Acknowledging the Resolutions.
The mayor this morning received communications from the department of public works, and the minister of justice, acknowledging the receipt of the resolutions passed at the public meeting held here, endorsing the building of a dry dock with convict labor.

Tobin to Quitter.
The work could not be done unless the company's pipes were touched. Mr. Kirkpatrick asked if the witness believed that Mr. Wilson could prevent the city from interfering with the company's property, and this the witness refused to answer, saying that he did not know, not having acquired of the city solicitor. The matter then dropped.
Mr. Kirkpatrick asked the cost of the Arch street drain, which has just been completed. He thought it would be all right to refer to the arbitrators in a matter of estimating the cost of excavating Mr. Irving said that he would be unable to give the information required, as the bills for building the drain are not all in.

At eleven o'clock this morning the arbitration resumed taking evidence. Mr. J. Campbell was called on behalf of the company, and testified as to the value of the old boiler. He referred to the pipe laid by the Electric Light Company for poles, and said that he did not find near as much rock as he expected. Mr. C. Booth was recalled and asked as to the value of the wharf property. He expressed an opinion that the property was not as valuable as it was being valued at. He had made a test near twenty old hydrants, over pipes, and found a depth of 3 ft. 10 in. of clay.
Mr. R. Ford said that he had sold lot No. 2 for \$3,000 to Mr. Doran, and that he now valued it at \$3,000 plus the amount expended for improvement.
The arbitration adjourned at 1:30 o'clock.

YESTERDAY'S WEDDINGS.
Rev. Mr. Sibbald, of Belleville, at Byrnes' Altar—Marriages in Kingston, Belleville Ontario, 13th.
Rev. E. W. Sibbald, formerly rector of Christ church, was married at six o'clock this morning to Miss Edith Hangerford, daughter of Mr. Wm. A. Hangerford, of Madoc. The marriage was quietly celebrated at Christ church the only two witnesses present being Mrs. Hangerford, mother of the bride, and her brother, Rev. J. W. Burke, rector of St. Thomas' church, was the officiating clergyman. The bride is an accomplished young lady, and her many friends will wish her happiness. The marriage of any young lady so young in years always occasions a good deal of gossip but in this case the bride was fortunate in the choice of a partner for life. Rev. Mr. Sibbald has few equals as a pulpit preacher and although his path was not strewn with roses while he held the incumbency of his church he will succeed no doubt, in his new field of labor. The happy couple left on the evening train for the west. Rev. E. W. Sibbald was rector of Christ church for five years, and succeeded the late Dr. Clarke. A disagreement arising between himself and members of the congregation over different matters, Rev. Mr. Sibbald resigned. He has received an appointment from the bishop of Toronto as rector of Christ church in Lloydstown, near Toronto, and will at once enter upon his duties there.

IT IS STILL PROCEEDING
THE WATER WORKS—ARBITRATORS TAKING MORE EVIDENCE.
The City Engineer Cross Examined at Length—Something About the Cost of City Drains and Contracts.
The water works arbitration was resumed, at three o'clock yesterday afternoon. When Mr. W. Irving was recalled he said that on Stuart street, test pits had been made by the electric light company, and measured by the city. The average depth of clay from the surface of the ground, in the rock in the 122 tests made is 3 feet 6 1/2 inches. Outside tests had also been made where the average is 3 feet 9 inches. The 122 tests were at stated points. In Mr. Irving's opinion, a fair test between the city and water works company would be to find the depth at street intersections. At the corner of Montreal and Ordnance street, a test pit had been sunk, but not at the water pipes.
Mr. Kirkpatrick thought that the pit should have been made over the pipe, as he had been told that there is considerable rock there. He requested that a test be made directly over the pipe, so that the correct depth of rock might be ascertained. Eleven of the tests were made on streets on which the company has no pipes. He thought that the tests made by Mr. Irving, for the city, did not deal fairly with the company.
Mr. Irving said that out of 37 tests made by Mr. Booth, ten of them were made on streets where there are no pipes. Judge Clark cross examined Mr. Irving in regard to the plan of the tests and the correct depth of rock. He asked that the average depth of clay, in the tests, be reduced the average from 3 ft. 6 1/2 in. to 3 ft. 4 1/2 in.
Mr. Kirkpatrick asked if the tests made for the purpose of ascertaining the depth of the pipes had been made at Mr. Irving's free will, or at specified points. Mr. Irving said he took them at his own free will. He never was of the opinion that the average depth of the pipes all over the city was the feet. In excavating clay and macadam, he thought there should be a difference in the cost. The macadam in the centre of the streets is hard, but over the pipes it is not. Mr. Irving had examined some of the pipes and found them crusted inside. If the pipes were not lighter than when bought, they might have depreciated in value, owing to the crusting.
Mr. Kirkpatrick asked the witness if he could ascertain by his books the cost of any hydrant, and Mr. Irving said he could. Mr. Kirkpatrick asked for the cost of putting in the new eighteen hydrants. A discussion arose between the witness and Mr. Kirkpatrick regarding the city employing Mr. Wilson to do plumbing work. Mr. Irving said that he was at times engaged by the city, and that one time through certain arrangements which he had made, Mr. Wilson was awarded the contract for work, when he was not the lowest tenderer. Mr. Kirkpatrick would know how such could be done, and asked Mr. Kirkpatrick to acknowledge the receipt of the resolutions passed at the public meeting held here, endorsing the building of a dry dock with convict labor.
Mr. Irving said that Mr. Wilson would say: "You must not touch our pipes," and the work could not be done unless the company's pipes were touched. Mr. Kirkpatrick asked if the witness believed that Mr. Wilson could prevent the city from interfering with the company's property, and this the witness refused to answer, saying that he did not know, not having acquired of the city solicitor. The matter then dropped.
Mr. Kirkpatrick asked the cost of the Arch street drain, which has just been completed. He thought it would be all right to refer to the arbitrators in a matter of estimating the cost of excavating Mr. Irving said that he would be unable to give the information required, as the bills for building the drain are not all in.

At eleven o'clock this morning the arbitration resumed taking evidence. Mr. J. Campbell was called on behalf of the company, and testified as to the value of the old boiler. THE COUNTY COUNCIL
INSPECTOR SPANKIE SUBMITS HIS ANNUAL REPORT.
Important Information for the Residents of Frontenac—Voluntaries to the Different Municipalities.
To-day (Thursday) was moved by Mr. Williams seconded by Mr. Mackenzie that \$50 be granted the Garden Island mechanics institute; \$100 to each of the agricultural societies of Kingston, Storrington, Portland, Loughborough and Portmouth; for roads; \$75 each to Hingham, Oleno, Oso, Kennebec, Palmerston and Canoto, Clarendon and Miller, Barris and Bedford for roads; \$100 to Pittsburg, to be expended in improving the boundary line between the municipalities and Leeds. Mr. Calvin said that the directors would not accept the grant towards Garden Island institute, and that he would not be a party to the disposal of money in such a way as to give to the institute. In answer to Mr. motion Mr. Toland said it was proposed to give Pittsburg a grant because it had no fair. The motion was passed.
Mr. Vanliven moved, seconded by Dr. Brown, that \$300 be granted to repair the foot bridge, it having been affected by the floods. Mr. Toland claimed that the motion was out of order, and Mr. Calvin said he did not like to see a township which had no debt and which had money out at interest, which had a heavy debt and was paying interest at 6 per cent. Mr. Vanliven said the township was unable to deal with the matter. Mr. Toland said that the township of Kingston, which paid the least for a special grant. Mr. Calvin said that the system of making grants was wrong; at any rate Kingston was wealthy enough to make the necessary repairs to the bridge. The resolution was then put and passed.
Judge Price, Dr. Spankie and Mr. Williams were appointed arbitrators in the Palmerston school section dispute matter.

At eleven o'clock this morning the arbitration resumed taking evidence. Mr. J. Campbell was called on behalf of the company, and testified as to the value of the old boiler. He referred to the pipe laid by the Electric Light Company for poles, and said that he did not find near as much rock as he expected. Mr. C. Booth was recalled and asked as to the value of the wharf property. He expressed an opinion that the property was not as valuable as it was being valued at. He had made a test near twenty old hydrants, over pipes, and found a depth of 3 ft. 10 in. of clay.
Mr. R. Ford said that he had sold lot No. 2 for \$3,000 to Mr. Doran, and that he now valued it at \$3,000 plus the amount expended for improvement.
The arbitration adjourned at 1:30 o'clock.

number on register 133—60 boys and 64 girls; receipts \$1,108.84; expenditure \$1,108.84.
Sydenham high school has taken a step in advance, and now accommodates pupils preparing for first class certificates. Two pupils secured first class certificates, and one of five pupils sent to Queen's carried off a memorial and another a scholarship. Eighty per cent of the pupils who tried the school, which was never in a better condition. Special attention is given to candidates for certificates and matriculation to Queen's.
The model school, Kingston has a painstaking, active and watchful principal in Mr. R. K. Rose, who is well adapted for his work of dealing with teachers in training. The county has reason to be congratulated on having such a source of qualified teachers, and employed in the schools have had the advantage of a model school training. At the close of the session in 1886, 21 candidates were successful in passing the professional examination for third class certificates. The inspector delivered about twenty lectures during the season in question on hygiene and laws of health.
The mechanics institute in Garden Island is the only one in the county. It was founded in 1865 by the late Mr. D. D. Calvert. The evening classes are attended by 23, with 42 on the roll. The annual cost is about \$1,000, and the library contains 2,700 volumes, ten daily papers, six weekly, seven magazines and seven periodicals.
In the county there are five R. C. separate schools, employing five teachers. The schools are situated as follows: Wolfe Island, 3; Kingston and Storrington, 1 each. They have 250 registered pupils, 128 boys and 122 girls, with an average attendance of \$128 Income \$1,814.13; expenditure \$1,643.33.
The report closed with statistics regarding education in Ontario.
The report, which was read by Dr. Brown, was lengthy and so full of information that the council decided to have it printed and distributed in the various school sections.
