When a member of the Ontario House, Mr. Blake moved a resolution denouncing in strong terms the murder of Scott, and declaring that it would redound to the discredit of the country if that foul crime should be allowed to go unpunished.

W. W. McCullough, L.S., writes: "I was afflicted with rheumatism, and had given up all hopes of a cure. By chance I saw Dr. Thomas' Electric Oil recommended. I immediately sent (fifty cents) and purchased a jar, and with only one application I was able to get around, and though I have not used one bottle, I am nearly well. The other three bottles I gave around to my neighbors, and I have had so many calls for them that I feel bound to refer the afflicted by writing to you for a supply."

A FEW HOURS WITH THE POETS.

The use of letters was not known in the north of Europe till long after the introduction of the horse. The descendants of the Celts who inhabited Britain and Ireland, were not singular in their method of preserving the most precious monuments of their nation.

The actions of great men, and the eulogiums of kings and heroes were preserved in the same manner. All the historical monuments of their ancient songs; which were either hymns to their Gods, or eulogies in praise of their heroes, and were intended to perpetuate the great events in their nation's history were carefully interwoven with them.

It had been the same among nearly all the nations of the world; and amongst the Celts, that people of imaginative poetical genius, their laws and legends have been handed down, from generation to generation, like torches of light passed from life to death, along the ages.

The old bard would sing the praises of the chieftain and, at the banquet hall, they would recount the story of other days. As lustrum succeeded lustrum, the civilizing influences of Christianity fell upon the people and the fierce warrior became more homely, and the bard was even the high priest of their festive board.
