The Daily News.

The boat would cost about $2,500, of which $500 has already been subscribed. Contributions may be forwarded to the Bishop at Sault Ste. Marie or to the general treasurer, A. H. Campbell, Esq., of Victoria Chambers, Toronto.

FOURTEEN IN ARMLESS

The American Forestry Congress held a session of five days at Montreal commencing on Monday. The morning papers of that city contain reports of the proceedings, which are of considerable interest. The subject of forest culture is one that is attracting much attention in the United States, and the timber question is being regarded with alarm by many. It was generally supposed, until a comparatively recent date in America, that the supply of timber was practically inexhaustible; but it is now known that large districts of Indiana, Illinois, Michigan and other States have been stripped of their forests, and that the supply of timber is rapidly diminishing. Many of the States are now taking steps to preserve their forests, and the Dominion Government has also begun to take measures for the protection of timber limits. The Congress will not be without its due effect in allaying to some degree the numerous loss which is annually incurred by forest fires.

England, he declared, was the only hope for the future of Egypt. Arabi represented retrogression and anarchy. It is quite a new light that has been thrown upon the political crisis.
