Brilliant Exit of the Triumph in France and England.

It is now recognized by the leading medical men that Dr. M. Souvielle's Spiro-meter is the most wonderful invention of the age for the cure of Catarrh, Asthma, Bronchitis, and all lung diseases. After having been used in the leading hospitals of France and England, it has proved that 75 per cent. of these diseases, by many called incurable, can be cured by the Spirometer, an instrument which conveys medicinal properties direct to the parts affected. This discovery is proving a blessing to mankind and a credit to his name. Many persons in the city of Montreal, and all over the Dominion, have been cured of the above diseases. Below are a few of the many hundreds: Mr C. Hill, Montreal, catarrh and bronchitis. Mr Delisle-Sheriff, of the Indian Department, Ottawa, catarrh of many years. Mr Cornell, Gen. Agcr, Ottawa, catarrh and lung diseases; cured. Mrs Smith, London, wife of Medical Detective, cured of catarrh. Geo. Maguire, Toronto, 432 Adelaide street West, daughter cured of asthma. Several of my family and friends have been cured of bronchitis, asthma and catarrh by using the Spirometer." John W. Whelan, Manager of the Post and True Witness, Montreal. Geo. Willis, Exeter, cnt, catarrh and bronchitis. John Dunn, 8 Robert street, Toronto, bronchitis. J. D. Armstrong, 186 Yonge street, Toronto, catarrh and catarrhal deafness. Thomas Telfer, 12 Melinda street, Toronto, asthma; cured. Rev. Henry A. Irvine, Upsala street, Montreal, for many years suffering from bronchitis and asthma, is now cured. Thousands of others can be given, but the above is sufficient to convince the public of the merits of the Spirometer. The only Spirometer in Canada is for sale at Souvielle, ex Aide Surgeon of the French Army, 13 Phillips Square, Montreal. Physicians and sufferers can try it free.

Testimony of an Eminent Phy

The proofs which authenticated the claims of Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites to be regarded as the finest pulmonary and emanate in many instances from physicians of eminence. Dr. J. Collis, of St. Louis, writes as follows:

"During ten years of active practice, I have had occasion to prescribe Cod Liver Oil and Hypophosphites. Now your preparation came under my notice, I gave it a trial, and take great pleasure in stating that it has given great satisfaction and it is to be preferred to any I have ever used or recommended. I have used it in my own family during heavy colds, and in every instance a happy result has followed. I cheerfully recommend its use in all cases of debility arising from weakness of the muscular or nervous system."

What can be more convincing than this? The skill and long and large practice and high reputation bearing direct and positive testimony to the value of a remedy which he has thoroughly tested. Who can read and doubt? Assuredly no one of common sense. Indeed, the cures of Consumption and other lung diseases is also most serviceable in scrofulous affections, especially in children, and to observe that each wrapper has a facsimile of the firm's signature upon it. Prepared only by Northrop & Lyman, Toronto, Canada.

A New Principle

The principle upon which Putnam's Painless Corn Extractor acts is entirely new. It does not sink deep into the flesh, thereby producing soreness, but acts directly upon the tissues covering of the corn, separates it from the under layer, removes the direct pressure from the part and does away with a fatal shock by keeping ourselves well fortified with pure blood and a properly nourished frame.—Civil Service Gazette.—Made simply with boiling water or milk. Sold only in Packets and Tins (½lb. and 1lb.) labelled "James Epps & Co., Homœopathic Chemists, London, Eng." Also makers of Epps's Chocolate Essence for afternoon use.

MEDICATED INHALATIONS.

Head, Throat and Lung affections have become so complex and obstinate that the ordinary methods of treatment, even when they do relieve, rarely effect a permanent cure. The system of inhalation is the only one by which the remedies can be brought in direct contact with the diseased parts. The vapor is breathed into the lungs, and thence through the blood to the remotest parts of the system, thus reaching the most obscure and complicated diseases.
