A Rapid Increase is the Business of the Above Assurance Company New Policies Picked (Ep in a Year-A Comparison of Years, and What it Leads to.

The fortieth annual report of the directors of the British Fupire Mutual presents some very interesting facts, showing that this rapidly growing institution has evidently enjoyed its full share of the prosperity which has marked life assurance business in general during the past year. It now bids fair to become one of the foremost among the numerous companies in the united kingdom; certainly its progress during the past pear has been most satisfactory. The following table shows how soundness has been maintained in the midst of a rapid increase of

In the two important particulars of development and economy, great improvement has awful presence, gathered himself together been made. The new business completed was of enormous extent, 2,048 policies having been found for \$4,894,430, and having produced a new annual premium income of \$168,310 As showing the great expansion that has taken place in the business of the British Empire Mutual, it may be pointed out that in 1882 the new sums assured were the new business of the company has been more than doubled, a fact which speaks volumes for the ski l and vigor with which the affairs of the British Mutual are controlled. Comparing the revenue account for 1886 with that of the preceding year, it is seen that a large increase has taken place in the premium income. The receipts for 1885 were \$774,855 and for 1886 \$874,475. The business which the company is acquiring appears, therefore, to be of an unusually stable mourners,-Youth's Companion. character, and this is by no means to be taken for granted in a company doing a large new business. The reduction that has been made in the percentage of expenses, however, is still more satis- rial papers.
