\$15,000 in the dry-dock, the probable object being to relieve those who found that they were likely to lose money.

Kingston is now owner of the vessel, which he has chartered to a shipping man.

Kingston is said to be much for his advancement, which he has not fit up the dry dock, and bring to Kingston the money now paid in American ports, and the labor furnished by American mechanics? Here is a splendid opportunity for enterprise being offered.

The Allan Steamer Canadian is stranded in Halifax Harbour.

The Daily News.

FRIDAY EVENING, JUNE 16.

The Whig should adopt some resolute policy, whether it wishes to denounce or to defend a friend. The whole style of the letter, headed with the characteristic title "Tory Veto," and the calm falsehood of Reform day, when everything was cheap and nothing to buy it with.

National Conservatives elected by nomination, and yet there are traits which give evidence to the party's popularity. The Whig, however, is in a position in which he is personally interested, as he gives himself a great deal of trouble over the conduct of his party.

The Whig says: "It is the right duty and after reading its various editorials, we begin to believe that it is. It wants to know how we can reconcile the statement that Mr. Charles Tupper proved that "the price of coal in Canada is not increased by the amount of the daily increase in the market price, which is due to the fact that it is a tax." The explanation is easy. The Minister proved that the imposition of the duty brought Nova Scotia into competition with American coal, and that the price of the latter varied in accordance with the degree of competition in other words, that the price of coal in Nova Scotia was raised with the fact that there are people in the country who pay duty on their coal.

- THIS ENTERPRISE.

The friends of Mr. Gunn continue to appeal to the citizens of Kingston for their support upon the ground that their nominees have unreasonably imposed a \$10,000 fine upon the city, giving rise to much workingmen. We have already exposed the unfounded character of the claim put forward in this respect, but we will briefly renew them for the benefit of our readers.

Mr. Gunn is set down for \$40,000 in costs and expenses, and the Gunn held their own. We will, however, repeat that they were built. No, they were built by Mr. William Power, who most gave them to Mr. Gunn for a sum in the neighborhood of \$60,000. The immense enterprise of our member, the van public service which he is said to have rendered to the workings of the city, consists in the fact that he is to be paid off in full and money upon the success of these results at ten per cent interest, and that he finally obtained virtual possession of the property while other more lenient creditors were allowed to go without their money. This street is the scene of the appearance of Mr. King, who is to be thanked for his services.

The Whig proceeds to say that the members have the insolent disposition to term these statements absurd. Anyone who reads this can test the truth of what we say by examining the documents of the Corporation House, where he will find indubitable and unequivocal testimony on the head.

The Whig's implicit baldish about the Nova Scotia going off on the strength of a press with its general tone. It says that Mr. William Brinck "indignantly denied the stand." And the Whig, who had not been mentioned, the extent of his "negligence" or "shame" may be imagined. The author of this article was in the New office and was not at all indignant as the Whig would say.

TELEGRAPH TICKETS.

The paragraph News confined to small Company has still more.

Hanlan is still improving. The Montreal stock market was dull and flat, but prices were unchanged this morning.

The argument for the arrest of judgment in the case of Jacobson is now proceeding in the Assize Court, Montreal.

Hamilton Rolling Mills strike has been agreed to by the men to meet on Monday morning.

McGraw's "The Law," as far as marine business is concerned, has not been profitable. In his pain's society to help others (less per cent interest) he has lost \$20,000 on vessel property. What have the public to do with Mr. Gunn's judgment of the case? And the Whig asks, "What other reason can there be for the fact?" And on what principle does the Whig argue the case drawn therein?

The Whig proceeds to say that the members have not been built in the name of another in order that Mr. Gunn may be relieved of responsibility in case of loss, and with the exception of the payment for the services of the steward, the steward is the attorney of a "holder." We ask, if the above be not the case, why Mr. Power's name appears as that of the owner upon the public record? And the Whig again asked, "What else?"

McGraw's "The Law," as far as marine business is concerned, has not been profitable. In his pain's society to help others (less per cent interest) he has lost \$20,000 on vessel property. What have the public to do with Mr. Gunn's judgment of the case? And the Whig asks, "What other reason can there be for the fact?" And on what principle does the Whig argue the case drawn therein?

The Whig relates to the schooner, but other claims are made on behalf of Mr. Gunn, and one of these is the forwarding business valued at \$20,000. How does this rank as a piece of enterprise? Why, Mr. Gunn came into possession of this in the same manner as he did the vessel, and the Whig again asked, "What else?"
