed in the end. Should an equal number spend equal time and give names to every hair on the human head, it would not add any real benefit to suffering humanity .-There are but few parts of the body over which a physician can have any control, namely the vital and leading parts; and when they are relieved they will communicate assistance to all minute parts dependant on them. This being only designed by way of an introduction, I will in future continue to give a description of Anatomy, with the names of the leading parts of the human body, as much as will be necessary for any person to know; and in the meantime beg feave to state, that there were a few words in my former advertisement for a lecture, that were more calculated to stir up the public mind to some excitement than to be the genuine sentiments of the subscrib-

er's modesty. JOHN LANKTREE, Professor of BOTANY and HYDROPATHY. Kingston, January 23rd, 1855.
